EXPLANATION (RECONCILIATION) OF TRANSITION TO INDIAN ACCOUNTING STANDARDS (IND AS)

- a) Under Indian GAAP, long-term investment in equity shares are carried at cost, unless there is a diminution in value, other than temporary. Under Ind AS, investment in equity shares classified as 'Fair value through other comprehensive income' are measured at fair value at each reporting date. The subsequent changes in the fair value of such investments are recognised in other comprehensive income. Further, gains or losses recognised in other comprehensive income are never reclassified from equity to statement of profit and loss.
- b) Under Indian GAAP, current investment in mutual funds are measured at cost or net realisable value, whichever is lower.
- c) Under Indian GAAP, actuarial gains and losses and return on plan assets on post-employment defined benefit plans are recognised immediately in statement of profit and loss. Under Ind AS, Remeasurements which comprise of actuarial gains and losses, return on plan assets and changes in the effect of asset ceiling, if any, with respect to post-employment defined benefit plans are recognised immediately in other comprehensive income (OCI). Remeasurements recognised in OCI are never reclassified to statement of profit and loss. Further, gratuity provision is remeasured as per Ind AS and provided for in the comparative periods.

Under Ind AS, interest expense/income on the net defined benefit liability/asset is recognised in the statement of profit and loss using the discount rate used for defined benefit obligation as compared to the expected rate used for recognising income from plan assets under the Indian GAAP.

- d) On transition to Ind AS, the Company has recognised provision of loss allowance on trade receivables measured at amortised cost based on the expected credit loss model as required by Ind AS 109. Consequently, trade receivables measured at amortised cost reduced with a corresponding decrease in retained earnings on the date of transition.
- e) Under Indian GAAP, deferred taxes are recognised using income statement approach i.e. reflecting the tax effects of timing differences between accounting income and taxable income for the period. Under Ind AS, deferred taxes are recognised using balance sheet approach i.e. reflecting the tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes using the income tax rates enacted or substantively enacted at reporting date. Also, deferred taxes are recognised on account of the above mentioned changes explained in notes (a) to (c), wherever applicable.
- f) Under Indian GAAP, government grant received from the state government for gross capital investment in fixed assets is credited to Capital Reserve. Under Ind AS, there is no grant in the nature of capital grant and hence the government grant should be shown as a deferred income balance. But since all the assets pertaining to the grant have been fully depreciated as of now the government grant will be completely transferred to
- g) Under Indian GAAP, excise duty is reduced from gross revenues to report revenues net of excise duty. Under Ind AS, revenue includes gross inflows of economic benefits received by a company for its own account. Excise duty collected, which is a duty on manufacture and a primary obligation of the manufacturer is considered as revenue with the corresponding payments to Government as expenditure. This adjustment does not have any impact on statement of profit and loss.
- h) Under Indian GAAP, proportionate consolidation approach was used for Joint Venture. Under Ind-AS, Joint Venture is consolidated using equity accounting method.
