ST Telemedia and Tata Communications complete the India data centre joint venture transaction

India – October 19th, 2016 – [Tata Communications](#) today announces the successful completion of the India data centre joint venture transaction with ST Telemedia, a strategic global investor focused on communications, media and technology sectors.

In May 2016, the parties announced their entry into definitive agreements whereby ST Telemedia, through its wholly owned subsidiary, ST Telemedia Global Data Centres (STT GDC), agreed to acquire a 74% majority stake in Tata Communications' data centre business in India and Singapore. The transaction for STT GDC's acquisition of the majority stake in the India data centre business has been completed and is estimated at 100% enterprise value of INR 31.4bn. Tata Communications remains a significant shareholder. The transaction for the Singapore data centre joint venture is expected to close shortly.

The strategic partnership provides both companies with the opportunity to further grow their data centre businesses, offering advanced managed data centre services that enable digital transformation for customers.

Since the May announcement, both companies have been working closely to identify areas for business integration to enhance customer service and realise the full potential of the business partnership. Both partners remain committed to ensuring a smooth transition for existing customers and employees of Tata Communications' India and Singapore data centres into the broader STT GDC platform.

~Ends~

Forward-looking and cautionary statements

Certain words and statements in this release concerning Tata Communications and its prospects, and other statements, including those relating to Tata Communications' expected financial position, business strategy, the future development of Tata Communications' operations, and the general economy in India, are forward-looking statements. Such statements involve known and unknown risks, uncertainties and other factors, including financial, regulatory and environmental, as well as those relating to industry growth and trend projections, which may cause actual results, performance or achievements of Tata Communications, or industry results, to differ materially from those expressed or implied by such forward-looking statements. The important factors that could cause actual results, performance or achievements to differ materially from such forward-looking statements include, among others, failure to increase the volume of traffic on Tata Communications' network; failure to develop new products and services that meet customer demands and generate acceptable margins; failure to successfully complete commercial testing of new technology and information systems to support new products and services, including voice transmission services; failure to stabilize or reduce the rate of price compression on certain of the company's communications services; failure to integrate strategic acquisitions and changes in government policies or regulations of India and, in particular, changes relating to the administration of Tata Communications' industry; and, in general, the economic, business and credit conditions in India. Additional factors that could cause actual results, performance or achievements to differ materially from such forward-looking statements, many of which are not in Tata Communications' control, include, but are not limited to, those risk factors discussed in Tata Communications Limited's Annual Reports. The Annual Reports of Tata Communications Limited are available at www.tatacommunications.com. Tata Communications is under no obligation to, and expressly disclaims any obligation to, update or alter its forward-looking statements.
