Business Overview

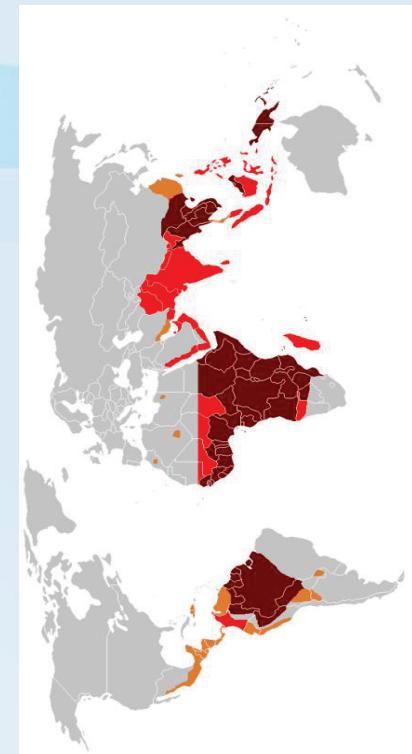

Mangalam Drugs & Organics Ltd.

Malaria: Global Phenomenon

- In 2014, 97 countries and territories had on-going malaria transmission
 - Malaria is presently endemic in a broad band around the equator, in areas of the Americas, many parts of Asia, and much of Africa
- An estimated 3.3 billion people are at risk of malaria, of whom 1.2 billion are at high risk
 - In 2013, 90% of the world's malaria deaths occurred in Africa
- The two most common strains of malaria are *P. falciparum* (Pf) and *P. Vivax* (Pv)
- *Plasmodium falciparum* (Pf) is the worst strain of malaria
 - Pf causes the most acute and severe form of malaria; most of the cases registered under WHO are Pf malarial cases .
- *Plasmodium Vivax* (Pv) is a protozoal parasite and a human pathogen. Pv malaria is the most frequent and widely distributed cause of recurring malaria. It is less virulent than P.Falciparum malaria.
- The Anti-Malarial market is been growing from 219Mn treatments in 2010 to 367Mn treatments in 2014

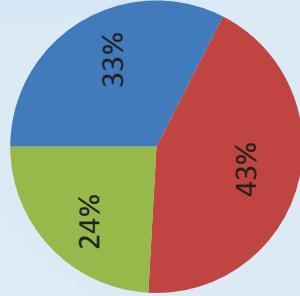

- ◆ Elevated occurrence of chloroquine- or multi-resistant malaria
- ◆ Occurrence of chloroquine-resistant malaria
- ◆ No *Plasmodium falciparum* or chloroquine-resistance
- ◆ No malaria

Addressing Malaria With Multiple Products

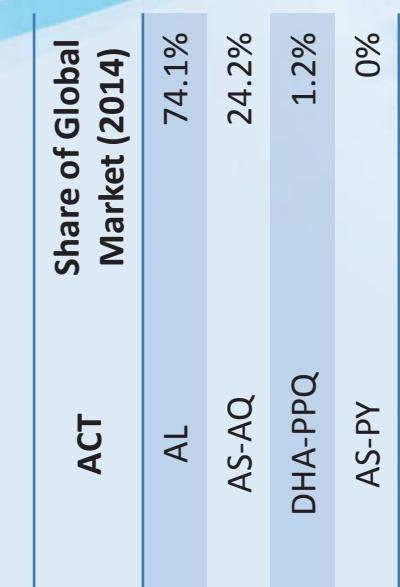

- There are no permanent preventions or vaccines against malaria as of today.
- Following Anti-Malarial APIs are produced by the company:
 - Arthemether
 - Lumefantine
 - Artesunate
 - Amodiaquine Hydrochloride
 - Dihydroartemisinin
 - Piperaquine phosphate
 - Chloroquine Phosphate
 - Hydroxychloroquine Sulphate
 - Pyronaridine tetraphosphate
- Arthemether and Lumefantrine (A&L) is a WHO approved best combination to cure Plasmodium falciparum (Pf) Malaria.
- Arthemether (**A**) is an Anti-Malarial for the treatment of multiple drug resistant strains of Pf malaria.
- Lumefantrine (**L**) is an Anti-Malarial drug. It can only be used in combination with arthemether, it is also known as co-Arthemether.
- AL combination is the preferred combination to cure PF malaria., with a global market share of 74% vs. other combinations.

Revenue Split (%) of Mangalam for FY14-15

■ LUMEFANTRINE ■ ARTEMETHER ■ Other

Global Anti-Malarial API Mix

Going beyond Malaria: Anti-Retroviral

Strong Market Requirement

- Current production of ARV drugs meets only 50% of total demand
- Strong focus on increasing available of medication to infected population

ARV APIs

API Name	Status
Tenofovir Disoproxyl	Commercialized
Emtricitabine	Under process validation on pilot scale
Efavirenz	Under process validation on pilot scale
Lamivudine	Under development in R&D
Tenofovir Alafenamide Fumarate	Under development in R&D
Atazanavire Sulphate	Under development in R&D
Nevirapine	Under development in R&D
Sobusofovir	Under development in R&D

Strong Skill sets and established facilities

- R&D team working on ARV APIs since 3 years; 1 API under production
- 2 product in validation stage and 5 under R&D
- Approval in place from the Clinton foundation and WHO for production of ARV drugs
- Targeting only the regulatory market

ARV Market

- Life time long treatment
- Higher demand, volume and funding for ARV drugs higher
- Experienced and efficient R&D team.
- Cost advantage over competitors

Anti-retroviral: Tenofovir Disoproxyl

- Tenofovir disoproxil belongs to a class of antiretroviral drugs known as nucleotide analogue reverse transcriptase inhibitors.
- It blocks reverse transcriptase, a crucial viral enzyme in HIV-1 and hepatitis B virus infections.
- Tenofovir disoproxil is on the WHO list of drugs recommended for HIV_1 treatment.

Other Products

Uricosuric Agent :Allopurinol

- Used in treatment of gout or kidney stone
- Reduces the production of uric acid in the body, primary cause for gout or kidney stones
- WHO essential medicines for basic health system
- Used in medication for ischemic reperfusion injury, poor kidney function and protozoal infections

Analgesic: Nimesulide

- Used in treatment of acute pain, the symptomatic treatment of osteoarthritis
- Available in a variety of forms: tablets, powder for dissolution in water, gel etc.
- It is marketed by the name Nise Gel by Dr. Reddy's in India

Anti Hypertensive: Bisoprolol Fumerate

- Used in Treatment for Cardiovascular Diseases.
- Mainly for High Blood Pressure, reduced blood flow to the heart congestive heart failure.
- WHO essential medicines for basic health system
- Mylan manufactures formulations of Bisoprolol Fumerate

Industry Overview

Mangalam Drugs & Organics Ltd.

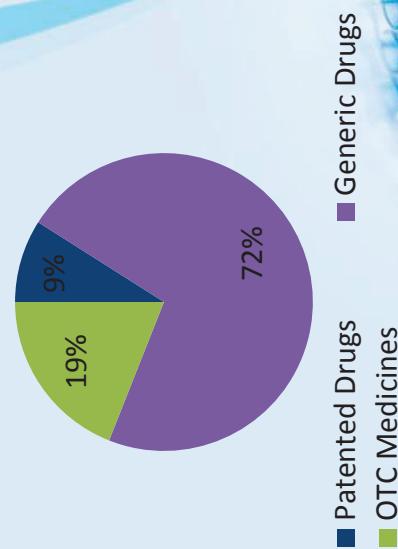

Overview: Indian Pharma Market

- **3rd largest** in the world in terms of volume in the Global API Market.
- **Fastest growing** pharma market in the world
- Generics drugs is the largest segment of the Indian Pharma market with 72% market share in terms of revenue
- Expected to grow at a **CAGR of 23.9%** to \$55 billion by 2020
- Focused on R&D.
 - On an average companies spend 8-11% of their total turnover on R&D
- The domestic Indian Pharmaceutical market grew at **10-12%** in FY15, the growth rate is increasing every year, the growth was 9% in FY14

Indian Pharmaceutical Sector Revenue
(USD Mn)

Revenue Share of Indian Pharmaceutical Companies
sub-segment, 2013

Key Growth Drivers: Indian Pharma Market

Cost efficiency:

- The Indian Pharma cost is almost 60% less compared to USA and half of the cost in Europe

Economic Growth:

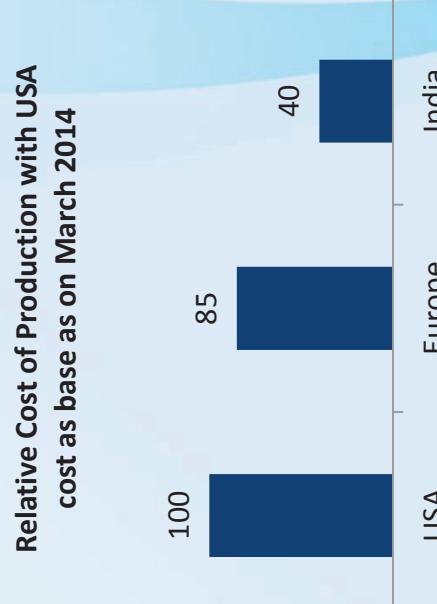

- Drug affordability, penetration in healthcare sector and Chemists penetration in the rural areas of the country are the major reasons for the economic growth of the sector.

Government:

- The government aims at making the Indian pharma market a world leader by 2020.
- The government has reduced the time required for approvals for new facilities to attract more investments.
- The government also allows 100% FDI inflows under automatic route

Diversified Portfolio:

- The Indian Pharma industry contributes to 10% of the global volume of pharmaceuticals.
- The sector manufactures over 500 different APIs. Over 60,000 generic brands are present in the Indian pharma market.
- 49% of the Indian pharma master filling are registered in the USA.
