Pharma exports make up for slowdown in North America

BV MAHALAKSHMI Hyderabad, May 4

PHARMACEUTICALS **EXPORTS** witnessed a turnaround in the last few months, with Europe and other key mar-

kets gaining traction and making up for slowdown in North America, said Ravi Uday Bhaskar, director general of the Pharmaceuticals Export Promotion Council of India (Pharmexcil). After remaining in the nega-

tive territory for the first five months of 2017-18, pharma exports have been increasing year-on-yearbasis since November 2017 despite slowdown in the US because of various factors. Though the cumulative 14%, since November 2017.

data for 2017-18 show a modest 2.91% growth to \$17.27 billion from \$16.78 billion in 2016-17, annualised shipments have been increasing at a sharper rate, between 7% and

The US and the entire North America is the key market for the Indian pharmaceutical industry. It contributes over 31% to total exports. The CIS region has topped the list by expanding 17%, though the

base is low. "Both formulations and bulk drugs, which together account for over 90% of pharma exports, have shown a sharp turnaround, being led by several important markets including Europe,"Bhaskar said.

The generic industry constitutes 28% of the total pharma market. It is growing at a CAGR of 4-5%. The generic market in 2015 saw two blockbusters going off-patent, contributing to its size in terms of volume, and to

an extent by value too. Though it is unlikely that any such blockbuster drug will go off-patent in the next two-three years, various initiatives of governments would result in an increase in consumption of medicines.
