In his address to the Members, the Chairman welcomed the members to the 12<sup>th</sup> Annual General Meeting of the Company and stated as follows:

### **QUOTE:**

"It is my privilege to welcome you all at the 12<sup>th</sup> Annual General Meeting of the Company. Necessary quorum for the meeting being present, I start the proceedings of the meeting.

The Directors' Report along with other statutorily required related papers and documents with respect to the year ended 31<sup>st</sup> March, 2017 are already with you for quite some time. With your permission, I shall take them as read.

The economic revival in the country started taking shape after a bountiful monsoon in 2016 on the back of consecutive droughts for two years. However, this was stymied by the effect of demonetisation of 86% of the currency in circulation during the third quarter of the financial year. There has been a severe impact of demonetization on the manufacturing sector, particularly textile, where large portion chain is in unorganized sector. The new Index of Industrial Production series shows the average rate of growth in manufacturing sector during December 2016 to March 2017 reduced to 1.6% compared with an average of 4.9% in December 2015 and March 2016. This growth was the lowest compared with same period over the last five years.

CHAIRMAN'S  
INITIAL

The challenging domestic business environment continued post-demonetisation well into Q4 of FY2017. Sutej could withstand the challenges and showed growth on a Y-o-Y basis in 2017. Our revenues increased by 8.50% while our profit after tax strengthened by 10.09%. This profitable growth represents validation of our strategic direction.

However, several indicators are pointing to a modest improvement in the macroeconomic outlook. Continued fiscal consolidation, inflation management along with consistent reforms push by Government continues to underpin macroeconomic stability. As per IMF, India's growth is expected to rebound to 7.2% in 2017-18 fiscal and 7.7% in 2018-19 after the distortion caused by demonetisation.

Changes in global economic, social and political environments are having a major impact on the textile industry. Manufacturing technologies are changing. Consumer trends are changing. With a rapidly growing middle-class in China, there is an increasing cost of doing business in China. The speed to market products has never been more important. Retailers are facing challenges from on-line shoppers. In this backdrop, developments in global and Indian economic scene become important.

**Global economic overview**

The global economy grew by 3.1% in 2016 and while growth was subdued during the first half of the year, there was a slight acceleration in the growth in the last quarter of 2016, fuelled by an improvement of conditions in the emerging markets and a stronger growth in the developed markets.

The global economy was subdued due to a variety of factors such as the Brexit vote, a still-inflamed Middle East and the election of Donald Trump in the US. Besides these political factors, the weather conditions were also challenging due to the El Niño effect which greatly affected the agricultural sector in many countries.

IMF estimates that the global economy would do better in 2017 and 2018. Growth rates are expected to pick up to 3.4% and 3.6% in 2017 and 2018 respectively. This projected pick-up in growth is to mainly happen due to the emerging market and developing economies (EMDEs). The EMDE growth was 4.1% in 2016 and it is expected to pick up to 4.5% for 2017 and further rise to 4.8% in 2018.

According to the World Bank's report Global Economic Prospects, the growth in the global trade has been the weakest in 2016 ever since the 2009 global crisis. Factors that caused this slowed trade growth are:

- Cyclical drawdown of the inventories of developed economies.
- Imports fell during the year. This fall was mainly driven by China and other commodity exporters.
- Global investments were subdued which led to slowed global trade

Other factors that influenced world trade were liberalisation and protectionism, which held back trade growth but have had a limited impact. The rapid growth of China's middle class has led to an increased cost of conducting business in China. The speed to market the products has never been more important and retailers are facing the heat, especially from online consumers. China's domestic demand will surpass its exports. On the supply front, China will face incremental costs in manufacturing processes which will hinder its growth leading to a decline in its overall global share of trade. According to Retail experts, retailers across the world will have to face challenges of consistent discounts and novelty for customers.

For the coming year, the WTO has forecast a slight improvement in the scenario. All of its trade-related indicators including air freight, automobile sales, export orders and container shipping have registered a robust growth in the first couple of months in 2017, which suggests that the first quarter of 2017 would see a trade growth strengthening.

CHAIRMAN'S  
INITIAL

As global activity picks up its pace from the subdued performance of last year, there would be increased investments and gradual normalisation of the stressful macroeconomic conditions in some countries, leading to an improvement of the trade conditions.

**Indian economic overview**

India is one of the largest producers of textiles and garments and is the world's second largest producer of textiles and garments. The textile industry made a major contribution to the national economy in terms of direct and indirect employment generation and net foreign exchange earnings. The sector's contribution to the industrial production is at 14 %, 4% to the gross domestic product (GDP) and 10.1% to the country's export earnings. The industry is the second largest employer after agriculture, providing employment to over 45 million people directly. The close linkage of the textile industry to agriculture (for raw materials such as cotton) makes the Indian textiles sector unique in comparison to those of other countries. The Indian textile industry accounts for 24% of the world's spindle capacity and 8% of global rotor capacity. Thus, the growth and all round development of this industry has a direct bearing on the improvement of the India's economy.

The Central government has taken many steps to attract domestic and foreign investments with a strong focus towards promoting the "Make in India" initiative. GST implementation is a major step taken by the Government of India. The immediate impact of GST might be little disruptive and may impede the growth in the short term as big companies reorganize their businesses with small firms losing revenue, but in the long run it will surely facilitate ease of doing business in India. GST will bring more transparency in the industry as companies will now insist vendors and suppliers furnish invoices as GST will make it impossible for firms to evade taxes. Big companies stand to benefit as they have a supply chain in order and can offset taxes paid on inputs. Smaller firms may end up spending more as compliance cost will rise.

We believe that the future of the Textile Industry in India is very bright as it is very dynamic being linked to both fashion and agriculture in a very tactical manner. Rising incomes very naturally result in larger spends as people have become more conscious of leading and maintaining better lifestyles. The global apparel consumption will increase from US \$1.7 trillion in 2015 US \$2.6 trillion by 2025. The apparel market size of India was around US \$59bn in 2015 and is projected to grow at US \$180bn, which will give tremendous potential to the growth of the textile business in the domestic as well as international markets. India has the capacity to compete with European and US markets if the concerned authorities are able to establish trust and create a feasible environment to conduct business on feasible terms, and focus on long term profits instead of quick returns.

**Sutlej's performance**

Over the last few years, Sutlej has begun to achieve what it always professed: that the company would report margins, profits and capital efficiency higher than the industry average, coupled with relative insularity, whereby our decline during sectoral troughs would be less than the others in the conventional market space. The strategic shift in direction made by the company in the last few years stands resoundingly validated as Sutlej is no more a mere commodity supplier but a differentiated textile solution provider – a company that conjures up a number of diversely challenging variables to outperform and enhance shareholder value.

CHAIRMAN'S  
INITIAL

During the Financial year, the company had also completed capacity addition by 35,280 spindles in RTM. In DGHT with our new capacity the total capacity has reached to 9 million meters. Both new capacity additions are now operating at its optimum utilization. We are also looking at capacity addition in BTM by Q4 of 2019. Recognizing that capacity increase would alone not be enough, we reckoned that a churn in our yarn manufacturing capacity towards value-added yarn varieties would be in order. Accordingly, the Company increased the proportion of spindles dedicated to cotton blended and cotton mélange dyed yarns from 23% in 2011-12 to 35% in 2016-17, whereby the proportion of revenues derived from these premium yarns shall also increase.

Our strategy has provided adequate de-risking: we work with almost 300 active products; this basket comprises a mix of nascent as well as mature products; we work with diverse downstream spaces (knitting, weaving, home applications, industrial and miscellaneous) that liberate us from an excessive dependence on any one space; we are present in more than 60 countries, adequately de-risking geographical concentration. We enjoy average realizations higher than the benchmark of the conventional sectoral terrain; we have established formidable cost leadership and we enjoy attractive pricing power in specific products. Our strategic long-term consistency is visible in our numbers: during the five years ending 2016-17, the aggregate EBITDA of the last five years was an attractive close to Rs. 1200 crores that ensured periodic reinvestment and capital rejuvenation.

#### Road ahead

Global recovery is still slow and getting increasingly differentiated across regions. For most emerging market economies, macroeconomic conditions remain challenging due to domestic fragilities, exacerbated by bouts of financial turbulence.

On the domestic front, industrial production has been recovering, but sustained weakness in consumption, especially in the rural areas, continues to operate as a drag. Exchange rate fluctuations could also spike up inflation. Nevertheless, India remains one of the brightest spots in the world economy and has even surpassed China. The macro economic situation in the country is expected to improve considerably in the coming years owing to various policy initiatives mentioned above.

Though the present industry scenario is challenging, Suttlej expects to sustain its growth momentum on the back of various initiatives taken in the past and lined up for the coming years. India's growth is imminent and your Company is well-placed to seize this opportunity when it transpires. I must assure shareholders that our relative strength at a time of sectoral weakness provides an insight into our competitive position and the fact Company is indeed placed at an attractive inflection point. If this is how we performed during the deep end of a sector downtrend, then I am robustly optimistic of our prospects when the sector rebounds.

As our investments translate into timely project commissioning across the foreseeable future, we expect to report higher revenues, superior margins and increased surpluses that graduate us into the next growth orbit.

CHAIRMAN'S  
INITIAL

**Appreciation**

Despite the inherent cyclicity associated with the business, the Company posted substantial growth in terms of revenues as well as profits in the last year. On behalf of the Board of Directors and on my behalf, I would like to express my sincere appreciation for the continued co-operation and support confidence reposed in the Company by all the stakeholders including bankers and shareholders. I would also like to express my sincere appreciation of the dedicated services rendered by the officers, staff and workers and their contribution towards the successful performance of the Company during the year. Thank You!"
