Company Secretary

## Cyberinc, An Aurionpro Company, joins HPE Complete Program

Elevated Partner status empowers HPE Customers to acquire Cyberinc's cybersecurity solution directly.

13<sup>th</sup> June 2018, Mumbai

Cyberinc, An Aurionpro Company, a leader in isolation based cybersecurity, helping businesses actively reduce attack surface and protect themselves against web malware, today announced that it has joined Hewlett Packard Enterprise's HPE Complete Program. Businesses worldwide and specifically, HPE's customers can acquire Isla directly from HPE and its global reseller network.

Cyberinc's Isla is a ground breaking cybersecurity solution that helps leaders in Information Security, IT and Risk Management eliminate the biggest threat vector they face today: web-based malware attacks. Isla isolates all web malware outside the corporate network and protects emails, documents, and web against malware based attacks, truly securing the network and improving IT productivity. HPE Complete program offers a one-stop solution for purchasing best-in-class cybersecurity products. Cyberinc's Isla comes prevalidated for performance, and interoperability with other HPE hardware already present within an enterprise.

Romi Randhawa, Chief Strategy Officer, Cyberinc, said, "Hewlett Packard Enterprise (HPE) is an established leader across all key hardware segments in the data center including security. With this agreement, we are deepening HPE's stack to provide security solutions on their cutting edge next generation products. With Cyberinc's Isla now available as part of the HPE stack, customers can truly enjoy the benefit of a truly secure network, while reducing the attack surface against web-based malware attacks."

### The changing cybersecurity landscape

Digital technologies, whilst they unlock new capabilities and efficiencies, have proved to also increase vulnerabilities to cyberattacks. Organizations continuously invest in the latest cybersecurity software, training, and staff or in upgrading their detection technologies with advanced capabilities. No amount of spending on detection based defences will shield a company completely from hackers. It is time for another approach. It is time to stop detecting and start isolating. Gartner estimates that by 2021, 50% of enterprises will leverage isolation to reduce the impact of attacks, up from less than 5% in 2016. Cyberinc's Isla is the most secure Isolation solution and the only appliance that fully eliminates any active code from the Internet from even entering the network.

"The pace of digital transformation has created a world of automation, cloud, storage and networks that is more complex than ever before. We believe, CISOs and CIOs need to make the shift from a cycle of detection & response to a proactive strategy of isolation.", said Samir Shah, CEO, Cyberinc, "Cyberinc's Isla is the most secure Isolation solution available. With inclusion as a HPE Complete Partner, we look forward to working with their sales force and global distribution network to help HPE's customers enjoy the benefit of a truly, secure and protected business."

## Value Driven Resell Collaboration

The HPE Complete program enables HPE customers to purchase third-party products with proven interoperability and reliability for a complete, validated solution, all via one HPE purchase order. A worldwide resell model, HPE Complete program is focused on providing customers with a broader portfolio and choice of products that complement and complete existing HPE Solutions. All partner solution offerings within the Complete program undergo a rigorous testing process to ensure frictionless interoperability with HPE products.

Marty Lans, General Manager - Storage Connectivity, Interoperability & HPE Complete, said, "I am delighted that Cyberinc is now a HPE Complete Partner. Cybersecurity is a top priority for businesses and Cyberinc's Isla solution is a game changing innovation that can help, HPE's customers to fully secure themselves against web malware. Cyberinc's Isla leverages our Gen10 Servers and will be a strong addition to our solution stack for storage and security."

## About Cyberinc

Cyberinc, is an innovative cybersecurity company that protects enterprises against sophisticated web malware attacks. Its flagship offering, Isla is a tightly integrated scalable security product that leverages path-breaking isolation technology to ensure complete web-freedom, reduce attack surface and improve IT productivity. Headquartered in San Ramon, California, Cyberinc has been named as a Gartner Cool Vendor.
