## Marsons secures orders worth INR 400 million from State utilities

Marsons Limited has successfully won their bid for 4 different tenders of medium power transformers from state utilities of Andhra Pradesh and Telangana. These orders represent almost INR 400 million in value, which will now take the company's current order book to nearly INR 1850 million.

Our Managing Director A.S Pillai, adds, 'This order in the medium power range has helped us strike the perfect balance in our order book between various voltage classes of transformers.

Our current spread of orders is best suited to our setup in so far as it will allow us to extract maximum production from our existing infrastructure. This will lead to quicker turnaround and faster rotation of funds, which I believe is imperative for our industry. In view of recent developments and growth prospects in the foreseeable future, I'm pleased to say that our company is on a path of robust and sustainable growth and I reckon it is safe to say that the best is still not behind us.'
