

Solix Technologies Attends KronosWorks 2015

Leading Enterprise Data Management Solutions Provider To Discuss OEM Partnership with Kronos

Las Vegas, Nevada November 17, 2015 Solix Technologies (solix.com), a leading provider of Enterprise Data Management (EDM) solutions, will be attending KronosWorks 2015 in Las Vegas to discuss its original equipment manufacturer (OEM) agreement with Kronos (<http://www.kronos.com/>). Last year, Solix and Kronos partnered to bring Solix database archiving to the Kronos Workforce Central suite.

The integration of the [Solix Information Lifecycle Management \(ILM\)](#) framework into Kronos's suite of workforce management applications allows customers to archive data based on legal hold, compliance, and data retention policies. By shifting non-essential data from the production database to archives, the ILM framework enables more effective management of data growth challenges and enhanced application performance, availability and compliance.

"We selected Solix because its archiving solution is best of breed and lends itself well to OEM deployment," Kronos Vice President Engineering Susan Rosnick said of the partnership last year.

Enterprises across all industries are experiencing massive data growth, which increases the likelihood of application failures, business outages, compliance issues and skyrocketing costs. Database archiving solves Big Data growing pains by offering near-line storage for ongoing compliance purposes and easy access to archived data simultaneously.

"We are excited to be attending KronosWorks in support of our OEM partnership," said John Ottman, Executive Chairman at Solix Technologies, Inc. "Solix is proud to be working with Kronos to provide top-of-the-line database archiving solutions for Kronos's client roster of more than 20,000 organizations."

###
