MARSONS POISED FOR FANTASTIC GROWTH

Marsons Limited has recently bagged another significant order from a state utility. The order, which is pegged to be worth nearly INR 150 million, comes less than a month after the company announced orders worth INR 400 million from Andhra Pradesh and Telangana. This recent order has now taken Marsons' cumulative order book to nearly INR 2 billion, which is the maximum order booking that company has seen in its 60 year history. The company is determined to execute these orders in this fiscal year and to achieve its growth and revenue targets for the year.

Furthermore, Marsons recently operationalised its fourth franchise unit in Alwar, Rajasthan. With 4 operational franchises and 2 more to be operational in a months time, the company's growth is not limited by capacity or working capital constraints, which has now enabled the company to achieve inorganic growth rates.
