(vii)	Effect of measuring investment at fair value through other comprehensive Income	0.61	0.83
Total Comprehensive Income as per IND AS		868.09	1247.43

Notes Relating to Reconciliation :

- (i) The company recognises costs relating to its post employment defined benefit plan on actuarial basis both under IGAAP and IND AS. Under IGAAP, the entire cost, including actuarial gains and losses are recognised in Profit and loss. Under IND AS, remeasurement gains and losses are recognised in retained earnings through Other comprehensive income.
- (ii) Under IND AS-109-Financial Instruments, financial liabilities are discounted if the time value is material and the effect of difference in value is given in the profit and loss account.
- (iii) Under IND AS 16, the cost of an item of property, plant and equipment includes the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, hence, the estimated cost of dismantling of mines were identified and discounted to the date of the acquisition of mine and capitalised. Depreciation on the same is provided in proportion to the units extracted to the total reserves. Correspondingly, provision created to reflect the current estimate i.e., by discounting till the date of financial statements and difference in discount amount is charged to profit and loss account.
- (iv) Under IGAAP, spares were recognised as part of inventory and charged to Profit and loss as and when consumed. Under IND AS, items of spares which meet the definition of Property, Plant and Equipment (PPE), are capitalised and depreciation is charged on those spares from the date they are available to use i.e., the date of purchase and the WDV of the same is capitalised in IND AS on transition date and depreciated further, resulting in the decrease of depreciation charged to profit and loss.
- (v) Under Indian GAAP deferred taxes are recognised using Income statement approach i.e., reflecting the tax effects of timing differences between accounting income and taxable income for the period. Under IND AS, deferred taxes are recognised using balance sheet approach i.e., reflecting the tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes using the Income tax rates enacted or substantively enacted at reporting date. Also, deferred taxes are recognised on account of the above mentioned changes.
- (vi) Cost of limestone and coal consumed have been reclassified to primary heads of expenses in statement of profit and loss using a classification based on the nature of expense method as per para-99 of IND AS-1, Presentation of financial statements.
- (vii) Under IGAAP, long-term investments are usually carried at cost. However, when there is a decline, other than temporary, in the value of a long term investment, the carrying amount is reduced to recognise the decline. Under IND AS, Long term Equity investments are re-measured at fair value through other comprehensive income. As per para no. 44 of IND AS 12, Income Taxes, it is expected there will not be adequate taxable profits for utilizing the temporary differences arising due to fair valuation of investments classified through other comprehensive income and hence no deferred tax asset is being created on such investments.
- (viii) The figures for quarter ended 30th September 2016 have been restated to comply with IND AS to make them comparable with the current period. Further, they have been regrouped/reclassified, wherever necessary, to conform with the current period presentation.

- (i) Figures have been regrouped wherever necessary.
