INDEPENDENT AUDITOR'S OPINION

To the Members of **BSEL INFRASTRUCTURE REALTY LIMITED**

Report on the Financial Statements

We have audited the accompanying financial statements of **BSEL INFRASTRUCTURE REALTY LIMITED** ("the Company"), which comprise the Balance Sheet as at 31st March, 2016, the Statement of Profit and Loss and the Cash Flow Statement for the year then ended, and a summary of the significant accounting policies and other explanatory information.

We conducted our audit in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on whether the Company has in place an adequate internal financial controls system over financial reporting and the operating effectiveness of such controls. The financial statements have been prepared under the historical cost convention on accrual basis, except for certain financial instruments which are measured at fair value.

The significant accounting policies adopted for the preparation of the financial statements are as follows:

a. Use of Estimate

The preparation of the financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported balances of assets and liabilities and disclosure relating to contingent liabilities at the date of the financial statements and reported amounts of income and expenses during the year. Examples of such estimates include accounting for contract cost expected to be incurred, contract revenues, stage of completion, provisions, income taxes, useful lives of fixed assets etc. actual results could be different from those estimates.

b. Revenue Recognition

Revenue from projects is recognized based on percentage completion method, which is determined on the basis of the stage of completion of ongoing projects on the Balance Sheet date. The stage of completion is determined based on progress of the work and estimation of the architects. Provision for estimation of losses, if any, on uncompleted contracts are recorded in the year in which such losses become probable based on the current estimates.

Dividends are recorded when the right to receive payment is established. Interest income is recognized on time proportion basis taking into account the amount outstanding and the rate applicable.

c. Fixed Assets

Fixed assets are stated at cost of acquisition minus the accumulated depreciation. Cost includes all expenses incurred to bring the asset to its present location and condition.

Advances paid towards acquisition of the fixed assets which have not been installed or put to use and the cost of the assets not put to use, before the year end, are disclosed under advance for purchase of assets.

d. Inventories (WIP)

Inventories are valued at the lower of cost or net realizable value. Cost is determined on a first in first out basis and includes all applicable overheads in bringing the inventories to their present location and condition. Excise Duty arising on finished goods and Customs Duty on imported raw materials in stock (excluding stocks in the bonded

warehouse) are treated as part of the cost of inventories.

Inventories (WIP) of FZE – Inventories are measured at lower of cost and net realizable value. Using weighted average method. Cost of inventories comprise all costs of purchase, and where applicable costs of conversion and other costs that have been incurred in bringing the inventories to their present location and condition. Net realizable value represents the estimated selling prices less all estimated costs to completion and estimated costs necessary to make the sale.

d. **Debtors**

Trade receivables are stated at cost, being the fair value less impairment allowances. Allowances for impairment of trade receivables are established when there is objection evidence that the company will not be able to collect all amounts due according to the original term of receivables. The amount of impairment is recognized in the profit & loss.

e. **Taxation (For Subsidiaries)**

The Company has provided the tax provision for the current year. A reconciliation of the statutory income tax rate to the effective income tax rate of the group of the company has not been presented as the company and its subsidiary has no chargeable income.

f. **Borrowing Costs**

Borrowing costs that are attributable to the acquisition and construction of qualifying assets are capitalized as a part of the cost of the assets.

Other borrowing costs are recognized as an expense in the year in which they are incurred.

g. **Deferred Tax**

Deferred tax asset or liability has been determined in pursuant to the AS-22-Accounting for taxes on Income.

h. **Cash Flow Statement**

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of a non cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from regular revenue generating financing and investing activities of the company are segregated.

i. **Impairment of Assets**

At each balance sheet date, the Company reviews the carrying amounts of its fixed assets to determine whether there is any indication that those assets suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. The recoverable amount is the higher of an asset's net selling price and value in use. In assessing the value in use, the estimated future cash flows expected from the continuing use of the asset and from its ultimate disposal are discounted to their present values using a pre-determined discount rate that reflects the current market assessments of the time value of money and risks specific to the asset.

For Subsidiaries and Sub-Subsidiaries: The assets are reviewed for impairment at each year end. An impairment loss is recognized in the statement of income if the carrying amount of an asset exceeds its recoverable amount. Recoverable amount is higher of the value in use and the realizable amount of the asset.
