Media Release

Sayaji Industries commences new state-of-the-art Dextrose Monohydrate Plant

- The Company increased manufacturing capacity of dextrose monohydrate to 60 tons per day from existing 10 tons per day
- The Company has invested Rs. 40 crore in the new plant, which is expected to improve profitability and margins substantially

Ahmedabad, November 12, 2018:

Sayaji Industries Limited, the flagship company of the Sayaji Group, has commenced its new state-of-the-art Dextrose Monohydrate plant. The Company has increased installed capacity to manufacture Dextrose Monohydrate to 60 Tons/ Day from existing 10 Tons/ Day through new plant at existing location. The Company has invested around Rs.40 crore in this plant.

Dextrose Monohydrate being value added product, this addition to capacity is expected to improve the bottom line of the company substantially. This capacity would enable the company to cater to increasing demand of Pharmaceutical and FMCG Companies using this product.

Dextrose is widely used for canned and ready-made foods, confectionery, dairy products, carbonated beverages, canned fruits, meat products, jam and jellies etc.

About Sayaji Industries Limited (www.sayajigroup.in)

Founded in 1941 Sayaji Industries Limited, through its flagship unit Maize Products, is a pioneer in the corn wet milling business and is one of the largest exporters in the starch industry. Since more than seven decades, the Group is into manufacturing of modified starches and other derivatives like liquid glucose, dextrose monohydrate, dextrose anhydrous, sorbitol etc and is amongst the front runners in the corn wet milling business. The flagship unit Maize Products caters to several industries including textile, food & beverage, paper, paint, pharmaceutical, and confectionery.
