OPERATIONAL REVIEW

This Financial Year, the Company has a negative growth of 6.02% resulting thereof the revenue from operations stands reduced to ₹58,410.54 Lacs as against ₹62,153.05 Lacs. The fall in revenue has resulted in fall of EBIDA margin and as well as profit before tax and profit after tax level also. These untoward situations emerged during the year because of two challenges faced by the Company in its tempo of growth. Firstly, as you all are aware that December, 2015 was a year of very low winter and resulting thereof the stocks remain unsold with the franchisees and as well as Multi Brand Outlets (MBO). In the normal trend of our business this effects our sales for the immediately succeeding year. Besides, another blow to the growth rate of the Company was felt on demonetisation in the third quarter of financial year 2016-17, which accounts for our maximum sales i.e. approximately 60%. Needless to say that demonetization had the adverse effect across all the business and in particular affected grievously the consumer as well as retail business.

The above two factors resulted a blow like a heavy headwinds and thereby affecting the Company's top-line and bottom-line. However in the current year we expect to sail smoothly on the path of growth.

There was neither any issue of Equity shares with differential rights as to dividend, voting or otherwise nor grant of any stock options or sweat equity under any scheme during the year under review.

DIVIDEND

Based on the Company's performance, wherein, it has earned a Net Profit of ₹ 4,232.28 Lacs, your Directors are pleased to recommend a 100% dividend amounting to ₹ 10/- per Equity Share (Previous Year ₹ 10/-) of ₹ 10/- each for the approval of the members at the ensuing Annual General Meeting.

The final dividend on equity shares, if approved by the members would involve a cash outflow of ₹ 2,615.62 Lacs (including dividend tax of ₹ 442.41 Lacs).

TRANSFER TO RESERVES

The Company has earned a total Profit after Tax of ₹ 4,232.28 Lacs, out of which a sum of ₹ 1,269.68 lacs (30% of the profit after tax) has been transferred to Special Reserve maintained for the purpose of future expansions and acquisitions.

MANAGEMENT DISCUSSION & ANALYSIS REPORT

ECONOMY & INDUSTRY SECTION

INDIA ECONOMIC OVERVIEW:

Against the backdrop of robust macro-economic stability, the year was marked by two major domestic policy developments – the emboldened move to demonetise the two highest denomination notes of ₹1,000 and ₹500 in order to eliminate black money and the growing menace of fake Indian currency notes and the passage of the transformational Goods and Services Tax (GST). Demonetisation has impacted consumption and demand and it is not likely to persist for more time as the supply of new currency notes have been normalized. Demonetisation has had short term costs, but holds the potential for long term benefits.

The GST is aimed at creating a common Indian market, improve tax compliance and governance and boost investment and growth. It is also a bold new experiment in the governance of India's cooperative federalism. Follow-up actions to minimise the costs and maximise the benefits include: fast, demand-driven, remonetisation; further tax reforms, including bringing land and real estate into GST, reducing tax rates and stamp duties; and acting to allay anxieties about over-zealous tax administration. These actions would allow growth to return to trend in FY2017-18, following a temporary decline in growth in FY2016-17.

The Finance Minister in the Union Budget 2017-18 has made various announcements of providing relief to the middle class, providing affordable housing, curbing black money, digitalization of the economy, enhancing transparency in political funding and simplifying the tax administration in the country, thereby creating opportunities for improvement in economic growth as well as nation's long term growth. Number of foreign companies is setting up their facilities in India on account of various government initiatives like 'Make in India' and 'Digital India'. The Government aims to boost the manufacturing sector of Indian economy, to increase the purchasing power of an average Indian consumer, which would further boost demand, and hence spur development, in addition to benefiting investors.

Moreover the growth is expected to return in FY2018, as the impact of demonetisation is fully through. India's economy is expected to grow by 7.5% during FY2018 (IMF estimates), with inflation seen at 4.5%.

INDUSTRY OVERVIEW: APPAREL INDUSTRY

Apparel is the largest segment of the Indian Textile and Clothing Industry (IT&C); accounts for 60-65% of the total Industry. In developing countries like India, it is important to explore ways to boost the standard of living and reduce poverty. Government of India is increasingly focusing on policy to create jobs that are good for development. Further, Government of India recently announced ₹6,000 crore package for textile and apparel sector which includes additional incentives for duty drawback scheme for apparels, flexibility in labour laws and tax and production incentives to garment manufacturing units. This would also fuel the growth in the Indian garment sector. These attempts are also in line with government's vision to maximize the employment generation and value creation within the country under 'MAKE IN INDIA' campaign. However, India needs to adopt more favourable policies to increase market access, ease import barriers, improve export logistics, labour reforms and facilitate foreign investment.

With a good future of Indian textile industry as a whole, the retail sector has experienced a consistent growth with rise in disposable income. The organized apparel segment is expected to grow at a Compound Annual Growth Rate (CAGR) of more than 13 per cent over a 10-year period. *(Source: India Brand Equity Foundation)*

The growth in India's organised retail market has led to an increase in the sale of Branded apparels which is growing rapidly due to increased consumer spending, high brand consciousness, rising income and purchasing power, increasing number of dual income nuclear families, changing lifestyle and consumer behaviour. Organised retail is the most dynamic industry in India, representing a huge opportunity for the domestic market.

In the next few years, growth in the online purchase for the fashion category will be driven by a spurt of new shoppers as well as a maturing shopper base that spends a larger share of their fashion wallet online.

The key purchase triggers to this considerable change for online purchase are availability of larger varieties, deals and discounts and promotional material such as e-mails. However the new online shoppers will look beyond discounts. Consumers are increasingly spending more time on digital media for discovering latest trends, doing research, price comparisons etc.

REGION & PRODUCT WISE REVENUE BREAKUP

MCFL was initially launched as an exclusive woollen brand. The Company has a well diversified presence across various categories such as Cottons, Woollens, Home Furnishings and Kids etc. Currently, cotton wears contributes around ~58% of the Company's total revenues. Historically, the Company's presence has been strong in the Northern and Eastern regions of India. However, your Company remained focused on improving its presence in Southern and Western regions too by increasing the share of "all season" cotton product categories.

REVENUE * BREAKUP – REGION WISE

REVENUE * BREAKUP – PRODUCT WISE

Winter products are typically higher in value in terms of production cost as well as sales revenue. And hence, these generate higher revenue in comparison with our non-winter products. Our endeavour is to increase our share of all-season products with pan-India appeal in order to increase revenues in southern and western regions of India. This would enable generation of a faster pace of growth and reduce the seasonal impact. Our comprehensive portfolio of products and brands across varied price points enables us to cater to and target a wider and diversified customer base.

STRONG RETAIL & DISTRIBUTION NETWORK

As on March 31, 2017 Monte Carlo has presence across 26 states and 1 Union Territory through its network of 231 Exclusive Brand Outlets (EBOs), 2,300+ Multiple Brand Outlets (MBOs) and 198 National Chain Stores (NCS).

THE WAY FORWARD – FUTURE OUTLOOK

The Company’s future growth strategy is to focus on Cotton & Cotton-blended apparels and expansion of its retail distribution network. While we already have a pan-India presence, we seek to penetrate further in the western and southern regions of India with a comprehensive range of cotton and cotton-blended products catering to all seasons. Our aim is to focus on cotton and cotton-blended shirts, trousers, T-shirts and denims to expand our all-season product range and strengthen the pan-India operations.

We continue with our endeavour to build a leading branded apparel company. Over the years, we have successfully expanded our horizon and diversified our business operations. We have created a comprehensive range of woolens, cottons, cotton blended, knitted and woven apparels for Men, Women and Kids and under the umbrella brand Monte Carlo. We always believe that we have successfully positioned ourselves as a lifestyle brand with a well-diversified product offering. Now, we are planning to further expand our portfolio by diversifying into ‘Fitness and Fashion Wears’ with a name of ‘ROCK IT’, which we are launching shortly through online sales channels. We expect this new segment should bring meaningful contribution to our overall revenue in the coming years.

The Company has also established an e-commerce presence through its own portal “montecarlo.in” and by way of tie-ups with digital platforms such as Flipkart and Snapdeal, among others. With the online retail segment witnessing a rapid pace of growth, the Company endeavours to capitalise on this exciting new channel and gain by way of instant pan-India reach.

OPPORTUNITIES AND THREATS:

Opportunities:

Increase in Chinese apparel prices could provide higher demand for Indian Garments

During recent years, China has seen a sustained rise in its wage costs, which may lead to potential increase in its apparel prices. As a result, China is shifting its production base to higher value-added industries like electronics and curtailing low value-added production like textile and apparel. With expected reduction in China’s cost competitiveness and reduced focus on textiles, India has the chance of increasing its share in global apparel exports as well as increase in consumption of domestic products.

Increasing emphasis on cotton and cotton-blended apparel to tap Pan-India market

The Company is focussed on promoting and expanding sales of cotton apparels aggressively. This will enable the Company in tapping the entire Indian market, increasing the share of revenues significantly from southern and western regions in the long-term.

Increasing opportunity in domestic market

The growth in the organized retail market in India has led to increase in the sale of Branded apparel in the domestic market. The organized retail apparel market is growing rapidly due to increased consumer spending, high brand consciousness, rising income and purchasing power, increasing number of dual income nuclear families, changing lifestyle and consumer behavior. Organized retail in India is the most dynamic industry and represents a huge opportunity for domestic markets. Besides, the growing brand awareness and fashion consciousness, demand for superior quality and design is rising at a robust pace, that will held the organised players in increasing their market share in the years to come

Moreover, the growth in the organized retail industry is expected to pick up in next two years with increasing GDP per capita and the Indian apparel demand is at the cusp of significant growth.

Diversification across various Product Categories

We have diversified from being only woollen apparel company to different product categories such as Cottons, Cotton-Blended and Home Furnishing. It has a comprehensive product and brand portfolio catering to varied segments such as kids, youth, middle and senior. This is prevalent in both woollen and cotton & cotton blended apparels spread across varied price points, enabling them to service the economy and mid-premium to premium segments. The ability to tap varied segments of the market provides the Company with tremendous opportunities to grow at a brisk pace.

Consumption demand recovery

Post demonetization, normalcy is returning gradually in consumer-facing businesses, though sales are still down. Business houses are of the view that once the cash crunch improves, demand from the customers will return.

Embarking on journey to a cashless economy

Customers seem to be willing to alter their transaction habits and have started preferring cashless transactions. The willingness of customers to move to cashless transactions came as a positive surprise.

Awareness of Goods and Service Tax (GST)

GST awareness seems to be high among organized sector in comparison to the unorganized one. The Industry is of the view that GST could significantly impact the unorganized sectors, unless they will adapt the changes quickly. However, organized players very well expect to share the opportunities flowing from the unorganised to the organised sector.

Threats/ Concerns:

Rising competition among organised players

The size of the Indian apparel market and its inherent long-term growth potential makes it extremely attractive to branded players across the world. This has led to great deal of competition among the organised players to grab the largest share of the pie. With an increase in the number of international brands entering India and many looking to enter soon due to relaxed FDI rules in Indian Textile Sector, the competition is expected to intensify further.

Intense competition between established brands and private label brands

Industry is highly fragmented with the organised sector commanding much lesser market share as compared to the unorganised sector. Also low cost substitute products from sourced from the countries like Pakistan, Nepal and Bangladesh leads to reduction in demand of the existing products in the domestic market.

Key barriers for Online Channel

Low familiarity with website/ app and return policies are big concerns for first time shoppers, who thus prefer spending low amounts online. Hence, ensuring flexible payment options and smooth handling of returns /complaints is necessary to gain

the trust of a new shopper. Further, the lack of touch & feel and better offline prices (availability of cheaper options offline) are the key barriers for online purchase among the majority of small town shoppers.

INTERNAL CONTROL SYSTEM AND THEIR ADEQUACY

The Company is having an adequate internal financial control systems and procedures commensurate with the size of the Company. The internal Auditors regularly monitors and evaluate the efficiency and adequacy of internal control systems in the Company, its compliance with operating systems, accounting procedures and also ensures that the internal control systems are properly followed by all concerned departments of the company. Significant audit observations and corrective actions taken thereon are presented to the Audit committee of the Board.

HUMAN RESOURCE / INDUSTRIAL RELATION

The Company is of firm belief that human resource is the driving force that propels a Company towards growth and success. The Company is committed to the development of its people. The total permanent employee's strength of the Company was 1,656 as on 31st March 2017. The Industrial relations were cordial and satisfactory.

OPERATIONAL PERFORMANCE & FINANCIAL REVIEW

The Company operates in a one reportable business segment i.e. manufacturing and trading of textile garments. The revenue from operations of the Company for the financial year ended 2016-17 stood at ₹58,410.54 Lacs as against ₹62,153.05 Lacs. As a result, the Company's Earnings before Financial Charges, Tax and Depreciation & Amortization have decreased from ₹13,723.04 Lacs to ₹9,971.33 Lacs for the year under review. The detailed operational performance has already been discussed in the Director's Report under the Section 'Operational Review'.

During FY2017, Revenues were impacted due to demonetisation as the Company derives most of its revenues in the third quarter. To recover from lower sales in the third quarter, the Company started early discounts in the fourth quarter. This helped in reduction in working capital by ₹2,245.07 Lacs during the year, which is primarily due to a reduction in Inventory and Debtors.

The Company's overall debt (including Working Capital) reduced by ₹3,305.76 Lacs, leading to a debt equity ratio of 0.13x for FY2017. The Company enjoys a strong balance sheet with a net cash of ₹8405.38 Lacs. The Operating profit to cash flow conversion for the year remains strong with the initiatives on reducing the working capital requirement.

Annexure II to the Independent Auditor's Report of even date to the members of Monte Carlo Fashions Limited on the financial statements for the year ended 31 March 2017

Annexure II

Independent Auditor's report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (the 'Act')

1. In conjunction with our audit of the financial statements of Monte Carlo Fashions Limited (the 'Company') as of and for the year ended 31 March 2017, we have audited the internal financial controls over financial reporting (IFCoFR) of the Company of as of that date.

Management's Responsibility for Internal Financial Controls

2. The Company's Board of Directors is responsible for establishing and maintaining internal financial controls based on the IFCoFR criteria established by the Company considering the essential components of internal financial controls stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the 'Guidance Note') issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of the Company's business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditors' Responsibility

3. Our responsibility is to express an opinion on the Company's IFCoFR based on our audit. We conducted our audit in accordance with the Standards on Auditing ('Standards'), issued by the ICAI and deemed to be prescribed under section 143(10) of the Act, to the extent applicable to an audit of IFCoFR, and the Guidance Note issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate IFCoFR were established and maintained and if such controls operated effectively in all material respects.
4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the IFCoFR and their operating effectiveness. Our audit of IFCoFR included obtaining an understanding of IFCoFR, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.
5. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's IFCoFR.

Meaning of Internal Financial Controls over Financial Reporting

6. A Company's IFCoFR is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Company's IFCoFR includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

7. Because of the inherent limitations of IFCoFR, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the IFCoFR to future periods are subject to the risk that IFCoFR may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

8. In our opinion, the Company has, in all material respects, adequate internal financial controls over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2017, based on the IFCoFR criteria established by the Company considering the essential components of internal financial controls stated in the Guidance Note issued by the ICAI.

Leases where the lessor effectively retains substantially all the risks and benefits of ownership of the leased item, are classified as operating leases. Operating lease payments are recognized as an expense in the statement of profit and loss over the lease term on a straight line basis.

l) Impairment of assets

The Company assesses at each balance sheet date whether there is any indication that an asset may be impaired. If any such indication exists, the Company estimates the recoverable amount of the asset. If such recoverable amount of the asset or the recoverable amount of the cash generating unit to which the asset belongs is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognized in the statement of profit and loss.

If at the balance sheet date there is an indication that a previously assessed impairment loss no longer exists then the recoverable amount is reassessed and the asset is reflected at the recoverable amount subject to a maximum of depreciated historical cost.

m) Foreign currency conversion**Initial recognition**

Foreign currency transactions are recorded in the reporting currency, by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

Conversion

Foreign currency monetary items are reported using the closing rate. Non-monetary items which are carried in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction; and non-monetary items which are carried at fair value or other similar valuation denominated in a foreign currency are reported using the exchange rates that existed when the values were determined.

Exchange differences

Exchange differences arising on the settlement of monetary items or on restatement of the Company's monetary items at rates different from those at which they were initially recorded during the year/period, or reported in previous financial statements, are recognized as income or as expenses in the year/period in which they arise.

n) Accounting for taxes on income

The tax expense comprises of current taxes and deferred taxes. Current tax is the amount of income tax determined to be payable in respect of taxable income for a period as per the provisions of Income Tax, 1961. Deferred tax is the effect of timing differences between taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred tax assets are reviewed at each balance sheet date and recognized/derecognized only to the extent that there is reasonable/virtual certainty, depending on the nature of the timing differences, that sufficient future taxable income will be available against which such deferred tax assets can be realized.

o) Earnings per share

Basic earnings per share is calculated by dividing the net profit or loss for the year/period attributable to equity shareholders by the weighted average number of equity shares outstanding during the year/period. The weighted average number of equity shares outstanding during the year/period is adjusted for events of bonus issue and share split.

For the purpose of calculating diluted earnings per share, the net profit or loss for the year/period attributable to equity shareholders and the weighted average number of shares outstanding during the year/period are adjusted for the effects of all dilutive potential equity shares.

p) Provision and contingent liabilities

The Company creates a provision when there is a present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of obligation. A disclosure for a contingent liability is made where there is a possible obligation that arises from past events and the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or where reliable estimate of the obligation cannot be made.

q) Cash and cash equivalents

Cash and cash equivalents comprise cash and deposit with banks. The Company considers all highly liquid investments with a remaining maturity at the date of purchase of three months or less and that are readily convertible to known amounts of cash to be cash equivalents.
