Marsons bags order worth INR 250 million from RRVPNL a Rajasthan State Utility for supply of 19 nos. 25 MVA 132/33 Kv class Power Transformers.

Marsons Limited has recently backed an order worth nearly INR 250 million from the Rajasthan state utility, which it intends to complete in less than 6 months time. The order involves manufacturing of 19 nos. of 25 MVA transformers. The company is also in advanced stages of discussion for various NER projects, which have once again cemented Marsons' position as the single largest transformer manufacturer in Eastern and North Eastern India, and also brought the company closer to its ambitious target for the next fiscal year.

'Marsons Limited is now actively looking to exploit the large potential brought about by the government's renewed focus on the power sector. With our lab now being NABL approved and our facility being PGCIL approved, we have developed a niche for ourselves in the market. Further, we have successfully leveraged our optimal location in the East to brand ourselves as the most viable option to cater the humungous demand of transformers in the North Eastern region' adds Akhilesh Kotia, Chairman, Marsons Limited.
