Press Release

For Immediate Release

Glenmark Pharmaceuticals receives ANDA approval for Raloxifene Hydrochloride Tablets USP, 60 mg

Mumbai, March 23, 2016: Glenmark Pharmaceuticals Inc., USA (Glenmark) has been granted final approval by the United States Food & Drug Administration (U.S. FDA) for Raloxifene Hydrochloride Tablets USP, 60 mg, the therapeutic equivalent to the reference listed drug product, Evista® Tablets, 60 mg, of Eli Lilly and Company.

WARNING: INCREASED RISK OF VENOUS THROMOEMBOLISM AND DEATH FROM STROKE

- Increased risk of deep vein thrombosis and pulmonary embolism have been reported with raloxifene hydrochloride. Women with active or past history of venous thromboembolism should not take raloxifene hydrochloride.
- Increased risk of death due to stroke occurred in a trial in postmenopausal women with documented coronary heart disease or at increased risk for major coronary events. Consider risk-benefit balance in women at risk for stroke.

According to IMS Health sales data for the 12 month period ending January 2016, the Evista® Market[1] achieved annual sales of approximately $336.5 million*.

Glenmark's current portfolio consists of 109 products authorized for distribution in the U.S. marketplace and 60 ANDA's pending approval with the U.S. FDA. In addition to these internal filings, Glenmark continues to identify and explore external development partnerships to supplement and accelerate the growth of its existing pipeline and portfolio.

[1]Market includes brand and all available therapeutic equivalents
