Sub: Intimation of introduction of KLGAME in Nascom event
Ref: - Scrip Code 519602

Dear Sir/Madam,

We are pleased to inform that Kellton Tech has participated in Nassom Annual Technology Conference 2014 on IoT, Big Data & Cloud, where Abhishek Vinod Singh, Senior Vice President at Kellton Tech, was invited to speak at NASSCOM ATC 2014. Other speakers were Anand Deshpande, Founder, Chairman & MD, Persistent Systems, Abhay Chitnis, CTO, L&T Infotech, Udayan Banerjee, CTO, NIIT Technologies to name a few. Abhishek discussed about the current innovations in Internet of Things (IoT) and how IoT is bringing transformational impact on businesses and the way we see the world.

Kellton Tech showcased a very innovative IoT application development framework - KLGAME™ (Kellton Tech Location based Gamification, Analytics & rich Messaging Engine) that uses Bluetooth Low Energy devices (beacons), smart phones, wearables and Google Glass. KLGAME™ is designed in a flexible and scalable manner that has four major components - Big Data, Analytics, Cloud and Social. With minimal customization KLGAME™ can be used to create multiple industry specific solutions like Travel, Hospitality, Retail, Entertainment, Advertisement, Healthcare etc. KLGAME™ was well appreciated by the attendees and it remained center of attraction during the conference.

Thanking you,

For Kellton Tech Solution Limited

Director
