Company Secretary

ELECTROSTEEL STEELS Vedanta deposits ₹5,320 cr upfront in escrow account

VEDANTA ON MONDAY said it has deposited an upfront amount of ₹5,320 crore in the escrow account of Electrosteel Steels (ESL) to hold 90% of the paid-up capital of the insolvent company.

The move follows the National Company Law Appellate Tribunal's (NCLAT) ruling that it can make the upfront payment to lenders for its proposed acquisition of the debt-laden steelmaker. In a stock exchange filing, Vedanta said, "The consideration is in the form of cash which has been deposited in an escrow account and thereby management control of ESL has been taken by the company."

VEDANTA HAS DEPOSITED AN UPFRONT AMOUNT OF ₹5,320 CRORE IN THE ESCROW ACCOUNT OF ELECTROSTEEL STEELS (ESL) TO HOLD 90% OF THE PAID-UP CAPITAL OF THE INSOLVENT COMPANY.

The move follows the NCLAT's ruling that it can make the upfront payment to lenders for its proposed acquisition of the debt-laden steelmaker. In a stock exchange filing, Vedanta said, "The consideration is in the form of cash which has been deposited in an escrow account and thereby management control of ESL has been taken by the company."

NCLAT said any resolution of Electrosteel Steels will be subject to its final order in the case where Renaissance Steel India (RSIPL)—another bidder for Electrosteel's lenders would refund the money to Vedanta if the final order goes against it. The NCLAT had, on May 17, admitted RSIPL's petition challenging Vedanta's eligibility.

Power stations within 20 km of mines should take coal only by road: CIL

PRESS TRUST OF INDIA Kolkatta, June 4

COAL INDIA ON Monday said it wants power plants situated within 20 km from pit-head of coal mines to take their entire coal requirement only by road from this fiscal.

CIL has requested the ministry of power to prevail upon the power plants situated within 20 km of coal mines to lift their entire requirement by road mode from 2018-19 onwards, the PSU said in a statement. This will increase availability of rakes for movement of coal to power plants located far from the mines.

CIL and railways through their coordinated efforts have increased rail loading from CIL's own sidings to sustain the spurt in demand from the power sector.

CIL said it has loaded 243 rakes per day during April-May registering an increase of 23 rakes over the movement during the corresponding period last fiscal.

Besides enhancing dispatches through rail mode, power stations within the vicinity of 50-60 km of the mines having PSA are being offered coal through road and rail-cum-road mode to be lifted by their own transport for further augmenting the dispatch.

Coal India has ramped up dispatch at the Dabri and Badarpur power plants located in the Jharkhand region to meet the sudden demand. CIL is now supplying at least 10 rakes of coal per day as against the requirement of 7 rakes to mitigate the immediate spurt in power demand in the region, the statement said.

Greenko Energy to buy Orange Renewables for \$922 million

FE BUREAU Hyderabad, June 4

RENEWABLE ENERGY COMPANY Greenko Energy has signed a definitive agreement to acquire AT Capital-backed Orange Renewables, Singapore, for a total enterprise value of \$922 million. The deal comprises 907 MW of solar and wind assets and pipeline assets of over 500 MW.

Besides, the company also announced its decision on a primary equity raising of \$447 million from an affiliate of GIC and an entity that is wholly-owned by the Abu Dhabi Investment Authority (ADIA). "The proposed acquisition of Orange Renewables assets is expected to increase capacity, expand competitive energy, drive overall earnings growth potential for Greenko and its stakeholders. Indian energy market is transitioning from deficit markets to demand-driven contracts requiring flexible, flexible and cost-competitive energy. Greenko is focusing in building integrated renewable energy assets with storage to address these markets by competing with conventional energy assets like thermal in quality, quantity and cost," Anil Chakrabarti, managing director and CEO, Greenko said in a statement.

Following the deal, the company will add about 907 MW operating and near-completed assets to Greenko's existing portfolio over 3 GW operational capacity, taking the overall operational capacity to about 11 GW, clearly establishing leadership position in the Indian renewable energy sector. The deal is accretive to Greenko's Ebitda upon closing, approximately \$130 million

accretive in the first full year after close, with additional accretion and growth anticipated thereafter. Greenko is focused on building utility scale assets with them being diversified on the basis of risk, geography and technology. It intends to increase the installed capacity by developing and building new greenfield assets as well as making selective acquisitions which enhance shareholder value. Greenko has achieved 3000 MW of operational portfolio and over 7 GW under-construction capacity and is well-funded to grow into a multi-gigawatt portfolio over the next few years.

Bollywood streaming service looks past Netflix model for growth

BLOOMBERG Mumbai, June 4

SHENAROO ENTERTAINMENT HAS transitioned from renting DVDs to streaming movies online — while the business model move may seem to mirror the local and international rivals, it doesn't seem to be pigeonholed as an Indian Netflix. Shemaroo holds the rights to 3,500, mostly older Bollywood films, through which it earns TV licensing fees as well as advertising revenue from nearly 40 YouTube channels. While the Mumbai-based company is planning to start its own streaming application in the next six-to-nine months, throwing it into competition with Netflix and at least six other local and international rivals, it doesn't see this as its endgame.

Shemaroo has outperformed key gauges since listing on the stock exchange in February 2015. It has grown its revenue by 100% in the last five years, according to the company. "We have gone through the whole investment phase over the last four to five years and are sitting on a good size of content library," he said.

"Given the opportunities that exist in the market, we want to grow our revenue fivefold in five years," Hiren Gada, the company's chief executive officer, said in an interview in Mumbai. "The best way to play the digital boom is to offer services on all platforms in all forms."

Shemaroo aims to grow its movie catalogue 3-5% every year, and is looking to license out its library to other online platforms. While Gada said the company may produce content, he declined to comment on content and online platform maintenance as a key differentiator between its planned app and Netflix.

India's media and entertainment market is estimated to expand to more than ₹2,00,000 crore (\$30 billion) by 2020 from ₹1,50,000 crore in 2017, buoyed by robust growth in digital formats, according to a report by Ernst & Young in March.

With its popularity of about 1.3 billion, India is among the most important markets for Netflix, which had 5 million subscribers as of December 31. The country's online media boom has also drawn Amazon.com and Viacom, among others.

"Competition will be a key challenge for Shemaroo," said V Harini Priya, an analyst at Fintcall India Equity Advisors in Hyderabad. Still, the company has "a huge opportunity," says Priya, who offers an overweight recommendation on the shares.

Shemaroo's annual revenue has risen by an average of about 18% over the past five years, helping its share price triple since its October 2014 listing. Digital media revenue for the company's latest quarter jumped 41% to ₹1,30,000 crore, with average daily hits on its YouTube channels surpassing the 20-million mark.

"Over the next 12 to 18 months, we will be looking to monetise our current cat-
