Solix Partners with NTT DATA to Deliver AI-powered Data-driven Finance Solutions

October 09, 2018 — Santa Clara, Calif. — Solix Technologies, Inc. (www.solix.com), a leading big data application provider for empowering data-driven enterprises, today announced a partnership with NTT DATA Services (www.nttdataservices.com), a recognized leader in global technology services, to provide comprehensive, intelligent, data-driven finance and data management solutions.

NTT DATA will offer its clients Solix Data-driven Finance solutions: the Solix Common Data Platform (CDP), Emagia Digital Order-to-Cash solutions, and the Solix Enterprise Data Management Suite (EDMS). These additions to NTT DATA's portfolio help further enable digital transformation by empowering clients with enterprise finance data lake, advanced analytics and intelligent automation, data archiving, data masking, test data management, and application retirement.

According to the July 2018 Forrester report, *Digital Transformation Demands A New Automation Framework*, "Forrester predicts that automation technologies will take center stage in [CIOs'] digital transformation strategies and budgets in 2018 and beyond."

The Solix Data-driven Finance solutions give CFOs and finance and accounting shared services teams the power to amplify efficiency in the enterprise through a suite of next generation big data platforms, advanced analytics hubs, data-driven process automation tools, and a cognitive digital assistant focused on helping finance executives and staff. Solix Data-driven Finance solutions leverage artificial intelligence to transform the finance operations such as the entire order-to-cash process — including credit, order entry, invoice presentment and payment, collections, deductions, cash application, and cash forecasting processes — for boosting cash flow, compliance, cost, control, and customer engagement.

"Digital infrastructure with data management, advanced analytics and artificial intelligence is essential for finance shared services to be future-ready. With NTT DATA's vision for the digital enterprise coupled with our AI-powered Solix Data-driven Finance solutions, our joint customers can stay ahead with highly efficient digital finance services," said Veena Gundavelli, Founder & CEO, Emagia Corporation.

"We partnered with Solix as part of our continued commitment to provide innovative solutions that advance our clients' digital journeys. Its autonomous cognitive solution for digital finance business process operations complement our strong industry knowledge and solutions to create strong tactile offerings to our clients," said Prasoon Saxena, Senior Vice President, Manufacturing Business Unit, NTT DATA Services, LLC.

D. G. S. Saxena

"We are excited to work with NTT DATA to provide the next generation of enterprise data management solutions to its customers around the world," said John Ottman, Executive Chairman, Solix Technologies, Inc.
