analytical information used during the course of our work. We have not performed any audit, review or examinations of any of the historical or prospective information used and, therefore, do not express any opinion with regard to the same. In addition, we do not take any responsibility for any changes in the information used for any reason, which may occur subsequent to the date of our certificate.

It must not be copied, disclosed or circulated in any correspondence or discussions with any person, except to whom it is issued and to those who are involved in this transaction and for various approvals for this transaction.

4) VALUATION METHODOLOGY ADOPTED BY THE VALUER

4.1 There are various methods commonly adopted for valuation of shares. These are the Net Assets Method, the Discounted Cash Flow Method, the Market Price Method, etc. Each method proceeds on different fundamental assumptions, which have greater or lesser relevance, and at times even no relevance to a given situation. Thus, the methods to be adopted for a particular valuation must be judiciously chosen.

4.2 As informed by the management of DBRL, in consideration for the amalgamation, RPS of DBRL are proposed to be allotted to the equity shareholders of GREDCPL. RPS of DBRL are not listed on any of the stock exchanges. As stated earlier, equity shares of GREDCPL are also not listed on any stock exchanges. Therefore, Market Price Method has not been considered for the purpose of valuation.

4.3 The present valuation exercise is for GREDCPL, which is engaged in realty business and therefore, the Valuer has chosen the Net Assets Method for arriving at the fair value of shares of GREDCPL. However, in Net Assets Method, fair value of the project has been arrived at using Discounted Cash Flow method using Free Cash Flow to Equity Model.

5) NET ASSETS METHOD

In case of the 'Net Assets' method, the value per share is determined by dividing the net assets of the company by the number of shares. Valuation of net assets is calculated

with reference to the historical cost of the assets owned by the company. The book value of the assets and liabilities (other than the assets & liabilities pertaining to Project) on the appointed date is considered to arrive at the Net Assets Value.

- 5.2 As explained in Para 4.3 above, to arrive at the Fair value of the Project, the Valuer has considered the Discounted Cash Flow method using the Free Cash Flows to Equity Model. The Discounted Cash Flow Method values the business by discounting its free cash flows to equity for the forecasted period. The free cash flows to equity represent the cash available after meeting all financial obligations, including debt payments, and after covering capital expenditure, taxes and working capital needs. The free cash flows to equity are discounted by using the Cost of Equity (COE). COE represents the rate of return on investment that is required by the company's ordinary shareholders. The present value of the free cash flows to equity of the forecasted period indicates the value of the project.
- 5.3 The project value arrived above is added to the Book value of Asset & Liabilities (other than Assets & Liabilities relating to project) to arrive at the Adjusted Net Asset Value.
- 5.4 The adjusted Net Asset Value so arrived at is divided by the number of equity shares to arrive at the value per equity share.

6) CONCLUSION

- 6.1 We have reviewed the methodology as mentioned above adopted by the Valuer for arriving at the fair valuation of the equity shares of GREDCPL and also reviewed the working and underlining assumptions adopted to arrive at the values under each of the above approaches, for the purposes of recommending a ratio of entitlement/exchange.
- 6.2 On the basis of the foregoing points, we are of the opinion that the valuation made by M/s. SSPA & Co., Chartered Accountants is fair and reasonable for the proposed Share Exchange Ratio for the proposed amalgamation of GREDCPL into DBRL is as under:
