--	--

Dear Sir/Madam,

**Subject:- Disclosure as per Regulation 30(3) of the SEBI (LISTING OBLIGATIONS & DISCLOSURE REQUIREMENTS) REGULATIONS, 2015**

In compliance to Regulation 30 (3) of the SEBI (LODR) Regulations 2015, we wish to inform our shareholders that Fineotex Chemical Limited along with its Malaysian Subsidiary BT Biotex Sdn Bhd has launched its new product called **AQUASTRIKE VCF: The Ecofriendly, nontoxic solution for Mosquito outbreak in several countries!**

Aquastrike is approved by Ministry of Health in Malaysia and declared as **Non-Pesticide** by the **Pesticide Board** and allowed to use freely by consumers. The **Singapore PUB (Public Utility Board)** has approved it and even has the **EU approval** for shipment to Europe. NSF had also confirmed its Non Toxicity even in drinkable water. The Vietnam and Cambodia bodies have also approved and soon it will be under **WHO registration application**. The **Patent** for the same has been filed in Malaysia as well.

The application for approval has been done in the **Central Inspection Board of India (CIB)** and to the **Prime Minister Office** for the **Swachh Bharat Abhiyan** as this will be helpful to break the mosquito lifecycle and also preserve the aquatic life in the water and keep the water free of insecticides and other harmful substance which affects human health.

It is a non toxic, non polluting, Eco-friendly solution, produced in Malaysia with European design engineering. Simply poured on the water surface at a rate of 1ml per square meter, the chemical based liquid forms a molecule thick film, that doesn't stop water oxygenation (so no effect on fish, worms, snails and vegetals) but alter the water surface tension. As a result, larvae and pupae are unable to attach their breathing syphon and end up drowning.

The adult mosquitoes while trying to lay eggs on the surface of the water, drown because of the lower surface tension.

It doesn't kill the mosquitoes by poisoning. Aquastrike effect is physical not chemical, which also eliminate the risk of mosquito developing immunity to the product as it is the case with some insecticides or even BTI. All the tests have shown the perfect efficiency of the product (including tests done by laboratories approved by WHO).

We request you to take the above information in your record.

Thanking You.

Yours faithfully,

For FINEOTEX CHEMICAL LIMITED

Raina D'Silva  
Company Secretary
