Vedanta hopes for Lanjigarh expansion nod by 2020

JAYAJIT DASH
Bhubaneswar, 31 May

Vedanta, the London-headquartered metals and mining major, is looking at the possibility of expanding its alumina refinery production at Lanjigarh in this state's Kalahandi district beyond the present cap of four million tonnes per annum (mtpa).

The refinery's rated capacity is six mtpa and Vedanta expects to get all clearances to operate it at that level by 2020.

"We are hopeful of receiving all approvals for expanding the capacity to six mtpa by then. But, to operate at that capacity, a lot will depend on availability of local bauxite sources. We are evaluating options, like local sourcing arrangements and participating in auctions of bauxite assets. Availability of local bauxite would be the key factor, since we are incurring huge cost in transportation," said a senior executive.

The company is hoping for state government help on this. "Odisha has

abundant bauxite resources and given the government's initiatives, (we are) confident that bauxite will be made available in the short to medium term. The company has entered into agreements with various suppliers, internationally and domestically, to ensure availability. In the initial years, the company has assumed that bauxite will be purchased from third party suppliers, till sourced from own mines," Vedanta has said in its financial statement for the year ended March 31, 2017.

In 2016-17, the refinery produced 1.2 mt, growth of 24 per cent. During 2017-18, the company will continue to expand operations. The main sources of bauxite would be a mix of mines at Bharat Aluminium Company, a sister concern, and the balance from other sources, including import.

In FY17, Vedanta's total bauxite requirement was pegged at 3.4 mt. Captive mines contributed 31 per cent and the company arranged 23 per cent from domestic sources. Import made the remaining 46 per cent.

Indian firms seek anti-dumping duty on imports of SAW pipes from China

Jindal SAW, Essar Steel and Welspun petition the Directorate General of Anti-Dumping

ISHITA AYAN DUTT
Kolkata, 31 May

Jindal SAW, Essar Steel and Welspun Corp have petitioned the Directorate General of Anti-Dumping And Allied Duties (DGAD) to impose anti-dumping duty on imports of submerged arc welded (SAW) pipes from China, after local firms lost a number of tenders to Chinese suppliers.

"The domestic pipe industry is facing severe under-utilisation of capacity due to lack of orders from the domestic industry. India has a total of six million tonnes of pipe-making capacity, but the current capacity utilisation has fallen below 35 per cent and the companies are finding it difficult to stay afloat," said Vinod Mehta, general secretary, Indian Pipe Manufacturers' Association.

"With the trade measures against

dumping of steel (in place), Chinese companies are conveniently dumping pipes into the Indian market," he added. The difference in price between Chinese and domestic supplies is about 20 per cent.

India has imposed a five-year anti-dumping duty on import of hot rolled and cold rolled flat steel products recently, which has been a major boost for the

steel sector. Now, pipe manufacturers, which are facing a similar onslaught of cheap imports, are looking for a similar respite. What has aggravated the problem for pipe manufacturers is that India was exporting close to 50 per cent of its production to the US, Iran, Mexico, Saudi Arabia, Bolivia, etc., but most of these countries have raised trade barriers to

contain imports to encourage their domestic industry, thus impacting exports from India. "With the government's massive investments in infrastructure in the laying of pipelines, domestic manufacturers are aspiring for some major relief even though the total requirement of pipes for these projects is far less than their combined production capacity," Mehta said.

The government has come out with a recent notification on a policy for providing preference to domestically manufactured iron and steel products in government procurement. Mehta, however, pointed out that it would not apply to EPC (engineering procurement construction) contracts. "The oil and gas PSUs should be made to restrict the procurement of their requirement for pipes from domestic sources only," Mehta suggested.
