OFFICIAL RELEASE

Demand soars for the latest Twin Head Four Servo Driven Form-Fill & Seal Machine by Uflex

05 October 2016, Noida (India): India's largest multinational flexible packaging materials and solution company Uflex Limited has recently launched **Collar Type Twin Head Four Servo Driven Form-Fill & Seal (FFS) Machine**. The versatile machine is much in demand by packers and brands alike for packing granular materials and powders with unmatched ease and efficiency.

Designed and manufactured indigenously by the Engineering Business of Uflex at its plant in Noida (India), this machine has two heads for forming and filling pouches of different types and sizes. The four servo system coupled up with a vacuum belt helps significantly reducing rejection rate owing to the perfect alignment and movement of the laminate. The machine is equipped with a control panel placed in the centre of both the heads thereby spelling tremendous ease of operation by a single operator. The machine requires less space, electricity and maintenance as compared to two separate machines performing equivalent work, thereby economising the operating costs.

Collar Type Twin Head Four Servo Driven Form-Fill & Seal (FFS) Machine recently launched by Uflex

Furthermore the machine is fitted with a new design of blade that ensures quality perforation between pouches with well contoured notches offering immense ease of tear-opening to the end-users. The especially designed operating programme for the control panel paves way for a user friendly Human Machine Interface (HMI). The machine can form and fill up to 110 pouches per minute depending upon the product to be packed, quantity to be filled, laminate structure & thickness and the filling system used. This machine forms pillow type pouches with a central seal and is ideal for

packing extruded snacks, pulses, rice and spices among other products. The filling weight can range between 10gm to 1kg.

Commenting about the features of the new Twin Head Four Servo Driven Form-Fill & Seal Machine [UFLEX-CT4SD Twin (SLIM) Bagger], Mr Ajay Tandon, President & CEO, Engineering Business, Uflex Limited said, ***“This machine appropriately addresses the pain points faced by the customers in terms of higher rejection rates of formed and filled pouches. Owing to its 4 servo drives and the vacuum belt, the alignment and movement of the laminate is very smooth and perfect thereby significantly reducing the rejects. Further, the seal integrity that the machine offers is of high quality enhancing product safety and customers’ satisfaction and delight. Ease of handling, optimal space utilisation on the shop floor, work flow flexibility and optimised operational costs all put together make this machine a great value for money. We recently exhibited this machine at PackEx India 2016 in Mumbai and the response was absolutely terrific.***

The order pipeline is very strong and encouraging. Given the advantages that the machine has to offer, customers looking at capacity expansion or replacement of the erstwhile single head FFS machines are placing orders for the new Twin Head Four Servo Driven Form-Fill & Seal Machine. It took the team almost ten months from designing to launching this machine and I am very happy with the response that it has been getting. In the day and age that we live, time is of greatest essence. Living up to our promise of impeccable after-sales support, we offer real time repair and maintenance assistance from our plant to our customers at their site, through modem connected to internet.”

Amid strong demand for the machine, Mr. Ashok Chaturvedi, Chairman & Managing Director, Uflex Limited said, ***“The New Twin Head Four Servo Driven Form-Fill & Seal Machine is a classic example of value engineering by Uflex. Upholding our ethos of continuous improvisation of products and processes we have engineered this machine offering immense flexibility to our customers for packing variety of products. It increases the packaging efficiency of our clients thereby positively impacting their business performance. Nothing is more gratifying than to be able to innovate to the best advantage of our clients globally.”***

About Uflex

Uflex is India's largest end-to-end flexible packaging company and an emerging global player. Since its inception back in 1983, Uflex has grown from strength to strength to evolve as a truly Indian Multinational with consumers spread across the world. Uflex today has state-of-the-art packaging facilities at multiple locations in India with installed capacity of around 100,000 TPA and has packaging film manufacturing facilities in India, UAE, Mexico, Egypt, Poland and USA with cumulative installed capacity in excess of 337,000 TPA.

All Uflex plants are accredited with ISO 9001, 14001, HACCP & BRC certifications. Uflex caters to markets spanning across the globe in over 140 countries like USA, Canada, South American countries, UK and other European Countries, Russia, South Africa, CIS, Asian and African nations. Integrated within its core business profile are allied businesses like Engineering, Cylinders, Holography and Chemicals which further give Uflex a superior edge above competition.

Uflex Limited is also a part of the D&B Global Database and winner of various prestigious national and international awards for its products' excellence. Uflex offers technologically superior packaging solutions for a wide variety of products such as snack foods, candy and confectionery, sugar, rice & other cereals, beverages, tea & coffee, dessert mixes, noodles, wheat flour, soaps and detergents, shampoos & conditioners, vegetable oil, spices, marinates & pastes, cheese & dairy products, frozen food, sea food, meat, anti-fog, pet food, pharmaceuticals, contraceptives, garden fertilizers and plant nutrients, motor oil and lubricants, automotive and engineering components etc.
