 - 1.2 Business Line (English)
2. Please acknowledge receipt.

Thanking you,

Yours faithfully,
For M M FORGINGS LIMITED

J.SUMATHI
COMPANY SECRETARY

Encl: As above

at this is the single-biggest legislation that has been rolled out anywhere in the world. It is bound to go through periods of correction and change before it settles down," he told *BusinessLine* at the sidelines of a financial

out of every three TVs bought on EMIs and is the largest financier of mobile phones. "We are also seeing that consumers are moving to particular product categories such as mobile phones," said Bajaj.

The consumer segment has seen a 30-35 per cent growth. As a strategy, Bajaj Finance will dial down on segments with higher risk. Being present in multiple consumer

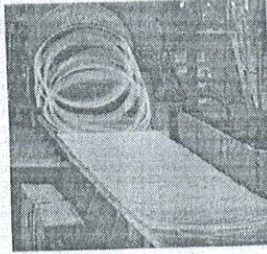

segments and multiple product lines is a part of its de-risking plan. Growth in SME segment continues to be sluggish, and the company has accordingly

"There is no reason for an IPO in the short-term," he said, adding that the life and non-life insurance companies are well capitalised with their promoters remaining committed.

Forging industry singed by lower supply of pricey steel

CHENNAI BUREAU
Chennai, November 14
The lack of adequate supply of steel and its high price pose a big challenge to the domestic forging industry amid bright growth prospects in the near-term, according to the Association of Indian Forging Industry (AIFI).
"For us, to capitalise on the growth coming from the auto sector, the big problem is steel's availability and price. The supply of steel within the country is less than that of demand. A lot of steel mills have closed their operations due to high debts and other things," said S

Muralishankar, President, AIFI. Also, for several exporters, Indian steel prices are a deterrent for being competitive in the global market. "Indian steel price movements are totally different from the global markets," he said.
Compared to European, Japanese and American counterparts and companies from China, Korea and Taiwan, the technology and automation levels are much lower, barring a few big forging companies. Most of the forging companies are in the MSME segment and need to upgrade their technologies. For this, the industry

needs huge government support in terms of further interest subvention and technology up-gradation fund. "On the power front, the situation has improved across the country. But the quality of

power is still a concern," said Muralishankar.

GST issues
On GST, the forging industry said it was facing issues pertaining to input tax credit and documentation, increase of working capital and lack of clarity in processing returns, among others. "If the GST implementation issues are not handled well, this new tax reform could have serious repercussions in the long-run," said AIFI.
Meanwhile, the domestic forging industry, which supplies 70-75 per cent of its production to the auto sector, ex-

pects an improved demand in the coming quarters due to good monsoon season and surge in auto sales, especially commercial vehicles and tractors.
The estimated revenue of the 378 functional forging units across India in 2016-17 was ₹31,189 crore - they provide employment to about one lakh people across the country.
The installed capacity increased to 38.5-lakh tonnes in 2016-17 from 37.6-lakh tonnes in 2014-15, with the overall production of forgings increasing to 23.9-lakh tonnes from 22.5-lakh tonnes.

Kochi Port receives first coastal steel consignment

OUR BUREAU
Kochi, November 14
Kochi Port has received the first coastal steel consignment from Rashtriya Ispat Nigam Ltd with the vessel MV Sabarimalai anchoring at the port from Visakhapatnam with 5,000 tonnes of steel consignments.
This is the result of the efforts made by the Central government to move cargo along coastal routes. The consignment of RINI moved by coastal route from their plant in Visakhapatnam is meant for distribution in and around Kerala by rail to their stock yard.
