Nucleus Software launches latest version of Transaction Banking Solution; Introduces Trade Finance Portal

- *Offers end-to-end digitization for corporate banks*
- *Improves working capital management for corporate customers*
- *Streamlines regulatory compliance for Malaysia and India*

New Delhi, India, March 21, 2018: Nucleus Software, the leading provider of lending and transaction banking solutions to the global financial services industry, today announced the latest version of its transaction banking solution called FinnAxia 5.0 and introduces Trade Finance portal.

According to a recent report, Fortune 500 companies incur more than \$81 billion of unnecessary supply chain and working capital costs each year due to inefficiencies and lack of visibility in trade finance. Digitization has the potential to overhaul trade finance by enabling the convergence of physical, financial and document chains, providing complete visibility of the supply chain and automating key processes such as - document evaluations, due-diligence checks and the generation of purchase orders and invoices.

FinnAxia 5.0 includes a newly launched Trade Finance Portal and which would help corporate customers with a single, global view of their trade finance business. This will reduce the risk of fraud and will also enable the bank to make faster and more efficient financing decisions. FinnAxia 5.0 also comes with comprehensive cash management features to ensure working capital optimization for the bank's corporate customers. The solution also allows the corporates to define their own liquidity structures and visualize the prospective outcomes graphically.

With a constant emphasis on ensuring compliance to regulations, the new release of FinnAxia comes with the International Transaction and External Position System (ITEPS) to achieve payments compliance in the Malaysian market and also offers India-based NPCI compliant Direct Debit Mandate capabilities via both physical and electronic forms.

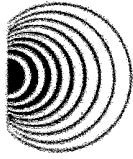

With FinnAxia 5.0, corporate banks can capture new business opportunities, enable working capital management for their corporate customers and ensure compliance with new regulations in the transaction banking space.
