

Cambridge Technology Enterprises announces contract with leading Netherlands based Technology Company

Engagement to provide operations support for innovative content management platform

Hyderabad, India, August 26, 2015 – Cambridge Technology Enterprises Ltd ("CTE"), an IT services leader focused on the convergence of big data and cloud, today announced its engagement with a private leading technology company connecting the worlds of print, archive, and online.

The customer has developed its own patented Enterprise Content Management (ECM) platform. Their software solutions manage huge amounts of media content by allowing clients to safely preserve, organize, and distribute content in print and digital formats. The customer possesses nearly a decade of print media industry experience and is a recognized leader within the emerging ECM market segment as they serve customers across the globe.

CTE's relationship with this company is to provide operations support for their e-publishing services. The client requires faster turnaround time for its e-paper and magazine operations, a need CTE's domain expertise can play an instrumental role in meeting.

Commenting on this engagement, Aashish Kalra, Chairman of Cambridge Technology Enterprises Ltd said, "CTE focuses on delivering challenges in the domain of integration of cloud and big data. Providing our services to companies such as this, introduces us to new challenges that once met, enable us to build new business connections while also growing as a company."

About Cambridge Technology Enterprises Ltd:
