Please find enclosed herewith a press release titled 'Zensar Technologies celebrates the Fourth Anniversary of its Udaan Biodiversity Park' for further dissemination.

You are requested to kindly take the same on records and acknowledge the receipt of communication.

Thanking You,

For Zensar Technologies Limited,

S. Balasubramaniam

Chief Financial Officer

Zensar Technologies Celebrates the Fourth Anniversary of its Udaan Biodiversity Park

Pune, India, October 15, 2016: Zensar Technologies celebrated the fourth anniversary of its Udaan Biodiversity Park located in Vimannagar, Pune. This 2 acre park was launched in partnership with the Pune Municipal Corporation in 2012, with the objective of creating a green urban landscape for the community - one which is recreational, educational and experiential.

The well-attended event saw the presence of dignitaries from city civic administration and other eminent citizens. In the last four years, the Park has consistently welcomed over 300 visitors per day, on an average, providing them with a beautiful verdant space replete with a sensory experience conveyed via a 'Useful Plants and Braille Trail' that encourages visitors to pluck the leaves in order to smell/ taste/ feel them, in the process enhancing awareness of biodiversity. The annual Biodiversity survey, undertaken each year, has shown a significant increase in the number of botanical families, flora and fauna that flourish here.

Commenting on the occasion, Sandeep Kishore, CEO and MD said, "We believe in creating sustainable and replicable models, whether it's about business or the communities we operate in. The Udaan Biodiversity Park has, since its foundation, been a fine example of how a city like Pune can have beautiful green spaces that add to its biodiversity quotient. We are happy with the number of people whose lives have been touched and look forward to seeing more such initiatives as people take inspiration from this beautiful park."

In the words of the dignitaries and special guests who graced this joyous occasion:

"When I inaugurated the Park four years ago, the objective was to protect the green cover of this city and encourage citizens and organisations to participate actively to get involved in environment protection. It gives me great pleasure to see the enthusiasm of the citizens and particularly Zensar in setting a clear example of how green spaces, the lungs of our city, can be structured for maximum benefit and hope others emulate this model," **commented Adv. MP. Smt. Vandana tai Chavan**

According to Shri. Kunal Kumar, Commissioner, PMC, "It has been our endeavor to involve citizens in making the city of Pune a better place to live in. Udaan Biodiversity Park is a good example of how a park can be more than just a green lung for the city, with its informative sections, the sensory trail and the kind of citizen-centric events it hosts. We would like to see this model replicated in other areas to make such spaces accessible to all."

"We are proud of the significant increase in biodiversity since we launched this beautiful park. The sheer number of people who have experienced joy from visiting the park is heartwarming. Our key objective at this point is to facilitate citizens' commitment to green spaces, at home or in their neighbourhood. We will continue to add more elements to the rich flora and fauna found here and organize more learn-and-adopt sessions," **said Ruchi Mathur, Head, Zensar CSR.**

The event also included a sensory and braille trail traversed by the dignitaries present. The maintenance staff who manage the park were felicitated for their dedicated efforts in maintaining the park. Benchmarked to international standards, the park is educative and experiential, addressing the senses of sight, smell, touch and taste. The park supports 165 plant species from 69 botanical families comprising 33 trees species, 56 shrubs, 59 herbaceous plants and 17 climbers. 10 of these

plant species belong to the Rare, Endemic and Threatened category (RET). The park is rich in flora and fauna with 17 bird species, 15 butterfly species, 8 dragonfly species, 2 fish species, 10 other insect species, 1 reptile species and 1 amphibian species. Over 300 visitors visit the park each day, on an average - to walk, to learn about plants, experience them or simply engage in recreation.

Guided by helpful signages, visitors are able to appreciate the therapeutic influence that plants have as the source of various household remedies. The Braille signage and the sensory aspects of smell, touch and taste help engage visually-challenged visitors.

About Zensar (www.zensar.com)

Zensar is a leading digital solutions and technology services company that specializes in partnering with global organizations across industries on their Digital Transformation journey. A technology partner of choice, backed by strong track-record of innovation; credible investment in Digital solutions; assertion of commitment to client's success, Zensar's comprehensive range of digital and technology services and solutions enable its customers to achieve new thresholds of business performance. Zensar, with its experience in delivering excellence and superior client satisfaction through myriad technology solutions, is uniquely positioned to help them surpass challenges around running their existing business most efficiently, helping in their legacy transformation, and planning for business expansion and growth through innovative and digital ways.
