Tata Communications teams up with Oracle to drive digital transformation for global enterprises

Tata Communications' IZO™ Private Connect overcomes the limitations of the public Internet by providing enterprises from 150+ countries dedicated and private connectivity to Oracle Cloud

London, UK - January 30th 2018 - [Tata Communications](#), a leading provider of network, cloud and security services, today announces that it has collaborated with [Oracle](#) to offer enterprises from more than 150 countries dedicated and private access to Oracle Cloud, helping them innovate through new services and business models and drive their digital transformation on a global scale.

Through this collaboration, enterprises worldwide will be able to access the Oracle Cloud Infrastructure via the [FastConnect](#) service using Tata Communications' [IZO™ Private Connect](#). The combination of IZO™ Private Connect and FastConnect allows enterprises to bypass the public Internet altogether and provide employees with more reliable, seamless access to data and applications using their WAN. With 10 Gbps connectivity, IZO™ Private Connect ensures a predictable and consistent end-user experience for bandwidth-intensive applications regardless of location or device, while helping to safeguard businesses against external threats.

“Customers require seamless connectivity from their data centers and networks to Oracle Cloud for their most demanding workloads and applications,” said **Don Johnson, Senior Vice President Product Development, Oracle Cloud Infrastructure**. “With the FastConnect service, customers can provision the dedicated and private connections they need today and easily scale with their growing business demands.”

“As organisations become increasingly dependent on the cloud and the threat of cyber-attacks continues to grow, our customers need a network that gives them ubiquitous, secure access to data and applications,” said **James Parker, Chief Revenue Officer, Tata Communications**. “Our collaboration with Oracle is part of our mission to give our customers the connectivity they need to harness the power of the cloud to boost employee productivity, drive digital transformation and expand into new markets.”

Through global agreements with Oracle, Amazon Web Services, Microsoft Azure, Office 365, Google Cloud Platform, Salesforce and Alibaba Cloud, IZO™ Private Connect gives enterprises high-performance connectivity to the world's biggest clouds. The service is uniquely engineered for predictable routing, with Ethernet connectivity to Tata Communications' points of presence and across 110+ third party data centres globally.

“Selecting the right technology partners in network and cloud services is the number one priority for enterprises with next-gen network transformation programmes,” said **David Molony, Practice Leader, Network and Cloud Services, Enterprise, Ovum**. “Our recent user survey shows that enterprises rate cloud services integration as the single highest benefit of hybrid WAN evolution.”

IZO™ Private Connect is part of Tata Communications' [IZO™](#) cloud enablement platform, underpinned by the company's global network and partnerships. This platform also includes [IZO™ Internet WAN](#), [IZO™ Hybrid WAN](#) and [IZO™ SDWAN](#), which bring increased resilience, performance and cost-efficiency to enterprise networking, as well as [IZO™ Private Cloud](#), which enables CIOs to create a hybrid IT environment that combines the flexibility of public cloud with enterprise-grade security.

Forward-looking and cautionary statements

Certain words and statements in this release concerning Tata Communications and its prospects, and other statements, including those relating to Tata Communications' expected financial position, business strategy, the future development of Tata Communications' operations, and the general economy in India, are forward-looking statements. Such statements involve known and unknown risks, uncertainties and other factors, including financial, regulatory and environmental, as well as those relating to industry growth and trend projections, which may cause actual results, performance or achievements of Tata Communications, or industry results, to differ materially from those expressed or implied by such forward-looking statements. The important factors that could cause actual results, performance or achievements to differ materially from such forward-looking statements include, among others, failure to increase the volume of traffic on Tata Communications' network; failure to develop new products and services that meet customer demands and generate acceptable margins; failure to successfully complete commercial testing of new technology and information systems to support new products and services, including voice transmission services; failure to stabilize or reduce the rate of price compression on certain of the company's communications services; failure to integrate strategic acquisitions and changes in government policies or regulations of India and, in particular, changes relating to the administration of Tata Communications' industry; and, in general, the economic, business and credit conditions in India. Additional factors that could cause actual results, performance or achievements to differ materially from such forward-looking statements, many of which are not in Tata Communications' control, include, but are not limited to, those risk factors discussed in Tata Communications Limited's Annual Reports. The Annual Reports of Tata Communications Limited are available at www.tatacommunications.com. Tata Communications is under no obligation to, and expressly disclaims any obligation to, update or alter its forward-looking statements.
