ABBOTT INDIA

HELPING PEOPLE LEAD THE BEST LIFE THROUGH GOOD HEALTH

Abbott India, part of Abbott's Global Pharmaceutical business, is one of India's most admired and fastest-growing pharmaceutical companies.

We, at Abbott India, provide consumers with market-leading, trusted, global and local products across various therapeutic categories such as Women's Health, Gastroenterology, CNS, Metabolics, General Care, Vitamins, Vaccines, etc.

WHAT MAKES US UNIQUE?

IN INDIA, FOR INDIA

Our products are manufactured in India and also sourced from local third-party manufacturers in India. We have a manufacturing facility at Goa and are engaged with over 40 third-party manufacturers in India.

LOCAL R&D FOR LOCALIZED SOLUTIONS

Our in-house development and medical teams work passionately to advance health by addressing the country's unique challenges. We launched over 65 new products during the last five years for meeting the increasing healthcare needs of society.

EXPANSIVE HEALTH NETWORK

Our mission to enhance the health and well-being of Indians extends beyond our products to innovative methodologies and platforms across distribution channels. Through the distribution network of over 25 carrying and forwarding service providers and hubs, we reach out to millions of Indians.

A LEGACY OF EXCELLENCE

From creating an excellent workplace to making a positive impact on the health of people, we are proud of the work we do in India with the help of over 3,300 talented people.

CHAIRMAN'S MESSAGE

A HOLISTIC APPROACH TOWARDS
GROWTH, DEVELOPMENT, HEALTH
AND WELLNESS

We, at Abbott India, are redoubling our efforts to make quality branded pharmaceutical products accessible to more people in the country. We launched 21 new products this year and are gearing up to introduce over 100 new products in the next five years. Our efforts to spread education and awareness about various diseases are also intensifying. Our knowledge sharing initiatives with Healthcare Professionals - doctors, medical fraternities and pharmacists - are also expanding. Our commitment to helping people unlock life's possibilities through the power of health - reflected in LIFE. TO THE FULLEST. - is a commitment that is intrinsically aligned with a prosperous and healthy India.

MUNIR SHAIKH
Chairman

Dear Shareholders,

We, at Abbott India, have always worked with a dual focus – The first is our mission to help people lead healthier and better lives and the second is to continuously reward our shareholders by excelling in our financial and business performance. Your Company successfully accomplished both these objectives. Once again, we achieved a remarkable Sales growth of 12.8% over the prior year, which was 1.6 times# the market growth.

As I look back, this was a landmark year for economies across the globe and India. As per the IMF, the world economy posted a growth of 3.8% in 2017, with a notable rebound in global trade. At US \$2.6 trillion, the Indian economy became the sixth largest in the world. The country is well positioned to accelerate its growth to 7.4% in the current fiscal and to 7.8% next year, as it recovers from the twin impacts of demonetisation and GST roll out.

The Indian Pharmaceutical Market is estimated to be about 3.3% of the global Pharmaceutical Industry in value and 10% in volume. This is expected to grow to US \$55 billion by 2020, thereby emerging as the sixth largest pharmaceutical market globally.

The Government of India has taken significant steps towards the promotion of this industry in India. ‘Pharma Vision 2020’ aims at making India a global leader in end-to-end drug manufacture. Approval time for new facilities has been reduced to boost investments. The single-window facility has been announced to expedite new drug approvals and is expected to give a push to the “Make in India” initiative.

During the year, all our business units performed well and contributed to the overall success of the Company. Eight out of our top ten products remained at No 1* in their respective therapy segments and these ten products contributed to over 70% of the core business.

Your Directors have proposed a final dividend of ₹50 and special dividend of ₹5 per equity share of ₹10 each for the year ended March 31, 2018.

We, at Abbott India, are redoubling our efforts to make quality branded pharmaceutical products accessible to more people in the country. We launched 21 new products this year and are gearing up to introduce over 100 new products in the next five years. Our efforts to spread education and awareness about various diseases are also intensifying. Our knowledge sharing initiatives with Healthcare Professionals - doctors, medical fraternities and pharmacists - are also expanding. Our commitment to helping people unlock life’s possibilities through the power of health - reflected in LIFE. TO THE FULLEST. - is a commitment that is intrinsically aligned with a prosperous and healthy India.

In order to deepen our patient commitment, we are foraying into sub-therapies within our established therapeutic domains. Our beyond-the-pill orientation is aimed at giving much more than just medicine to our customers.

Our emphasis is on creating a sustainable growth blueprint, which is futuristic and viable. Our constant focus on innovation, diversifying the product portfolio, maintaining brand excellence, technology driven initiatives and value-added

knowledge sharing initiatives will further strengthen your Company’s positioning as a committed, capable and compassionate organisation.

Your Company truly values its employees. We have an employee pool of over 3,300 talented and committed workforce, which is one of our most valuable assets. Their hard work and commitment has helped the Company to push all boundaries and stay ahead of the curve, even in a very volatile and competitive environment. Altogether, we have a holistic approach towards growth, development, health and wellness.

I am proud to announce that your Company also won several prestigious awards this year including the most prestigious “Best Companies To Work For” by Business Today.

We sincerely recognise the contributions of our business partners and continue rewarding them in various ways. For instance, we were the first company to compensate our stockists to cover their losses on account of transition to GST, thereby also ensuring continuous availability of medicines at the market place. Such initiatives help us build long lasting relationships with our business partners.

Next year will mark the completion of 75 years of your Company in India - another landmark in our history. We have once again developed strong strategies to ensure our business continues to outperform. Our focus remains on entering new, high-potential therapy areas while maintaining leadership in the areas we dominate. We will continue to push in under leveraged geographies and rural markets and remain committed to be responsive and agile.

With deep regret, we inform you about the untimely demise of Mr Ranjan Kapur. We sincerely appreciate him for his significant contributions. Mr Bhasker Iyer and Ms Nancy Berce resigned as Directors upon their retirement from Abbott. We thank them for their contributions and wish them good health and success in their future endeavours. We welcome Ms Anisha Motwani and Mr Jawed Zia, who have recently joined the Board.

On behalf of the entire Board, I thank all our valued partners – our bankers, doctors, pharmacists and vendors who have always been very supportive and important contributors to our success.

I am also thankful to all members of the Abbott family - our customers, employees and above all, our shareholders who have continued to place faith in the Management of the Company.

MANAGING DIRECTOR'S MESSAGE

PLAYING ON A STRONG WICKET

Our Sales growth of 12.8% was driven by multiple business imperatives. The first and foremost was restructuring our product portfolio into key business areas – Women's Health, Gastroenterology, Consumer Care, CNS, Metabolics, General Care and Vaccines. Among these, Women's Health grew by 19.1%, Vaccines grew by 59.7% and Metabolics grew by 15.3%.

AMBATI VENU
Managing Director

Dear Shareholders,

The promise of enabling fuller, healthier lives is worth pursuing in every possible way, every single day. At Abbott India, we continue to intensify our commitment to fulfil the promise of human potential by helping people achieve their best health at every stage of their life. We have had yet another year of excellent performance and I am happy to share the highlights with you through this Annual Report 2017-18.

Powerful business performance

We know how to deliver high-quality healthcare, and our heritage is proof that we are committed for the long-term. Our Sales growth of 12.8% was driven by multiple business imperatives. The first and foremost was restructuring our product portfolio into key business areas – Women’s Health, Gastroenterology, Consumer Care, CNS, Metabolics, General Care and Vaccines. Among these, Women’s Health grew by 19.1%, Vaccines grew by 59.7% and Metabolics grew by 15.3%. Clearly, the foundation of our business, is our brands and our people.

Our brands are trusted by millions of patients and doctors across therapies. All our key brands have shown strong growth during the year and continue to lead in the market place.

Relentless drive

We continued to take on the mantle of launching market shaping initiatives in collaboration with cross-industry players and technology partners, even when we encountered challenging circumstances on a few fronts.

In less than 8 months, the Indian economy encountered two powerful disruptors, both of which would go on to become positive enablers of economic growth and formalization, but we emerged stronger with renewed focus on core operational excellence. We introduced multiple first-in-industry moves and counter-moves that ensured that economic changes did not come in the way of expectations.

We have an endless drive to bring meaningful innovation to our markets – in both medicines and the services that go along with them – to help people live healthier, fuller lives. We give people a reason to choose our medicines, and this model has led to consistent, exceptional growth.

At Abbott India, our 360 degree efforts to further and fortify our brand leadership in the chosen therapies helped us deliver another market beating performance in the year gone by. At ₹3,424 Crores, our Total Revenues grew by 14.3%.

A Net Profit of ₹401 Crores, our highest ever profit, reflected a growth of about 45% over the previous year. With our relentless efforts and differentiated approach, we consistently remain ahead of the market.

Enriching the lives of our patients

We continued our engagement with patients. During the last year, we were able to vaccinate over 20 Lakh people against Swine Flu and conducted Thyroid screening for over 21 Lakh people pan-India.

Real Film. Real Heroes

We also continued to strengthen our brand identity, through our much appreciated campaign “Real Film. Real Heroes”, depicting how breakthrough innovations from Abbott have helped people live fuller and healthier lives. The campaign, coupled with our value-added knowledge sharing initiatives, has ensured that the Company remains at the forefront with consumers and Healthcare Professionals.

Beyond Pills

We are here to help people lead fuller, healthier lives. And in this mission, it is imperative for us to gain patient insights. We also leverage technology to connect and engage with various stakeholders. Notable initiatives include Thyroweight, the country’s largest Thyroid Awareness program where we reached 3.5 Crore people this year and the Mothers against Influenza (MAI) campaign that aimed at increasing awareness about the need for vaccination. Another high impact campaign in the year was breaking taboos with #Constipation Conversations.

Strong and motivated workforce

Our powerful teams, both in the field and head office, have contributed significantly to the Company’s success. During the year, we introduced various talent management and leadership initiatives aimed at attracting and retaining top talent and empowering them through several development programs.

Future-Focused

As we set our eye on the future, rapid inroads into sub-therapies, accelerated new product launches, innovative marketing and deployment of digital tools, steady deepening of relationships with the doctor, pharmacist, patient trio, continued strengthening and expansion of our brand portfolio, and the collective living of a shared vision by an over 3,300 strong employee pool, will continue to be the central levers of our growth momentum.

I thank you for your continued trust and confidence in our abilities. I congratulate our Abbott India family on scripting another stellar performance in FY 2017-18 and thank my fellow board members for their valuable guidance and contributions. The future looks even more exciting and promising to me and I seek your support to co-create a healthier India and a value-creating company.

WE FOCUSED ON FOUR CRITICAL AREAS FOR IMPROVEMENT – SAFETY, QUALITY, SERVICE AND OPERATIONS

SAFETY

A number of safety initiatives such as disposal of hazardous waste and sludge to Ultratech cement factories for co-processing, a successful Factory Mutual global inspection of safety procedures and launch of 'Stop for Safety' program for creating awareness of safety among employees were completed. The Goa plant is a certified safe workplace and had no reportable or loss time incident during last 5 years.

QUALITY

The plant continuously strives to improve the quality of products manufactured. A number of licenses were renewed as well as audits by WHO and Abbott Quality and Regulatory teams were conducted. Liquid tanks were modified for better product management and skilled staff were recruited for critical production equipment. Lastly, a number of engineering updates were also made to improve hygiene and work environment.

SERVICE

The plant continues to operate at a high service level. The Key Performance Indicator for service is measured in terms of 'On Time In Full', which is 98%. New SKUs in Cremaffin, Udiliv and Duphalac were launched. A key project underway is to bring all tablet production in-house from third party manufacturers.

OPERATIONS

A number of operational improvements were undertaken at the plant to enhance productivity and cost reduction. For the Cremaffin range, the batch size was increased from 5.5KL to 10KL to achieve operational and cost efficiencies. We also installed new volumetric liquid filling machines to improve performance and yields.

Creating value through differentiated services

Abbott India has taken a leadership role in the industry in implementing patient awareness and doctor engagement programs. We use the latest technology tools and adopt innovative, integrated, omni-channel marketing strategies. These efforts help our sales force create a unique positioning for Abbott India in the minds of our stakeholders. Some of our notable projects in FY 2017-18 were:

GUTFIT

GutFit is India's first integrated lifestyle modification program addressing gaps in Gastrointestinal disease management. Lifestyle is the first line of treatment for GI disorders and hence we identified this framework. A comprehensive program was created, which enrolled high-risk patients and provided them with virtual counseling, wearable devices for tracking health metrics and customised diet plans.

EXPERIENTIAL MARKETING FOR DUPHASTON

The complex process of manufacturing Duphaston came alive through experimental technology. We set up gamification and virtual reality experience zones at key conferences to allow participants to create the Duphaston molecule through the gaming console. We also conceptualised an immersive story telling experience using advanced mixed reality to travel through time and experience the invention process of Duphaston.

VERTIN HEAD

Vertin is our 50-year-old brand and is a therapy leader in Vertigo management. We designed Vertin Head, which is a pioneer initiative, by using 3D Printing Technologies to impart knowledge among patients about various vestibular habituation therapy exercises for better management of vertigo. The Vertin Head helped doctors demonstrate detailed information on how to perform various exercises to patients in clinic.

LIGHT DELIGHTS – CELEBRATING LOVE FOR FOOD

Choosing a healthy diet, especially low in lipids, is essential for certain patients (such as IBS patients) to ensure a healthy lifestyle. With tasty food playing a major role in diet decisions, we reached out to help these patients by providing them healthy low-lipid recipes. For this, we tied up with a Michelin star chef, Vikas Khanna, who penned a book with over 20 healthy low-lipid food recipes from across India. This book, Light Delights, was shared with over 2.7 Lakh patients.

PANCRECARE

This is a Mobile App based interactive platform to support patients who suffer from Pancreatic Exocrine Insufficiency. Healthcare Professionals, through this app, have access to monitor real time patient health outcomes. Patients can get counseling on diet and pain management.

#CONSTIPATION CONVERSATIONS

Considering the need to make people feel confident and comfortable about having #ConstipationConversations, we engaged with consumers through an omni-channel (print, digital, mobile, onground) approach. We also conducted an on-ground event and bloggers meet, around #ConstipationConversations with the celebrity therapy ambassador and women bloggers; this was followed by an influencer-led (mom blogger) Tweet chat conversation, and an offline campaign driven by the company. A #FirstinPharma social experiment was also created.

Creating a best-in-class work environment

Abbott India instituted multiple initiatives to improve the work environment and provide a better workplace for employees. Our goal is to enhance workplace productivity and provide adequate motivation to employees to excel in their day-to-day activities.

ONE ABBOTT WORKPLACE

Abbott employees spread across different locations in Mumbai came under one roof in the first quarter of the year. The office has been coined as the One Abbott Workplace, with employees across all divisions and offices in Mumbai now being able to collaborate closely with each other. This initiative is viewed as a significant productivity enhancement move.

FLEXIBLE BENEFITS PROGRAM

Abbott India provides a wider bouquet of benefits for employees. Employees have the choice to decide their own benefits from a master list, according to their needs at their life stages, and buy these benefits with points or top-up with cash.

WOMEN LEADERS OF ABBOTT (WLA)

Abbott India's WLA employee network helps female employees to :

INSPIRE
Meaningful and enabling work environment

CONNECT
That is all about creating engaged and inclusive work culture

GROW
Enriching the gender diversity ratio

BETTER DETAILING AND CONNECTIVITY

Another key initiative and investment made by Abbott India has been the launch of the iPad program where field employees will be equipped with 6th generation iPads. This technological advancement ensures that our employees are better connected with one another and can use some of the latest tools to engage with our customers. This also enables us to move to a paper-free doctor detailing model with enhanced interactivity for better communication.

Shaping future leaders

At Abbott India, we believe that the driving force of our business is its people. The Human Resource (HR) team has built specific programs which encompass the entire employee lifecycle; attracting best talent and retention via career management, rewards and development across all cadres. Some of the initiatives undertaken in FY 2017-18 include:

IN-STRIDE

The In-Stride program is aimed at strengthening the leadership pipeline towards senior leadership positions (quality and quantity). This ensures business continuity for high potential talent through simulations, e-Learning, group mentoring, individual stretch assignments and mentorship.

LEADERSHIP PROGRAMS

CREATING LEARNING OPPORTUNITES

MANAGEMENT TRAINING IN COLLABORATION WITH IIM-CALCUTTA

Next Gen Leadership Program (NGLP)

In line with our Employee Value Proposition (EVP) of providing best-in-class exposure, access and accelerated development for high performers, we launched a Professional Development Program in Sales & Marketing for our First Line Managers called Next Generation Leadership Program. This included a tie up with IIM-Calcutta, one of India's Best B-Schools, for a 9-month certification program in Sales and Marketing. It is the first-of-its kind program in the healthcare industry in India.

Executive Program in Sales & Marketing (EPSM)

We also launched an Executive Program in Sales and Marketing from IIM Calcutta for high potential Second Line Managers. This is an open program and mode of delivery is through an interactive online learning platform.

MANAGEMENT TRAINEE PROGRAM

At Abbott India, our emphasis on building a key differentiator via our marketing practices and efforts is of significant value. With the intent of building a future-ready talent pool of marketers we have redesigned the 'Management Trainee Program' targeting the premier MBA colleges in India.

TRACKS

Tracks is a sales force career development framework to source talent internally and establish a career path for key functions/roles. It provides a clear and objective guideline for career movements along with cross-functional exposure to build leadership skills.

Working with communities to build a better India

Abbott India is engaged with multiple community support programs. Right from helping farmers earn a better livelihood to imparting road safety awareness and helping Indians lead safe lives.

NIRMAL DHARA DAIRY PROGRAM

India is the world's largest producer of milk, and nearly half of rural households depend on dairy farming for at least part of their income. Despite this, many dairy farmers continue to be marginalized, limited by middlemen and lack of technology and methods to produce higher quality milk for a better price.

Working with Prabhat, a local dairy supplier, and TechnoServe, a non-profit organization, we have directly reached out to nearly 1,500 smallholder dairy farmers, half of whom are women, in Maharashtra and Gujarat. We developed the infrastructure required to expand capacity for milk production and delivered robust training on topics ranging from the basics of ensuring high-quality milk to technical dairying skills.

We also run trainings specifically for women farmers and have established transparent pricing mechanisms.

iCARE ROAD SAFETY DRIVE

India has one of the worst records of road safety in the world. Road Safety has been a part of Abbott's global focus, targeted at avoiding accidents and improving lives. Abbott's iCARE Road Safety Drive is geared towards spreading awareness about road safety measures to prevent road accidents and save lives.

Over the years, we have reached more than 15 Lakh people through this initiative. In 2017, more than 3,000 members of our workforce educated people they met in medical clinics, hospitals and schools about safe driving practices. They used this opportunity to share simple, actionable steps for reducing road accidents and injuries, like wearing a helmet and a seat belt, staying alert, obeying speed limits and avoiding mobile phone use while driving.

In 2017, iCARE Road Safety Drive also extended its reach by collaborating with 17 schools to educate 18,823 students on pedestrian safety and road safety awareness.

IMPROVING ACCESS TO QUALITY AND AFFORDABLE HEALTHCARE

Abbott India has initiated a project in partnership with SEWA (Self-Employed Women's Association) to improve access to quality healthcare in India. This program aims to improve health outcomes, generate livelihoods and create an ecosystem with all stakeholders and key partners (Doctors, Pharmacies, Labs), while ensuring both affordability of services for SEWA members, as well as a financially sustainable healthcare ecosystem.

The program will educate SEWA members on various health conditions while training community healthcare workers on providing consistent, community-based care. It will also improve access to qualified doctors and pharmacies in order to develop a healthcare ecosystem to provide quality and affordable healthcare facilities and eventually improve health-seeking behaviour in communities.

Awards & Recognition

Abbott India continues to receive recognition from multiple industry bodies and leading media organisations. We also received multiple awards for excellence at a brand level.

The said Policy is available on the Company's website at <http://www.abbott.co.in/investor-relations/policies.html>

MANAGEMENT DISCUSSION AND ANALYSIS

ECONOMIC OVERVIEW

In the International Monetary Fund's (IMF) April 2018 World Economic Outlook, India's growth rate is projected to be 7.4% in 2018 and 7.8% in 2019. The latest estimate sees India re-emerge as the fastest growing economy, outperforming other emerging markets such as China, Russia and Brazil.

India's growth has recovered from the temporary dip post the implementation of the Goods and Services Tax (GST) last July - a change that is expected to lead to ease in doing business and broadening of the tax base through conversion of India into one common market.

The IMS Health Market Prognosis Report highlighted that rising private consumption, forecasted to grow at 8%, will be the greatest contribution to growth. Moreover, as the 2019 election approaches, Government spending is expected to increase.

India's population growth rate is expected to slow, although the numbers will still grow by almost 77 million by 2021, to reach 1.40 billion.

INDIAN HEALTHCARE ENVIRONMENT

In India, although healthcare is provided by a mix of both public and private facilities, it is the private sector that accounts for 75-80% of outpatient care and 55-60% of in-patient care. The federal Ministry of Health and Family Welfare (MOHFW) is responsible for framing and coordinating healthcare policy, while state and district authorities oversee the administration and delivery of services to their patient populations. Department of Pharmaceuticals, Ministry of Chemicals and Fertilizers frames and implements regulations for Indian Pharmaceuticals Industry.

A new National Health Policy, published in March 2017, calls for an increase in government spending on public health expenditure to 2.5% of the GDP in a time bound manner. It also aims at ensuring improved access and affordability of quality secondary and tertiary care services. The Policy's ultimate long-term goal is achieving universal health coverage and is viewed as the world's largest healthcare initiative by the sheer number of potential beneficiaries.

The National List of Essential Medicines (NLEM), which was revised in December 2015 by adding more drugs, is expected to see more frequent revisions and additions.

INDUSTRY STRUCTURE AND DEVELOPMENT

The Indian Pharmaceutical Market (IPM) was estimated to be ₹ 1,240.3 billion in 2017 with a growth of 5.2%. By 2020, India is likely to be among the top three pharmaceutical markets by incremental growth and the 6th largest market globally in absolute size.

Increase in the number of middle class households coupled with improvement in medical infrastructure, rising awareness and increase in penetration of health insurance in the country, will also influence the growth of pharmaceuticals sector.

The market is highly fragmented with the top 10 companies constituting 43% share of the IPM and the top 150 companies accounting for 97% of the IPM. The IPM is primarily made up of Indian companies, with a share of 79% of the market while acute therapies continue to dominate the market constituting 64% of the IPM.

OPPORTUNITIES AND THREATS

The following factors are likely to impact the IPM in the next few years :

- **Draft Pharmaceutical Policy, 2017** - The August, 2017 release of the draft policy prepared by the Department of Pharmaceuticals sets out key objectives such as increasing access at affordable prices for essential drugs, mandatory Bio-Availability and Bio-Equivalence (BA/BE) tests for all drug manufacturing permissions by central or state regulators and ensuring that all manufacturing units adopt WHO GMP and GLP standards.
- **Price Controls** - Prices will remain under pressure as the scope of price controls increased under the Drug Price Control (Amendment) Order (DPCO) following the update of the National List of Essential Medicines (NLEM). Currently 29 therapeutic classes are covered by the list. It is expected that future revisions of NLEM will ensure price controls are not diluted. The Department of Pharmaceuticals is also amending the DPCO. It is likely that some of the amendments will pose further challenges to the industry.
- **National Health Protection Scheme** - Ayushman Bharat is National Health Protection Scheme which is ambitiously aiming to extend health insurance coverage of up to ₹ 5 Lakh per family per annum to over 10 Crore families from the vulnerable and under-privileged sections of society, equating to around 50 Crore beneficiaries, equivalent to 40% of the population.
- **Uniform Code of Pharmaceuticals Marketing Practices (UCPMP)** - UCPMP, currently, voluntary, is expected to become mandatory shortly. A mandatory Code is expected to provide a level playing field and ethical marketing practices would be followed by all companies.
- **Increasing Digital Penetration** - The exponential growth in the adoption of mobile and digital media, will continue to be an important tool for patient engagement and a medium to raise disease awareness. We expect this trend to continue and gain importance.
- **Regulation of OTC Drugs** - The OTC market is growing strongly at 10.2% and with greater willingness to self-medicate, the regulatory authorities are looking at creating a properly defined OTC sector. The creation of a well-defined and regulated OTC market, coupled with stricter enforcement of prescribing and dispensing regulations, will drive growth of the OTC market.

REVIEW OF OPERATIONS

Financial Performance

Total Revenue

Total Revenue for the year ended March 31, 2018 is ₹ 3424,10.89 Lakhs vis-a-vis ₹ 2996,33.40 Lakhs last year, recording a robust growth of 14.3% over the previous financial year.

Net Sales for the financial year 2017-18 grew by 12.8% over the previous year, to ₹ 3273,90.01 Lakhs, an increase of ₹ 371,52.34 Lakhs, driven mainly by volumes.

Other Income

The significant increase in Other Income is mainly on account of income generated from assignment of trade marks amounting to ₹ 45,30.26 Lakhs.

Interest on inter-company loan to Alere Medical Private Limited, India, amounting to ₹ 5,20.55 Lakhs is also included in Other Income.

The Company continued to invest in fixed deposits with Banks having high credit ratings, with a view to safeguarding the principal and maintaining liquidity. Income from Bank Deposits grew by 12.8%. Investment strategy is reviewed periodically by the Finance Committee. The Company has an investment portfolio of ₹ 987,35.00 Lakhs as at March 31, 2018.

Material Cost

The improved sales mix and marginal growth in sales price realisation, resulted in decrease in Material Cost as a percentage of Sales from 59.0% in financial year 2016-17 to 58.2% in the current year.

Employee Cost

While the Company increased its employee strength by 7.8% to 3,322, the Employee Cost as a percentage to Sales has marginally increased from 11.9% in financial year 2016-17 to 12.0% in the current year.

The increase in Employee Cost by 14.0% over the last year is mainly due to merit increases and impact of change in monetary ceiling for Gratuity.

Other Expenses

Other Expenses including excise duty on Sales, Depreciation and Finance Cost increased by 0.3% over the last year. The increase on account of office lease rentals for One Abbott office is partially offset by decrease in excise duty on Sales post implementation of GST. Other Expenses, as a percentage to Sales reduced to 15.4% this year compared to 17.3% for the financial year 2016-17, owing to higher Sales in the current year.

Profit Before Tax

Profit Before Tax for the year ended March 31, 2018 at ₹ 621,48.26 Lakhs, grew to 19.0% of Sales as compared to 15.0% in the previous year.

Goods and Services Tax (GST)

GST, the biggest indirect tax reform of India, was rolled-out effective July 1, 2017. This transformational reform significantly impacted all areas of businesses across various sectors including the pharmaceutical industry. The applicable rate of GST on drugs in general is 12% and for life saving drugs is 5%. Early analysis of potential GST impact on business, proactive preparedness in the IT system enhancements and Supply Chain operations helped the Company to be GST compliant right from the GST roll-out date. The Company used this mega reform as an opportunity to upgrade the systems and also launched many initiatives such as providing trainings to trade partners and other stakeholders, thus, engaging with them to secure an effective GST compliant environment. The Company has taken a lead in making several representations to the Government authorities on the key concern areas/challenges faced by the pharmaceutical industry and made certain recommendations to ease compliance.

Division-wise Performance

The Company operates in a single reportable business segment i.e. "Pharmaceuticals".

The Company's business operations are divided into four divisions i.e. (i) Women's Health & Gastrointestine, Gastroenterology, GI Prospera and GI Advance (ii) Specialty Care (iii) GenNext and Vaccines and (iv) Consumer Care.

The key performance highlights of each Business Division for the financial year 2017-18 are as follows :

(i) Women's Health & Gastrointestine, Gastroenterology, GI Prospera and GI Advance Division

This Division offers a mix of our global and India-specific brands across pregnancy, constipation and liver diseases segments. Several of the Company's largest brands such as Duphaston (Women's Health Hormone), Duphalac (Laxative), Udiliv (Hepatic Protective), Cremaffin (Laxative), Cremaffin Plus (Laxative), Creon (Digestive Enzymes), Heptral (Alcoholic liver disease) and Rowasa (Inflammatory Bowel Syndrome) form part of this division.

- Women's Health & Gastrointestine

This Business Unit posted a strong growth of 19.1% during the year. Duphaston, Udiliv and Duphalac have contributed significantly to overall growth.

During the year, 2 new products - Cystofert (Polycystic Ovary Syndrome) and Letrolife (Ovulation) were launched.

- Gastroenterology

This Business Unit posted a strong growth of 10.5% during the year, mainly driven by brands Cremaffin, Cremaffin Plus and Librax.

During the year, 4 new products - Duphalac Bulk (Gut Health), Duphapro (Constipation), Udiliv 450 (NAFLD) and Duphalac Lemon Flavor (Laxative) were launched.

- GI Prospera

This Business Unit grew by 3.9% during the year. The growth was majorly driven by brands Creon, Heptral and Rowasa.

During the year, 3 new products - Velpaclear (Hepatitis C), Antoxipan (Pain Management in chronic pancreatitis) and Heptral T (ALD/NAFLD) were launched.

- GI Advance

This Business Unit was formed in January, 2018 to build new products on a build, operate, transfer model. As of March, 2018, 4 new products - Confinex (Constipation), Cremapeg (Irritable Bowel Syndrome), Dirifa (Diarrhoea/Hepatic Encephalopathy) and GX600 (ALD/NALD) were launched.

(ii) Specialty Care Division

This Division consists of a comprehensive range of products for treatment of metabolic disorders and central nervous system illnesses, and covers therapy areas like hypothyroidism, vertigo, depression and migraine. The key brands in this division are Thyronorm (thyroid preparations), Vertin (antivertigo), Prothiaden (antidepressant), and Inderal (migraine prophylaxis). Some of these enjoy market leadership positions* in their respective therapeutic areas.

- Metabolics

This Business Unit grew by 15.3% during the year. The growth was mainly driven by Thyronorm which retains flagship position* in its segment.

During the year, 1 new product - Combinorm (Probiotic - Bacterial Vaginosis) was launched.

- Central Nervous System

This Business Unit grew by 8.8% during the year. Vertin and Prothiaden continues as the market leader* and has shown double-digit growth.

During the year, 2 new products - Inderal 20 (Migrane) and Cerebion (Stroke/Brain Injury) were launched.

(iii) GenNext and Vaccines Division

This Division includes the therapy areas of Pain Management and Vitamins. It comprises multi-specialty drugs and applications, and is primarily aimed at general physicians. The key brands include Brufen (pain killer), Duvadilan (peripheral vasodilator), Zolfresh (sleep management), Arachitol Nano (Vitamin D preparations) and Digecaine (antacid anaesthetic).

The Company has a licensing arrangement with Bharat Biotech India Limited to market vaccines in immunology segment. The key brands in vaccine portfolio are Influvac (influenza vaccine), Enteroshield (typhoid vaccine) and Rotasure (rotavirus diarrhea vaccine).

- GenNext

This Business Unit has shown a negative growth of 2.6%; however, Arachitol Nano and Duvadilan have shown positive growth. Zolfresh retains number 1* position in its participated market.

- Vaccines

This Business Unit showed growth of 59.7% and contributed 3.4% of Sales for the year. The double digit growth was driven by all key brands in this unit. Influvac achieved No. 1* position in its participated market this year.

(iv) Consumer Care Division

This Division is present in the Over The Counter (OTC) antacid segment and mainly promotes all variants of Digene (antacid - antifatulent) - tablets, liquids and powders.

The Division focuses on connecting with patients through positioning of its products mainly through mass media, social media and point of sale promotion. New advertisement and marketing strategies will help sustaining the growth of this portfolio. The Division showed growth of 10.6% over the previous year.

During the year, 5 new products - Rashfree Natural Cream (Diaper Rash Cream), Digene Paan Flavour (Antacid), Digene Pudina Pearls (Digestive), Cremaffin Fresh (Laxative) and Brufen Active (Pain Relief Ointment) were launched.

MEDICAL RESEARCH AND KNOWLEDGE SHARING INITIATIVES

The Company significantly supports Real World Evidence [RWE] Generation Studies and Registration Studies for innovative products developed by Innovation and Development (I&D) teams, which help in attaining its commitment for portfolio expansion. In addition, training imparted to Healthcare professionals (HCPs) during clinical studies via Good Clinical Practice (GCP), drives the Company's standing as a scientific company.

During the year, the Company executed 23 new studies, published 14 publications in major indexed journals and made 7 international congress presentations. The health authority of India approved 3 studies submitted and presented by the Company. The Company received approvals to conduct phase 3 studies in adults/elderly and pediatrics in parallel for its Influvac, Quadrivalent Vaccine (QIV) Program. The Company also conducted 6 GCP workshops to raise awareness on clinical trials.

Some of the notable studies are in therapy segments of Migraine, Metabolic Syndrome, Constipation, Insomnia and Preterm which were presented/published at different national/international congresses during the year under review.

OUTLOOK

IMS Health has forecasted the Indian Pharmaceutical Market to grow at a compounded annual growth rate of 9.7% between 2017 and 2022, reaching approximately ₹ 2000 billion by 2022.

For the near future, after an in-depth overview of our strength and our market leading position, we identified specific opportunities to leverage for growth. Some of these are :

- Shape therapies to accelerate existing key brands :

Accelerate growth of existing brands through focused brand building, innovative marketing campaigns and partnerships to help patients and physicians. This will ensure we continue growing faster than the market and drive our therapy leadership.

- Provide services that go beyond just the pill :

We have targeted interventions at each stage along the 'continuum of care' for patients. For example, we have developed a holistic end-to-end solution in the gut space called 'Gutfit' which involves solutions such as counselling and nutrition advice for patients.

- Increase portfolio depth through the launch of new products in our existing therapy areas :

During the year, we have launched 21 new products and have a robust plan for future launches.

- Focus on internal talent development, engagement, retention and capability building :

We run successful management trainee programs, conduct uniform assessments for first line and second line manager roles and have the industry's only 3-tier certification program for our field force. This year, we launched the Women Leaders of Abbott (WLA) initiative to help female employees at Abbott India maximize their potential.

- Digital differentiation and use of technology :

It complement our products to drive engagement with Key Opinion Leaders and patients, for example, in-clinic engagement through augmented and virtual reality interfaces such as the VertiGo App. Through the roll out of iPads to field force of three of our Business Units, we have more engaging and differentiated content to showcase to doctors.

RISKS AND CONCERNS

The implication of risk has steadily intensified given the volume and complexity of change the pharmaceutical industry continues to face both in India and the world. Regulatory challenges are compounded by evolving regulations and new legislations. While regulators are committed to create an environment conducive for pharmaceutical companies to do business, sync between policy and operations will be an area to watch.

The National Pharmaceutical Pricing Authority (NPPA) will continue to play an active role of regulator for drug prices and further changes are expected to be introduced to the pricing system. More frequent revisions to the National List of Essential Medicines (NLEM) are expected.

Although no concrete proposals to introduce direct controls on patented product prices had been made public as of early 2018, it is possible that a patented drug price policy could be introduced.

Numerous professional organisations and government bodies have repeatedly called for doctors to prescribe low cost generic medicines to patients. This is one among a series of measures planned by the health ministry to regulate the cost of medical care and make healthcare more affordable in India. The introduction of generic prescribing regulations is on the government's agenda.

INTERNAL CONTROL SYSTEM AND ITS ADEQUACY

The Company has put in place an internal control mechanism that is commensurate with its size and nature of business. These systems provide a reasonable assurance on achievement of its operational, compliance and reporting objectives including safeguarding of assets of the Company, prevention and detection of frauds, accuracy and completeness of accounting records and ensuring compliance with the corporate policies.

This mechanism is sound in design and the framework is continuously evaluated for effectiveness and adequacy. The mechanism operates through well-documented standard operating procedures, policies and process guidelines.

The Internal Audit plan is finalised based on current perception of internal control risk and compliance requirement in consultation with operating divisions. The Internal Auditors, as a part of their audits, review the design of key processes from an adequacy of controls point of view.

Additionally, significant internal audit observations and management actions thereon are reported to the Audit Committee, on a quarterly basis. An independent and empowered Audit Committee reviews the observations and assesses the adequacy of the actions proposed as well as monitors their implementation. While the Internal Auditors conduct a quarterly follow up for implementation/remediation of all audit recommendations and the status report is presented to the Audit Committee regularly.

The Company has implemented both preventative and detection controls and appropriate corrective actions to reduce the risks including :

- Abbott Code of Business Conduct (COBC) requires annual certification by all employees;
- Compliance Committee is formed with representatives from all the operating groups;
- Senior Management have oversight of the compliance programs;
- Business Compliance Cell is assigned with responsibility of training, monitoring and ensuring compliance of the Company's Policies and Procedures by field employees;
- The Company has a Whistle Blower mechanism in place;
- Business Divisions have a quarterly meeting with Director - Office of Ethics and Compliance, to monitor and discuss the compliance with various business processes.

The Company Management has assessed the effectiveness of internal controls over financial reporting for the year ended March 31, 2018 and, based on the assessment, believe, that the same are adequate and working effectively.

The Statutory Auditors have issued an audit report on the adequacy and effectiveness of the internal financial control systems over financial reporting.

HUMAN RESOURCES

The Company firmly believes that human capital continues to be the driving force of our business. We endeavor to attract, retain, develop and deploy the best available talent across the functions and hierarchy of the Company. Providing an empowering work environment that is built upon openness and transparency fosters collaborative participation of over 3,300 committed people towards addressing the unmet healthcare needs of its customer universe.

Our Human Resource team has developed and deployed an integrated talent management mechanism, which encompasses the entire employee lifecycle – recruitment, career progression, rewards and recognitions.

India Talent Strategy

Pursuing an integrated approach to talent management helps us to attract the best talent and also develop future leaders from within the organisation. We leverage differentiated talent hiring, using multiple channels including premier business schools in India and abroad. In its fourth year of execution, our India Talent Strategy aims :

- to be the employer of choice in the Indian Healthcare Industry in terms of attracting and retaining the right quantity and quality talent;
- to achieve our aspiration to continue to grow faster than the markets we operate in and deliver predictable performance.

The Company believes in motivating and engaging employees through shared goals, capability building initiatives, career growth opportunities and an environment of transparency, accountability and positive reinforcement.

Women Leaders of Abbott

Helping women at Abbott, maximize their potential and realise greater achievement and advancement throughout their careers is the mission of Women Leaders of Abbott (WLA). Through various programs, initiatives and speaker series, WLA connects women employees and offers tools and topics to help them maximize their careers at Abbott.

The objective of this initiative is to create a platform for attracting, retaining and advancing female talent in the organisation and thereby becoming the Employer of Choice for female employees and contributing positively to business success.

Leadership Programs

Several leadership programs such as In-stride, Global Citizen Development Program, Emerging Leaders Program, etc., were conducted during the year.

Some of the other notable initiatives include : **Feeder Pool Development Program**, aimed at accelerating progress of our key talent towards leadership roles at mid-management level; **Differential Hiring Strategy**, aimed at infusing differential talent and diversity; **Sales Management Trainee Program**, aimed at building a diverse and superior talent pool for first line managers; **Sales Leadership Development Program**, an internal career development program designed to source talent internally and establish a career path for key functions/roles; **Uniform Assessments for First Line and Second Line Manager roles**, aimed at creating succession pipeline for First Line and Second Line high performing field managers; **Executive Program in Sales & Marketing**, an Executive Program in Sales and Marketing from IIM Calcutta for high potential Second Line Managers.

Coaching Culture

The Company constantly focuses on propagating a coaching culture across sales hierarchy. On-job-coaching is one of the important levers of building individual capabilities and drive employee motivation and engagement. "Coaching Olympiad" is a very innovative initiative aimed at identifying and recognising "Best Coaches" in the sales teams. A total of 22 best coaches were recognised during the biggest annual sales conference - a first-in-industry initiative.

Prevention of Sexual Harassment at Workplace

The Company has an Internal Complaints Committee (ICC) in place as required under the Sexual Harassment of Women at Workplace (Prevention, Prohibition and Redressal) Act, 2013. Appropriate training is imparted to employees. This training also forms a part of New Employee Orientation Program. There were no complaints received by the Company/ICC during the year under the aforesaid Act.

Total number of employees as on March 31, 2018 is 3,322.

HEALTH, SAFETY AND ENVIRONMENT

Health and Safety :

Providing a safe workplace and keeping the employees healthy is the Company's top priority. We are committed to keeping all those who work for the Company safe by preventing dangerous incidents in and around the workplace. Our EHS strategy aims to develop a standardised approach to foster continuous improvement and ensure a safe and efficient working environment that minimises any adverse environmental impact. In educating our employees, we also empower them to promote safer and healthier lives in their wider communities. We strive to maintain the highest standards of Environment, Health and Safety (EHS) practices.

The Employee Health and Safety (EHS) Policy has been implemented through our Global EHS Standards, supported by a well-defined EHS organisational structure, EHS Standard Operating Procedures and EHS specific programs, all ensuring we meet all the local regulatory requirements.

Suggestions from the Safety Committee, comprising representatives from the workforce and management, are implemented promptly to resolve issues impacting Plant safety and employee health. Routine self-audits and third party safety audits are conducted to verify compliance with the regulatory and internal safety requirements.

During the year, pumps within the existing fire hydrant system were upgraded to cover additional expansion area to mitigate the risk of fire at the Goa Plant. The site is geared to handle any type of fire situation.

Training programs are conducted at the Plant on health and safety issues to build technical capabilities. Employees are also encouraged to attend external training programs on various topics such as regulatory requirements, ergonomics, machine guarding, hot work safety, road safety, industrial hygiene, industrial safety and so on. A cross-functional teams for emergency response and firefighting is in place. Mock drills for fire-fighting and rescue operations are conducted in association with local fire brigade to keep the staff in a state of preparedness for any emergencies. The Company has a detailed Business Continuity Plan in place. We are continuously improving on the Behavior Based Safety (BBS) program and visible improvement in safety culture is observed. Stop for Safety initiative was initiated this year to support the BBS program. The Plant had no reportable or loss time incident during last 5 years.

The Plant has a well-appointed first-aid room with a full time nurse and Occupational Health Physician catering to employee needs. The Plant is also armed with an on-site fully-equipped ambulance van. It is mandatory for all plant employees to undergo regular medical check-up as prescribed under the Company's Policies.

Introduction of closed loop system for Chloroform handling was a major initiative undertaken at the Plant this year. This will reduce employee exposure and accidental inhalation. Additionally, we have invested in several employee engagement programs like celebration of National Safety week, World Environment day and Abbott EHS month that will help build a sustainable EHS culture.

Environment :

A responsibility towards the environment is part of Abbott's mandate. We continuously endeavor to minimize the use of renewable resources and cut down on carbon emission. In all our initiatives, we adopt a holistic approach and make efforts to curtail the adverse environmental impact, if there is any, during product-manufacturing and its disposal either by us, our vendors or customers. The site continued to implement multiple water conservation projects to save water. Examples include improved condensate recovery from boilers, installation of fluid bed dryer filter bag washing and drying machine to save 50 liters of water per washing cycle and intermediate product container cleaning machine installed to save 40 liters of water per container. The treated water from our waste water treatment plant is recycled for horticulture within the site.

The Company has a state-of-the-art effluent treatment plant at Goa, with parameters of treated effluents well below the limit set by the local State Pollution Control Board. Our Goa plant is a "ZERO" discharge plant.

Over the period of last 5 years, the site has achieved more than 25% absolute water reduction in usage and the rain water harvesting project was effectively continued at the Plant this year, which resulted in 600 KL of water storage during the monsoon season.

Major focus during the year was yield improvement. Along with increasing productivity, this initiative has helped save the discharge of raw materials and solvents into the environment.

Goa plant has received the "Best Environmental Practices Award" from Goa State Pollution Control Board to recognise the efforts for recycling the used water from liquid bottle cleaning machines in cooling water towers in utility section.

Furthermore, gas emissions from the boiler and generator stacks as well as the ambient air quality are monitored regularly by us and they are well below the limits set by the State Pollution Control Board. There is also a vermi-composting unit in place to convert canteen waste into organic manure, which is used in the lawns and on the plantation inside the factory premises. The site retains its Zero Waste to landfill certification in the

purview of waste disposal. In 2017, 36% of the waste was sent for recycling, 62 % for incineration/co-processing and 2% for composting. One of our significant achievements has been the changing fate of hazardous waste through our initiatives that changed from Incineration to Co-processing. With this change, we have ensured that the energy from the waste is recovered, thus contributing to the reduction of CO2 emission and global warming. 56% of site waste was incinerated with energy recovery.

- 3.5 Other qualifications that would be helpful in addition to the above include, but are not limited to :
 - 3.5.1 Senior level government experience
 - 3.5.2 Academic administration
- 3.6 The Board shall include a range of ages and a diversity of ethnicity, gender and geography.
- 3.7 Primary characteristics required in new board candidates:
 - 3.7.1 They must be first and foremost able and willing to represent the shareholders' short-term and long-term economic interests.
 - 3.7.2 They must be able to contribute to the evaluation of the existing management of the Company.
 - 3.7.3 They must also be cognizant of the responsibilities of the Company to :
 - Its employees
 - Its customers
 - Social issues
 - Regulatory authorities
 - 3.7.4 They must be willing to take the necessary time to properly prepare for board and committee meetings at a minimum based on a thorough review of the material supplied before each board meeting.
- 3.8 Primary characteristics required for renomination of incumbent directors :
 - 3.8.1 Incumbent directors should continue to meet the general qualifications outlined above and, in addition, should abide by the following criteria :
 - 3.8.1.1 Adequate preparation for board and committee meetings, including a thorough review of and familiarity with the written materials supplied before each meeting
 - 3.8.1.2 Participation in and contributions to board and committee discussions through useful and pertinent suggestions, questions and comments
 - 3.8.1.3 Providing on-going advice and counsel to management on the director's own initiative and when requested by management

- 3.8.1.4 Regular attendance at board and committee meetings
- 3.8.1.5 Maintaining an independent familiarity with the external environments in which the Corporation operates and especially in the director's own particular fields of expertise

4. Other Positive Attributes for Directors :

- 4.1 It is desirable that candidates proposed for Directorship possess the following positive attributes :
 - 4.1.1 Any post-graduation qualifications from reputed business schools/universities in India or abroad;
 - 4.1.2 Experience and expertise in dealing with strategic issues and long-term perspectives;
 - 4.1.3 Strong leadership experience, a superior knowledge of business principles and capacity for independent thought and exercising independent judgment;
 - 4.1.4 Ability to participate constructively in deliberations at board meetings;
 - 4.1.5 Willingness to exercise authority in a collective manner;
 - 4.1.6 Inquisitive and objective perspective, practical wisdom and mature judgment;
 - 4.1.7 Self-confidence to contribute to board deliberations and stature such that other board members will respect his or her view;
 - 4.1.8 Capable of devoting sufficient time and attention to his/her professional obligations for informed and balanced decision making;
 - 4.1.9 Focused towards the Company and generous/open minded towards the team;
 - 4.1.10 Fit and proper person of impeccable integrity, reputation and character; absence of convictions and restraint orders; and competence including financial solvency and net worth.

5. Independence :

BUSINESS RESPONSIBILITY REPORT

At Abbott India, we firmly believe that innovative, responsible and sustainable business plays an important role in building a healthy, thriving society. We strive to foster economic, environmental and social well-being through our operations and in interaction with our stakeholders.

We leverage our knowledge of science, business acumen and unique resources to provide lasting solutions to global health challenges. The most important priority areas to our stakeholders and for our growth are :

- **DELIVERING PRODUCT EXCELLENCE** - We are committed to continuously improve and innovate to address local and global health needs while ensuring high quality and manufacturing standards of our products.
- **IMPROVING ACCESS** - We seek to work with all stakeholders to enhance access to care to improve health outcomes.
- **SAFEGUARDING THE ENVIRONMENT** - We work towards reducing the environmental impacts - from the sourcing of raw materials, to the manufacture and distribution of our products, to the use and disposal of our products by patients, consumers and healthcare providers.

By building a more inclusive business, we aim to reach more people, in more places, than ever before. From strengthening the capacity of suppliers, to creating products that enable people to live healthy lives, we are always finding new opportunities to expand the positive impact of our people, products and business. Moreover, being a responsible corporate citizen extends much beyond philanthropy. We apply our science, expertise and technology to address the urgent and unmet needs in our communities - often through collaborative partnerships. We seek to act responsibly in all of our markets on behalf of our patients, employees, consumers, communities and all other stakeholders.

At Abbott India, we strive to implement sustainable practices to reduce the environmental impact of our products and operations. Every day, we put our unique talent to work towards building a strong business and a healthy, robust society.

SECTION E : PRINCIPLE-WISE INFORMATION

Principle 1 : Businesses should conduct and govern themselves with Ethics, Transparency and Accountability

The Company is committed to conducting business in an ethical and legally compliant manner. The Company has a robust and comprehensive corporate compliance program designed to help maintain the highest ethical and compliance standards. The Company's Office of Ethics & Compliance provides employees with the information, tools, guidance, training and support they need when making day-to-day business decisions to ensure that Abbott's ethics and values are integrated into its business practices on a consistent basis around the world. Adhering to these Standards is an important part of the commitment to operate with honesty, fairness and integrity.

Our Code of Business Conduct ("the Code") embodies values and provides a foundation for employee's responsibilities and behaviors that help them make the best choices for the Company, for themselves, and for the people they serve. The Company's Board and leadership teams fully support the Code and the policies, procedures and principles it embodies.

1. Does the policy relating to ethics, bribery and corruption cover only the company?

No

2. Does it extend to the Group/Joint Ventures/Suppliers/Contractors/NGOs/Others?

Yes

3. How many stakeholder complaints have been received in the past financial year and what percentage was satisfactorily resolved by the management? If so, provide details thereof.

The Company has received 31 stakeholder complaints during the financial year 2017-18. Out of these, 28 complaints were investigated in accordance with Internal Investigations Policy and Compliance Program and appropriately resolved. 3 complaints are pending under investigation.

Principle 2 : Businesses should provide goods and services that are safe and contribute to sustainability throughout their life cycle

The Company is committed to the protection of human health, safety and the environment where we conduct our business. Attainment of our long range targets to reduce employee injuries, to lower environmental emissions and to reduce our use of natural resources in all aspects of our product development, manufacturing and commercial operations remains a top priority.

Meeting our targets, along with all of our other environment, health, safety and energy objectives, is the continuation of a long legacy of responsible business practices that reflect our core values : Pioneering, Achieving, Caring and Enduring. Toward this end our current key objectives include :

- Fostering a work environment that promotes employee health and productivity, and is ultimately free of injuries;
- Continuously improving the efficiency and sustainability of our business activities and products, resulting in the lowering of greenhouse gas emissions, water use, and minimizing landfill wastes;
- Expecting that contractors doing work on behalf of Abbott conform to regulatory requirements and meet applicable internal EHS&E standards;
- Promoting the use of safe and fuel efficient business vehicles.

We endeavour to maintain the highest level of quality throughout our business. Our Commitment to health and safety of the people who use our products is always at the forefront of everything we do. These efforts start with sourcing of materials for and manufacture of our products and moves through how we market, sell and supply these products, including through our business partners - delivering high quality is imperative every step of the way.

We are committed to timely identifying, evaluating, and addressing product safety issues. We provide healthcare professionals and institutions with the information they need in order to use Company products safely and effectively. We take action to prevent counterfeiting, illegal diversion, and theft of our products. We adhere to all applicable trade regulations, locally and globally.

We have established written procedures for product actions and recalls, which require completion of a health hazard assessment, medical assessment and corrective and preventive action plan development.

We take our responsibility to embed the highest product quality and safety standards across our supply chain very seriously. We maintain an evaluation and approval system that requires evidence that a supplier can consistently provide material or services meeting specified quality and safety requirements.

1. List up to 3 of your products or services whose design has incorporated social or environmental concerns, risks and/or opportunities.

- Duphalac and Cremaffin
- Digene Gel and Tablets
- Brufen Tablets

2. For each such product, provide the following details in respect of resource use (energy, water, raw material, etc.) per unit of product :

(a) Reduction during sourcing/production/distribution achieved since the previous year throughout the value chain?

Being a multiproduct facility, product-wise resource consumption is not measured, yet the plant continuously takes measures to reduce the consumption. The plant has increased manufacturing yields so as to reduce the wastage of precious raw materials, packaging materials and solvents. As a compliance towards Plastic Waste Management Rules, we are working on usage of more recyclable materials in our packaging of goods.

(b) Reduction during usage by consumers (energy, water) has been achieved since the previous year?

The boilers have been running on Biomass to reduce the CO2 emissions and the environmental impact. The site practices the principle of 3R - Reduce, Recycle and Reuse to continuously reduce the waste and environmental impacts. All the waste is disposed through Government approved agencies after audit and internal approval process.

Below table shows water consumption, CO2 emissions and waste generated during the year 2017-18 at the plant. The absolute numbers are higher due to increase in production and site validation activities after major upgradation.

Sr. No.	Parameter	Unit	Quantity
1.	Total water used	KL	51,207
2.	Waste generated	MT	479
3.	Total CO2 equivalent emissions from purchased electricity	MT	4,000

Following measures have been taken at the plant during the year 2017-18 for conservation of Energy –

- Existing Fluorescent Tube Light high power (FTL) consuming lights replaced with energy saving Light Emitting Diode (LED) lights in Quality Control areas.
- New condensate recovery pump installed to improve the condensate recovery from 55% to 80%.

Following measures have been taken at the plant during the year 2017-18 for conservation of water –

- Effluent Treatment Plant treated water used for toilet flushing in change rooms.
- Fluid bed dryer filter bag washing and drying machine installed to save 50 liters of water per washing cycle.
- Intermediate product container cleaning machine installed to save 40 liters of water per container.

3. Does the Company have procedures in place for sustainable sourcing (including transportation)? If yes, what percentage of your inputs was sourced sustainably? Also, provide details thereof.

Yes, the Company has been working to increase sourcing of local packaging materials thereby reducing the transportation and the resultant vehicular emissions. For Example, we encouraged the bottle manufacturers to setup their unit in Goa. Also, with the new GST regime, the stockists are being serviced from the closest Carrying and Forwarding Service Providers to reduce transportation emissions.

4. Has the Company taken any steps to procure goods and services from local & small producers, including communities surrounding their place of work?

The Company does procure goods and services from local and small producers, particularly, located near its manufacturing plant at Goa, in accordance with the established procedures and requirements. We have also identified new local sources for supplying voluminous raw material which is used in production process. A long-term relationship is developed with vendors and the Third Party Manufacturers to ensure business continuity and continuous availability of the products to our key stakeholders, i.e. the patients.

All the key vendors for the Company are assessed for EHS practices and compliances to ensure sustainability and are audited regularly. Goa site confirms that none of the raw materials utilised at plant are derived from Biodiversity or its components.

5. Does the Company have a mechanism to recycle products and waste? If yes, what is the percentage of recycling of products and waste (separately as <5%, 5-10%, >10%). Also, provide details thereof.

Yes, wherever feasible, the wastes are recycled. Being pharmaceuticals, the products are not recycled. Disposal of hazardous waste and sludge to Ultratech cement factories which is utilised by them as a fuel for manufacturing of cement. Non-hazardous waste like paper, glass, etc. are sent to approved vendors.

The Goa Plant retains its certification of Zero Waste to landfill in purview of waste disposal. In 2017-18, 36% of our total waste was sent for recycling, 2% was composted on site, 56% of the waste which includes hazardous waste was co - processed with energy recovery whereas 6% was incinerated.

The Company's plant at Goa received "Best Environmental Practices Award" from Goa State Pollution Control Board recognizing the efforts for recycling the used water from liquid bottle cleaning machines in cooling water towers in utility section.

Principle 3 : Businesses should promote the well-being of all employees

The Company cares about and is concerned for the health and well-being of its employees. The Company's success is directly dependent upon the skill, dedication and productivity of its employees. Therefore, it is incumbent upon the Company to provide means for the effective cultivation, development and utilisation of its human resources.

Everyone who works at Abbott India encounters a professional environment, free from intimidation and harassment. Employee performance and achievements are enhanced in an open and supportive work environment which is characterised by mutual trust and respect.

A Diverse and Inclusive work place

To compete effectively on a global basis, the Company needs diverse perspectives, experiences and skills. We are committed to fostering and supporting diversity. We believe that this commitment helps us attract and retain talent while innovating more effectively and adapting to the changing healthcare needs. Our Women Leaders of Abbott (WLA) employee network is designed to help female employees further their careers and empower their leadership at Abbott through structured training, development and networking events tailored to the specific needs.

Employee Development and Talent Management

By taking a proactive approach to recruitment and offering advancement and leadership development programs at all levels, we help our employees realise their potential. All the employees have access to job-specific training and development to ensure successful performance in their current roles across the full range of jobs – from commercial and operations to research and development, as well as human resources, finance and supply chain. We develop current and future leaders through a robust combination of training, on-the-job experiences and formal and informal mentoring. There are various certification programs being conducted by the training function for frontline field force which help them acquire higher level of competencies.

The Company's robust approach to talent management incorporates skills assessments, performance appraisals, succession and development planning and career progressing. Our integrated talent management process gives increased visibility to talent within our organisation, enhances the accuracy of our assessments and drives consistency in skills mapping across the organisation.

Various training and leadership development programs conducted by the Company during the year under review are :

- IN-STRIDE

In-Stride program is aimed at strengthening the leadership pipeline towards senior leadership positions (quality and quantity) to ensure business continuity by creating continuous learning opportunities for high potential talent through Simulations, E-Learning, Group Mentoring, individual stretch assignments/projects, 1:1 mentorship and face time with talent council.

Compensation and Benefits

The Company is dedicated to providing a solid foundation of employee benefits that will allow employees to meet their personal and family needs. Employee benefit philosophy is based on three primary core values :

- Abbott cares and is concerned for the health, welfare and financial well-being of its employees;
- Abbott has established competitive benefits as part of the Total Rewards offered to its employees;

- Abbott has developed standards for effective management of employee benefit programs.

The Company is committed to offering comprehensive and competitive benefit packages designed to meet the changing needs of employees.

The Company's compensation philosophy is to pay for performance. Our total compensation targets reference the median of other leading companies. The Company has set the following guiding principles for Employees Total Compensation programs :

- Base salaries are competitive in the markets where we compete for employees. Incentive plans are designed to balance short and long-term financial and strategic objectives that build shareholder value and reward overall company and individual performance;
- Incentive compensation (both annual and long-term) is a key component of the Company's pay-for-performance philosophy;
- Our structure ties individual awards to both business and/or individual results, to motivate our employees to achieve superior performance;
- Compensation elements are designed to encourage behavior that is consistent with the ethical values established in Abbott Code of Business Conduct;
- Benefits are competitive in and appropriate for the markets where we compete for talent.

Listening to Employees

We value the opinions of our employees and regularly seek their feedback through various employee surveys.

Work Life Harmony

The Company offers flexible work schedules and office timings to enable our employees to achieve balance in their work and personal responsibilities and activities. We view these initiatives not only as important tools for talent attraction and retention, but also as key components in our approach to diversity and inclusion.

Healthy Living Initiatives

We inspire and motivate our employees with social, financial, mental and physical programs designed for healthy living in the fullest possible sense.

- Exercise across Abbott

8. **What percentage of your above mentioned employees were given safety & skill upgradation training in the last year?**

All new joiners are imparted training as a part of their induction program.

Principle 4 : Businesses should respect the interests of, and be responsive towards all stakeholders, especially those who are disadvantaged, vulnerable and marginalized

We recognise that listening to our stakeholders and responding thoughtfully to their concerns and ideas are vital to our success as a business, and to our progress. The Company has been engaging with broad range of stakeholders on an ongoing basis. Our major stakeholders are our Patients, Consumers and Customers; Governments and Regulators; Healthcare Professionals; Employees; NGOs; Local Communities; Suppliers,

Vendors and Shareholders. Regular communication and engagement with these stakeholders enhance our understanding about their needs and helps to serve them better and builds long lasting relationships.

1. **Has the Company mapped its internal and external stakeholders?** – Yes
2. **Out of the above, has the Company identified the disadvantaged, vulnerable and marginalized stakeholders?**

The Company has been giving a special focus to marginalised stakeholders through various initiatives. One such initiative was Abbott India's Total Sanitation Project in Gujarat which focused on the safety and privacy of women. Working with a number of local non-governmental organizations (NGOs), the Company launched a comprehensive awareness, education and infrastructure program to help the villages improve sanitation and enable healthier lives. As a result of this project, 99% women in the villages cited improved safety and privacy as one of the major benefits of the project.

Through another initiative, the Nirmal Dhara Dairy Project in Ahmednagar, we have been empowering women dairy farmers by training sessions and infrastructure development. As a result of this program, dairy incomes have nearly doubled among the farmers who were part of the program. This year, the Company has started a new initiative that focuses on creating a sustainable healthcare delivery model in underserved areas to generate livelihoods for self-employed women in rural India. Through all our initiatives, we have been trying to empower marginalised and vulnerable stakeholders to improve their living conditions.

The Company strives to improve healthcare and drive awareness building and diagnosis improvement through education and health clinics, addressing the need for better healthcare, diagnostic and sanitation facilities as part of its commitment to doing business responsibly and sustainably.

The Company works continuously towards health education, reaching out to the public at large through various channels. These initiatives are part of the Company's continued focus and unflinching dedication to reaching out to the millions of unaware and unsuspecting patients.

3. **Are there any special initiatives taken by the Company to engage with the disadvantaged, vulnerable and marginalized stakeholders? - If so, provide details thereof.**

The Company's initiatives such as Creating a Sustainable Healthcare Delivery Model, Nirmal Dhara Dairy Project and Total Sanitation Project aims to empower marginalized women. The latter, particularly, eased the lives of students and elderly who did not have access to toilets before the project.

Principle 5 : Businesses should respect and promote human rights

The Company believes in the dignity of every human being and respects individual rights. These principles are reflected in the Company's mission and core values. We contribute to the fulfilment of human rights through compliance with laws and regulations wherever we operate, as well as through our policies and programs. Our global guidelines include :

- Providing a healthy and safe working environment;
- Complying with child labour laws;
- Promoting workforce diversity and not discriminating against any employee for reasons such as race, religion, colour, age, gender, ethnicity, disability, marital status and sexual orientation, in addition to any other status protected by local law;
- Not tolerating harassment or harsh or inhumane treatment in the workplace;
- Protecting individual privacy;
- Providing compensation and benefits that are competitive and comply with applicable laws for minimum wages, overtime hours and mandated benefits;

Principle 6 : Businesses should respect, protect, and make efforts to restore the environment

We are committed to safeguarding a healthy environment for everyone by reducing the environmental impacts of our business. This commitment shapes the way we source, manufacture, design and distribute our products. A sustainable environment is essential for better health, stronger communities and more fulfilling lives. Our long-term Environment, Health and Safety (EHS) strategy aims to protect our people, our planet and our value. We achieve this by delivering across a number of core areas to reduce and mitigate environmental risks; deliver cost efficiency and ensure business continuity.

We take steps to reduce our use of energy and other natural resources. We support projects that generate energy from renewable sources at work and in our communities. We seek ways to reduce the environmental impact of our operations, such as through waste reduction and recycling and other activities to mitigate environmental risks. We adhere to the environmental laws and regulations applicable to our operations.

1. Does the policy relate to Principle 6 cover only the Company or extends to the Group/Joint Ventures/Suppliers/Contractors/NGOs/others?

The EHS policy of the Company covers all employees and contractors of the Company.

2. Does the Company have strategies initiatives to address global environmental issues such as climate change, global warming, etc.? Y/N - If yes, please give hyperlink for webpage etc.

Yes. The Company is committed to environmental protection and has identified three environmental priorities. In each one, we have set ambitious goals for reducing environmental impact by 2020, compared to 2010 levels and adjusted for sales.

- Climate change : 40% reduction in carbon dioxide equivalent (CO₂) emissions (i.e., greenhouse gas [GHG] emissions) associated with our business operations and the electricity we purchase (i.e., Scope 1 and 2 emissions)
- Water usage : 30% reduction in total water intake
- Waste management : 50% reduction in total waste

The Company is already working on identifying key EHS focus areas and targets for 2030.

3. Does the Company identify and assess potential environmental risks? Y/N

Yes, there are internal standards based on ISO 14001. Environmental risk assessments are updated and reviewed regularly. The Corporate EHS team conducts independent onsite reviews and potential environmental risks are shared with the top management for attention.

4. Does the Company have any project related to Clean Development Mechanism? If so, provide details thereof, in about 50 words or so. Also, if Yes, whether any environmental Compliance report is filed?

No projects are undertaken specifically under Clean Development Mechanism, however there is emphasis on usage of clean energy (like Biomass at Goa plant). CO₂ emission reduction opportunities are formally assessed and emission reduction is a part of annual site targets and key performance indicators.

5. Has the Company undertaken any other initiatives on clean technology, energy efficiency, renewable energy, etc.? If yes, please give hyperlink for web page etc.

Yes. The Company is committed to environmental protection. Vermicomposting and rainwater harvesting is being practiced. Goa site is Zero Waste to Landfill (ZWL) certified with more than 91% of the waste either being recycled or co-processed off-site for energy recovery. New HVAC system has been installed with energy efficient components. The existing FTL high power consuming lights replaced with energy saving LED lights in QC areas. Water conservation measures include new condensate recovery pump to improve the condensate recovery from 55% to 80 %. Fluid bed dryer filter bag washing and drying machine installed to save 50 liters of water per washing cycle and intermediate product container cleaning machine installed to save 40 liters of water per container.

6. Are the Emissions/Waste generated by the Company within the permissible limits given by CPCB/SPCB for the financial year being reported?

Principle 8 : Businesses should support inclusive growth and equitable development

We aim to empower communities to take control of their living environments for fuller, healthier lives. The Company's CSR policy is focused on fostering economic, environmental and social well-being.

1. Does the Company have specified programs/initiatives/projects in pursuit of the policy related to Principle 8? If yes, details thereof.

iCARE Road Safety Drive

Road Safety has been a part of the Company's focus, targeted at avoiding accidents and improving lives. Abbott India's iCARE Safety Drive is geared towards spreading awareness about road safety measures to prevent road accidents and save lives. Originally started in 2010, as an internal training program for Abbott's employees, iCARE Safety Drive has evolved into a nationwide road safety awareness drive. Leveraging the experience gained and the training used during its internal employee safety campaign, Abbott India is reaching out to India's public to spread safety awareness.

Over the years, we have reached more than 15 Lakhs people through this initiative. In 2017-18, more than 3,000 Members Pan-India of our workforce educated people they met in medical clinics, hospitals and schools about safe driving practices. They used this opportunity to share simple,

actionable steps for reducing road accidents and injuries, like wearing a helmet and a seat belt, staying alert, obeying speed limits and avoiding the use of mobile phone while driving.

During financial year 2017-18, the program also extended its reach by collaborating with 17 schools to educate 18,823 students on pedestrian safety and road safety awareness.

Nirmal Dhara Dairy Development Program

India is the world’s largest producer of milk, and nearly half of rural households depend on dairy farming for at least part of their income. Despite this, many dairy farmers continue to be marginalized, limited by middlemen, a lack of technology and methods to produce higher quality milk for a better price. A further problem is that women are often excluded from decision-making, despite playing a significant role in dairying work.

Working with Prabhat, a local dairy supplier and TechnoServe, a non-profit organisation, we developed a demonstration model that strengthens local dairy supply chain and empowers smallholder farmers to produce increased volumes of higher-quality milk.

Since 2016, our program has directly reached over 1,500 smallholder dairy farmers, half of which are women, in Maharashtra and Gujarat. We developed the infrastructure required to expand capacity for milk production and delivered robust training on topics ranging from the basics of ensuring high-quality milk to technical dairying skills, animal feed and care, farm management and the business of dairying. We run trainings, specifically for women farmers, as well. We established transparent pricing mechanisms for the farmers’ milk that clearly demonstrate the link between quality and price.

During last year, our program, had run nearly 200 training sessions for farmers. We are seeing a consistent increase in the volume of high-quality milk collected every month, demonstrating the impact of our program’s training-led approach. Based on this success, Prabhat is committed to expanding this model to 200 additional villages in the region over three years. This will give more smallholder farmers access to a trusted and transparent market and the skills and infrastructure that they need to supply it.

Health Clinics - Programs to expand Awareness and Access to Healthcare

Access to essential healthcare services and information is a continuing challenge for many in India.

Abbott India has several programs to address this gap. Through one such effort, Abbott India supports qualified doctors and healthcare professionals to expand disease

diagnosis and access to care. This includes programs to raise awareness and improve care for epilepsy and liver diseases. In the year 2017-18, these programs reached approximately 165 districts in more than 25 states, reaching out to 4.5 Lakhs people through over 18,500 awareness campaigns.

Creating a Sustainable Healthcare Delivery Model through Livelihoods

The Company has initiated a new project in partnership with SEWA (Self-Employed Women’s Association) to improve access to quality healthcare in India. Working with SEWA, which represents underprivileged, self-employed women workers, who earn a living through their own labour or small businesses, Abbott India is seeking to create a sustainable healthcare delivery model within SEWA communities.

This program aims to improve health outcomes, generate livelihoods and create an ecosystem with all stakeholders and key partners (Doctors, Pharmacies, Labs), while ensuring both affordability of services for SEWA members, as well as a financially sustainable healthcare ecosystem.

This program will educate SEWA members on various health conditions while training community healthcare workers on providing consistent, community-based care. The program will also improve access to qualified doctors and pharmacies in order to develop a healthcare ecosystem to provide quality and affordable healthcare facilities and eventually improve health-seeking behaviour in communities.

INDEPENDENT AUDITOR'S REPORT

To the Members of Abbott India Limited

REPORT ON THE IND AS FINANCIAL STATEMENTS

We have audited the accompanying Ind AS financial statements of Abbott India Limited ("the Company"), which comprise the Balance Sheet as at March 31, 2018, the Statement of Profit and Loss, including the statement of Other Comprehensive Income, the Cash Flow Statement and the Statement of Changes in Equity for the year then ended, and a summary of significant accounting policies and other explanatory information.

MANAGEMENT'S RESPONSIBILITY FOR THE IND AS FINANCIAL STATEMENTS

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Ind AS financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under Section 133 of the Act, read with the Companies (Indian Accounting Standards) Rules, 2015, as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial control that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

AUDITOR'S RESPONSIBILITY

Our responsibility is to express an opinion on these Ind AS financial statements based on our audit. We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder. We conducted our audit of the Ind AS financial statements in accordance with the Standards on Auditing, issued by the Institute of Chartered Accountants of India, as specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the Ind AS financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by the Company's Directors, as well as evaluating the overall presentation of the Ind AS financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Ind AS financial statements.

OPINION

In our opinion and to the best of our information and according to the explanations given to us, the Ind AS financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2018, its profit including other comprehensive income, its cash flows and the changes in equity for the year ended on that date.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

1. As required by the Companies (Auditor's report) Order, 2016 ("the Order") issued by the Central Government of India in terms of Sub-section (11) of Section 143 of the Act, we give in the "Annexure 1", a statement on the matters specified in paragraphs 3 and 4 of the Order.
2. As required by Section 143(3) of the Act, we report that:
 - (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit;
 - (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books;
 - (c) The Balance Sheet, Statement of Profit and Loss including the Statement of Other Comprehensive Income, the Cash Flow Statement and Statement of Changes in Equity dealt with by this Report are in agreement with the books of account;

* The above amounts include 'Assets held for sale'.

- (ii) The management has conducted physical verification of inventory at reasonable intervals during the year and no material discrepancies were noticed on such physical verification.
- (iii) According to the information and explanations given to us, the Company has not granted any loans, secured or unsecured to companies, firms, limited liability partnerships or other parties covered in the register maintained under Section 189 of the Companies Act, 2013. Accordingly, the provisions of clause 3(iii) (a), (b) and (c) of the Order are not applicable to the Company and hence not commented upon.
- (iv) In our opinion and according to the information and explanations given to us, provisions of Section 185 and 186 of the Companies Act, 2013 in respect of loans to directors including entities in which they are interested and in respect of loans and advances given, investments made and, guarantees, and securities given have been complied with by the Company.
- (v) The Company has not accepted any deposits within the meaning of Sections 73 to 76 of the Act and the Companies (Acceptance of Deposits) Rules, 2014 (as amended). Accordingly, the provisions of clause 3(v) of the Order are not applicable.
- (vi) We have broadly reviewed the books of account maintained by the Company pursuant to the rules made by the Central Government for the maintenance of cost records under Section 148(1) of the Companies Act, 2013, related to the manufacture of formulations, and are of the opinion that prima facie, the specified accounts and records have been made and maintained. We have not, however, made a detailed examination of the same.
- (vii) (a) Undisputed statutory dues including provident fund, employees' state insurance, income tax, sales tax, service tax, duty of custom, duty of excise, value added tax, Goods and Services Tax (GST), cess and other material statutory dues have generally been regularly deposited with the appropriate authorities though there have been delays in few cases of payment of professional tax.

- (b) According to the information and explanations given to us, no undisputed amounts payable in respect of provident fund, employees' state insurance, income tax, service tax, sales tax, duty of custom, duty of excise, value added tax, Goods and Services Tax (GST), cess and other statutory dues were outstanding, at the year end, for a period of more than six months from the date they became payable except as below :

ANNEXURE 2 TO THE INDEPENDENT AUDITOR'S REPORT OF EVEN DATE ON THE STANDALONE FINANCIAL STATEMENTS OF ABBOTT INDIA LIMITED

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Abbott India Limited ("the Company") as of March 31, 2018 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's Management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing as specified under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2018, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

1. COMPANY INFORMATION

Abbott India Limited ('The Company') is a public limited company domiciled and incorporated in India under the provisions of Companies Act, 1913. The Company is listed and traded on the Bombay Stock Exchange and also traded on the National Stock Exchange. The registered office of the Company is 3, Corporate park, Sion-Trombay road, Mumbai - 400 071, India.

The Company is one of the leading multinational pharmaceutical companies in India and operates with an owned manufacturing facility in Goa and various independent contract/third party manufacturers based across the country. The Company sells its products through independent distributors primarily within India.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

2.1 Basis of preparation

The financial statements are prepared on the accrual basis of accounting and in accordance with the Indian Accounting Standards (hereinafter referred to as the Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 and relevant amendments thereafter.

Effective April 1, 2016, the Company has adopted all the Ind AS standards and the adoption was carried out in accordance with Ind AS 101 'First-time adoption of Indian Accounting Standards', with April 1, 2015 as the transition date. The transition was carried out from Indian Accounting Principles generally accepted in India as prescribed under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014, which was the previous GAAP.

The financial statements have been prepared on a historical cost basis, except for certain financial assets and liabilities measured at fair value or amortised cost.

The financial statements are approved for issue by the Company's Board of Directors on May 14, 2018.

2.2 Summary of significant accounting policies

a) Current and non-current classification

All assets and liabilities are presented in the Balance Sheet based on current or non-current classification as per the Company's normal operating cycle and other criteria set out in Schedule III of the Companies Act, 2013. Based on the nature of products and the time between the acquisition of assets for processing and their realisation into cash and cash equivalents, the Company has ascertained its operating cycle as twelve months for the purpose of current/non-current classification of assets and liabilities. An asset is treated as current when it is :

- Expected to be realised or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period

- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when :

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

b) Foreign currency translation

Functional and presentation currency

Items included in the financial statements of the Company are measured using the currency of the primary economic environment in which the Company operates ('the functional currency'). The financial statements are presented in Indian Rupee (₹), which is the Company's functional and presentation currency.

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognised in the Statement of Profit and Loss.

Non-monetary assets and liabilities denominated in a foreign currency and measured at historical cost are translated at the exchange rate prevalent at the date of the transaction.

c) Fair value measurement

The Company measures financial instruments at fair value at each Balance Sheet date. Fair value is the price that would be received on sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either :

- In the principal market for the asset or liability, or

- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs. Where required/appropriate, external valuers are involved.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole :

- Level 1 – Quoted (unadjusted) prices in active markets for identical assets or liabilities.
- Level 2 (if level 1 feed is not available/appropriate) – Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 (if level 1 and 2 feed is not available/appropriate) – Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For financial assets and liabilities maturing within one year from the Balance Sheet date and which are not carried at fair value, the carrying amount approximates fair value due to the short maturity of these instruments.

The Company recognises transfers between levels of fair value hierarchy at the end of reporting period during which change has occurred.

d) Revenue recognition

Revenue is recognised to the extent it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment

and excluding taxes or duties collected on behalf of the government. The Company has concluded that it is the principal in all of its revenue arrangements since it is the primary obligor in all the revenue arrangements as it has pricing latitude and is also exposed to inventory and credit risks.

The Company has assumed that recovery of excise duty flows to the Company on its own account and thus, revenue includes excise duty upto June 30, 2017 as the same got subsumed in Goods and Services Tax (GST) with effect from July 1, 2017.

However, sales tax/Value Added Tax (VAT)/Goods and Services Tax (GST) is not received by the Company on its own account. Rather, it is tax collected on value added to the commodity by the seller on behalf of the government. Accordingly, it is excluded from revenue.

Sale of products

Revenue from sale of products is recognised when the risks and rewards of ownership is passed on to the customers. Revenue from sale of products is stated exclusive of sales tax, Value Added Tax (VAT), Goods and Services Tax (GST) and are net of sales returns, discounts, provision for anticipated returns on expiry, made on the basis of management expectation taking into account past experience.

Rendering of Services

Service income is recognised as per the terms of the contracts/arrangements when related services are performed and is stated net of service tax.

Interest income

For all financial instruments measured at amortised cost, interest income is recorded using the effective interest rate, which is the rate that exactly discounts the estimated future cash receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset. Interest income is included in 'Other Income' in the Statement of Profit and Loss.

Income from assignment of trademarks

Income from assignment of trademarks is recognised in the Statement of Profit and Loss on fulfilment of obligations as per the underlying agreement with the buyer.

e) Taxes

Current income tax

Tax expense comprises of current and deferred tax and includes any adjustments related to past periods in current and/or deferred tax adjustments that may become necessary due to certain developments or reviews during the relevant period. The provision for current tax is made at the rate of tax as applicable for the income of the previous year as defined under the Income tax Act, 1961.

Current income tax relating to items recognised, either in other comprehensive income or directly in equity, is also recognised in other comprehensive income or in equity, as appropriate and not in the Statement of Profit and Loss. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Current tax assets and current tax liabilities are offset when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle the asset and the liability on a net basis.

Deferred tax

Deferred tax is recognised using the Balance Sheet approach on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is expected to be recovered or settled, based on tax rates and tax laws that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised, either in other comprehensive income or in equity, is also recognised in other comprehensive income or in equity, as appropriate and not in the Statement of Profit and Loss.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set-off current tax assets against current tax liabilities.

f) Property, plant and equipment

Property, plant and equipment are stated at cost of acquisition less accumulated depreciation and impairment in value, if any. Cost for subsequent additions comprises the purchase price and any other attributable cost of bringing the asset to its working condition for its intended use. Subsequent expenditures are added to its gross book value only if it increases the future benefits from the existing asset beyond its previously assessed standard of performance and cost of the item can be measured reliably.

The Company identifies and determines cost of each component/part of the plant and equipment separately, if the component/part has a cost which is significant to the total cost of the plant and equipment and has useful life that is materially different from that of the remaining plant and equipment.

Gains or losses arising from derecognition of tangible property, plant and equipment are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the Statement of Profit and Loss when the asset is derecognised.

Depreciation is provided, pro-rata for the period of use, on the straight line method, based on the respective estimate of useful lives as given below. Estimated useful lives of assets are determined based on technical parameters/assessments.

The management believes that useful lives currently used, which is as prescribed under Part C of Schedule II to the Companies Act, 2013, fairly reflect its estimate of the useful lives and residual values of property, plant and equipment, though these lives in certain cases are different from lives prescribed under Schedule II.

Method of depreciation	Straight line
Type of assets	Useful life in years
Leasehold Land	Over lease period i.e. 95 years
Leasehold Improvements	Over primary lease period i.e. 3 to 13 years
Buildings	
Factory Building *	29 years 11 months
Residential Buildings	50 years
Plant and Equipment *	
Anaesthetic Equipment	5 years
Others	9 to 10 years
Furniture and Fixtures	10 years
Office Equipment	
Computers	3 years
Others	5 years
Vehicles *	5 years

* In respect of these assets, the management estimate of useful lives, based on technical assessment is lower than the useful life prescribed under part C of Schedule II to the Companies Act, 2013.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

Advances paid towards the acquisition of property, plant and equipment outstanding at each Balance Sheet date is classified as capital advances under 'Other non-current assets' and the cost of assets not put to use before such date are disclosed under 'Capital work-in-progress'.

g) Intangible assets

Intangible assets are carried at cost, net of accumulated amortisation and impairment losses, if any. Cost of an intangible asset comprises of purchase price and attributable expenditure on making the asset ready for its intended use.

Intangible assets acquired separately are measured on initial recognition at cost. Intangible assets are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset are reviewed at least at the end of each reporting period. The amortisation expense on intangible assets is recognised in the Statement of Profit and Loss.

Method of amortisation	Straight Line
Type of assets	Useful life in years
Software	3 to 5 years
Trademarks	5 years

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the Statement of Profit and Loss when the asset is derecognised.

h) Assets held for sale

Property, plant and equipment are classified as assets held for sale, if their carrying amounts are to be recovered principally through a sale rather than through continuing use. The condition for classification of held for sale is met when the non-current asset is available for immediate sale and the same is highly probable of being completed within one year from the date of classification as held for sale.

Property, plant and equipment retired from actual use and held for disposal are stated at the lower of their net book value and net realisable value and are disclosed separately under 'Current assets'. Once classified as held for sale, these assets are not depreciated.

i) Research and development

Revenue expenditure pertaining to research is charged to the Statement of Profit and Loss. Development costs of products are also charged to the Statement of Profit and Loss unless a product's technical feasibility has been established, in which case such expenditure is capitalised.

Development expenditures on an individual project are recognised as an intangible asset when the Company can demonstrate :

- The technical feasibility of completing the intangible asset so that the asset will be available for use or sale

- Its intention to complete and its ability and intention to use or sell the asset
- How the asset will generate future economic benefits
- The availability of resources to complete the asset
- The ability to measure reliably the expenditure during development

The amount capitalised comprises of expenditure that can be directly attributed or allocated on a reasonable and consistent basis to creating, producing and making the asset ready for its intended use. Property, plant and equipment utilised for research and development are capitalised and depreciated in accordance with the policies stated for property, plant and equipment and depreciation.

j) Leases

The determination of whether an arrangement is a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

Company as a lessee

Leases where lessor effectively retains substantially all the risks and benefits of ownership of the leased items, are classified as operating lease. The Company is a lessee under such arrangements. Operating lease payments are recognised as an expense in the Statement of Profit and Loss on straight line basis over lease term, unless the payments to the lessor are structured to increase in line with expected general inflation.

Company as a lessor

Leases in which the Company does not transfer substantially all the risks and rewards of an asset are classified as operating lease. Rental income from operating lease is recognised on a straight line basis over the term of the relevant lease. Contingent rents are recognised as revenue in the year in which they are earned.

k) Inventories

Inventories consists of raw materials, packing materials, work-in-progress, stock-in-trade and finished goods. Inventories are valued at lower of cost and net realisable value. Cost is determined on First-In-First-Out basis.

Cost of raw materials and packing materials includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition.

Cost of work-in-progress and finished goods includes direct materials, labour and proportion of manufacturing overheads based on the normal operating capacity, wherever applicable. Cost of finished goods includes excise duty and other costs incurred in bringing the inventories to their present location and condition.

Cost of stock-in-trade includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale. However, materials and other items held for use in the production of inventories are not written down below cost if the finished products in which they will be used are expected to be sold at or above cost.

l) Impairment**Financial assets**

A financial asset is assessed at each reporting date to determine whether there is any objective evidence that it is impaired. A financial asset is considered to be impaired, if objective evidence indicates that one or more events have had a negative effect on the estimated future cash flows of that asset.

In accordance with Ind AS 109, the Company applies Expected Credit Loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure :

- Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 18
- Other financial assets which are measured at amortised cost

The Company follows simplified approach for recognition of impairment loss allowance on Trade receivables. The Company recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

ECL are measured in a manner that they reflect unbiased and probability weighted amounts

determined by a range of outcomes, taking into account the time value of money and other reasonable information available as a result of past events, current conditions and forecasts of future economic conditions.

Non-financial assets

The carrying amount of non-financial assets other than inventories are assessed at each reporting date to ascertain whether there is any indication of impairment. If any such indication exists or when annual impairment testing for an asset is required, then the asset's recoverable amount is estimated. An impairment loss is recognised, as an expense in the Statement of Profit and Loss, for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less cost to sell and value in use. Value in use is ascertained through discounting of the estimated future cash flows using a discount rate that reflects the current market assessments of the time value of money and the risk specific to the assets. For the purpose of assessing impairment, assets are grouped at the lowest levels into cash generating units for which there are separately identifiable cash flows.

An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment had been recognised.

m) Provisions and contingencies**Provisions**

A provision is recognised if, as a result of a past event, the Company has a present legal or constructive obligation that is reasonably estimable, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Provision for sales return and date expiry :

The Company as per trade practice accepts returns from market which are primarily in the nature of expired or near expiry products. Provisions for such returns are estimated on the basis of historical experience, market conditions and specific contractual terms and are provided for.

Contingencies

A contingent liability is :

- a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company; or

- a present obligation that arises from past events but is not recognised because :
 - it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or
 - the amount of the obligation cannot be measured with sufficient reliability.

n) Employee benefits

Short-term employment benefits :

All employee benefits payable within 12 months of service such as salaries, wages, bonus, ex-gratia, medical benefits etc. are recognised in the year in which the employees render the related service and are presented as current employee benefit obligation within the Balance Sheet. Termination benefits are recognised as an expense as and when incurred.

Short-term leave benefit is provided at undiscounted amount during the accounting period based on the service rendered by employees.

Defined contribution plan :

Contributions to defined contribution schemes such as State governed Provident Fund and Employee Pension Scheme, Employees' State Insurance Scheme, Superannuation, Employees' Deposit Linked Insurance and Group Life Insurance are charged as an expense based on the amount of contribution required to be made as and when services are rendered by the employees. The above benefits are classified as defined contribution schemes and the Company has no further defined obligations beyond the contributions.

If the contribution payable to the scheme for service received before the Balance Sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognised as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the Balance Sheet date, then excess is recognised as an asset to the extent that the pre-payment will lead to a reduction in future payment or a cash refund.

Defined benefit plan :

The Company has defined benefit plan in the form of Gratuity, Long Service Benefits and Post Retirement Medical Benefits as per policies of the Company. The Company's net obligation in respect of the defined benefit plan is calculated by estimating the amount of future benefit that employee has earned in exchange of their service in the current and prior periods and discounted back to the current valuation date to arrive at the present value of the defined benefit obligation. The defined benefit obligation is deducted from the fair value of plan assets, to arrive at the net asset/(liability), which need to be accounted for in the books of accounts of the Company.

As required by Ind AS 19 'Employee Benefits', the discount rate used to arrive at the present value of the defined benefit obligations is based on the Indian government security yields prevailing as at the Balance Sheet date that have maturity date equivalent to the tenure of the obligation.

The calculation is performed by a qualified actuary using the projected unit credit method. When the calculation results in a net asset position, the recognised asset is limited to the present value of economic benefits available in form of reductions in future contributions.

The Company recognises remeasurements of actuarial gains and losses in post retirement medical benefit plans immediately in other comprehensive income and all the other expenses related to post retirement medical benefit plans as employee benefit expenses in their Statement of Profit and Loss. Remeasurements are not reclassified to Statement of Profit and Loss in subsequent period.

When the benefits of the plan are changed, or when a plan is curtailed or settlement occurs, the portion of the changed benefit related to past service by employees, or the gain or loss on curtailment or settlement, is recognised immediately in the Statement of Profit and Loss.

Other employee benefits :

Other employee benefits comprise of leave encashment which is provided for, based on the actuarial valuation carried out as at the end of the year.

Liabilities recognised in respect of other long-term employee benefits are measured at the present value of the estimated future cash outflows expected to be made by the Company in respect of services provided by employees up to the reporting date.

o) Earnings per equity share

The Basic Earnings Per equity Share (EPS) is computed by dividing the net profit after tax for the year attributable to the equity shareholders of the Company by weighted average number of equity shares outstanding during the year.

Diluted earnings per equity share are computed by dividing the net profit attributable to equity holders of the Company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period unless issued at a later date.

p) Share based compensation

Abbott Laboratories, USA, being the Ultimate Holding Company, has given restricted stock option plan to the employees of the Company.

Pursuant to Ind AS 102 'Share-based Payment', the Company recognises an expense based on the fair value of the stock options as at grant date. The expenses are amortised over the vesting period. The corresponding credit is given to equity because the award represents in substance equity contribution by the Parent Company. The cumulative expense recognised for stock options at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the Company's best estimate of the number of equity instruments that will ultimately vest.

q) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability of equity instrument of another entity.

Financial assets

Recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at 'Fair value through profit or loss', transaction costs that are attributable to the acquisition of the financial asset. Financial assets are classified, at initial recognition, as financial assets measured at fair value or as 'Financial assets measured at amortised cost'.

For purposes of subsequent measurement, financial assets are classified in following categories :

- Financial assets at amortised cost
- Financial assets at fair value

A financial asset is measured at amortised cost net of impairment, if the objective of the Company's business model is to hold the financial asset to collect the contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All other financial assets are measured at fair value through Statement of Profit and Loss.

Derecognition

The Company derecognises a financial asset only when the contractual rights to the cash flows from the asset expires or it transfers the financial asset and substantially all the risks and rewards of ownership of the asset.

Financial liabilities

Recognition and measurement

Financial liabilities are classified, at initial recognition, as either 'Financial liabilities at fair

value through profit or loss' or 'Other financial liabilities'.

- Financial liabilities are classified as 'Financial liabilities at fair value through profit or loss', if they are held for trading or if they are designated as financial liabilities at fair value through profit or loss. These are measured initially at fair value with subsequent changes recognised in profit or loss.
- Other financial liabilities, are initially measured at fair value, net of directly attributable transaction costs. Subsequent to initial recognition, these are measured at amortised cost using the effective interest rate method.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the Balance Sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

r) Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise cash at banks and on hand and short-term deposits with a maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the Statement of Cash Flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts, if any, as they are considered as an integral part of the Company's cash management.

s) Dividend distribution to equity shareholders

The Company recognises a liability to make cash distributions to equity holders when the distribution is authorised and the distribution is no longer at the discretion of the Company. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity in the year of approval.

(All amounts in ₹ Lakhs, unless otherwise stated)

(All amounts in ₹ Lakhs, unless otherwise stated)

Nature and purpose of reserves :**1. Amalgamation Reserve**

This was created on amalgamation of Beem Healthcare Limited and Valencia Pharmaceuticals Limited, wholly owned subsidiary of the Company with appointed date as July 1, 1998. All assets and liabilities of erstwhile Beem Healthcare Limited and Valencia Pharmaceuticals Limited were transferred to the Company and all shares held by the Company in erstwhile Beem Healthcare Limited and Valencia Pharmaceuticals Limited were cancelled. The amalgamation was accounted under 'Pooling of Interests method' as prescribed in then Accounting Standard 14 issued by the Institute of Chartered Accountants of India.

2. Capital Reserve

This was created on amalgamation of Lenbrook Pharmaceuticals Limited, a wholly owned subsidiary of the Company with the appointed date as October 1, 2003. All the assets and liabilities of erstwhile Lenbrook Pharmaceuticals Limited were transferred to the Company and all shares held by the Company in the erstwhile Lenbrook Pharmaceuticals Limited were cancelled. The amalgamation was accounted under the 'Purchase Method' as prescribed in then applicable Accounting Standard 14 issued by the Institute of Chartered Accountants of India.

3. Capital Redemption Reserve

This was created according to Section 77A of the Companies Act, 1956 by transferring the face value of shares bought back during the period 2003 to 2008 from free reserves.

4. Share Based Compensation Reserve

The Company's employees are awarded Restricted Stock Units (RSUs) of the Ultimate Holding Company, Abbott Laboratories, USA. The Share Based Compensation Reserve is used to recognise the fair value of the RSUs awarded to the employees. The award represents in substance equity contributions by the Ultimate Holding Company.

5. General Reserve

General Reserve is used from time to time to transfer profits from retained earnings for appropriation purposes. General Reserve is created by a transfer from one component of equity to another and is not an item of 'Other comprehensive income'.

6. Retained Earnings

Retained Earnings are the profits the Company has earned till date, less any transfer to General Reserve, dividends or other distributions paid to the shareholders.

7. Remeasurement of defined benefit plan

Differences between the interest income on plan assets and the return actually achieved, and any changes in the liabilities over the year due to changes in actuarial assumptions or experience adjustments within the plans, are recognised in 'Other comprehensive income' and subsequently not reclassified to the Statement of Profit and Loss.

(b) Details of Corporate Social Responsibility (CSR) expenditure :

The Company believes that responsible and sustainable business plays an important role in building a healthy and thriving society. As part of its commitment to do business responsibly and sustainably, the Company strives to enhance access to healthcare and foster economic, environmental and social well-being by delivering lasting solutions to social challenges.

As a part of its CSR obligations, the Company undertook several initiatives during the year. These included, Road Safety Awareness drive through iCare Safety Day and Nirmal Dhara Dairy Project, which focuses on improving livelihoods through education, skill development and women empowerment. In addition to these, our partnership with SEWA (Self Employed Women's Association), alongwith various programmes focused on enhancing access to healthcare and improving awareness of health issues were conducted across India.

37 SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of the Company's financial statements in conformity with Ind AS requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances existing when the financial statements were prepared. The estimates and underlying assumptions are reviewed on an ongoing basis. Revision to accounting estimates is recognised in the year in which the estimates are revised and in any future year affected.

ESTIMATES AND ASSUMPTIONS

The key assumptions concerning the future and other key sources of estimation at the reporting date, which may cause a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

Discounting of security deposits

The Company has considered State Bank of India (SBI) base rate of respective periods in which transaction had occurred for measuring deposit, being financial assets, at amortised cost. Refer Note 27 - Interest income on security deposits.

Useful lives of Property, plant and equipment

The Company reviews the useful life of property, plant and equipment at the end of each reporting period. This reassessment may result in change in depreciation expense in future periods. Refer Note 2(f) for management estimate of useful lives.

Defined benefit plans (Gratuity benefits)

The cost of the defined benefit gratuity plan and other post employment medical benefits and the present value of the gratuity obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

The parameter most subject to change is the discount rate. In determining the appropriate discount rate, the management considers the interest rates of government bonds in currencies consistent with the currencies of the post employment benefit obligation.

The mortality rate is based on publicly available mortality tables for the specific countries. Those mortality tables tend to change only at interval in response to demographic changes. Future salary increase and gratuity increase are based on expected future inflation rates in the country.

Further details about gratuity obligations are given in Note 38.

Share based compensation to employees

The fair value of restricted stock units plan is measured at the date of grant using the Black Scholes option pricing model. The estimate also requires determination of the most appropriate inputs to the valuation model, including the volatility, dividend yield, risk free interest rates, expected life of share option etc., which are disclosed in the Note 39.

(All amounts in ₹ Lakhs, unless otherwise stated)

Intangible assets under development

The Company capitalises intangible assets under development for a project in accordance with the accounting policy. Initial capitalisation of costs is based on management's judgement that technological and economic feasibility is confirmed, future economic benefits are probable, the Company has the intention and ability to complete and use the asset and the cost can be measured reliably. Also refer Note 5.

Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using appropriate valuation techniques. The inputs for these valuations are taken from observable sources where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of various inputs including liquidity risk, credit risk, volatility etc. Changes in assumptions/judgements about these factors could affect the reported fair value of financial instruments. Also refer Note 44.

Provision for inventories

Provision is made in the financial statements for slow and non-moving items based on estimates regarding their usability. Further for finished goods and stock-in-trade, all inventories expiring within six months and not expected to be sold, have been fully provided for. Also refer Note 9.

Impairment of trade receivables

For the purpose of measuring lifetime expected credit loss allowance of trade receivables, the Company has used a practical expedient as permitted under Ind AS 109. This expected credit loss allowance is computed based on a provision matrix which takes into account historical credit loss experience and adjusted for forward-looking information. The loss allowance for other financial assets are based on assumptions about risk of default. The Company uses judgments in making these assumptions based on its past history, existing market conditions and certainty of realisation. Also refer Note 10.

Impairment of other financial assets

The loss allowance for other financial assets are based on assumptions about risk of default. The Company uses judgments in making these assumptions based on its past history, existing market conditions and certainty of realisation. Also refer Note 6.

Provision for sales return and date expiry

The Company as per trade practice accepts returns from market which are primarily in the nature of expired or near expiry products. Provisions for such returns are estimated on the basis of historical experience and market conditions and are provided for accordingly. Also refer Note 25.

Non-current assets held for sale

Assets held for sale are measured at the lower of carrying amount or fair value less costs to sell. The determination of fair value less costs to sell includes use of management estimates and assumption. The fair value of the assets held for sale has been estimated using valuation technique i.e. market approach. Also refer Note 16.

Notes :

- The actuarial valuation of plan assets and the present value of the defined benefit obligation were carried out as at March 31, 2018. The present value of the defined benefit obligation and the related current service cost and past service cost, were measured using the Projected Unit Credit Method.
- Discount rate is based on the prevailing market yields of Indian Government securities as at the Balance Sheet date for the estimated term of the obligations.
- The salary escalation rate is arrived after taking into consideration the seniority, the promotion and other relevant factors, such as, demand and supply in employment market.

39 SHARE BASED COMPENSATION TO EMPLOYEES**a) International Stock Ownership Plan (Stocks of Abbott Laboratories, USA, being Ultimate Holding Company)**

Abbott Laboratories, USA has an 'Affiliate Employee Stock Purchase Plan' (employee share purchase plan) whereby specified employees of its subsidiaries have been given a right to purchase shares of Abbott Laboratories, USA. Every employee who opts for the scheme contributes, by way of payroll deductions, up to 10% of his cash remuneration (i.e. basic salary for officers and basic salary and dearness allowance for staff category) towards purchase of shares on a monthly basis over the purchase cycle of six months.

The maximum that an employee can contribute to the plan is US\$ 12,500 per purchase cycle or US\$ 25,000 per calendar year. At the end of the cycle, accumulated payroll deductions are used to purchase shares at a discounted price. The purchase price of the share is 85% of the lesser of fair market value either on the first or last day of the purchase cycle. The shares of Abbott Laboratories, USA are listed with the New York Stock Exchange, USA and are purchased on behalf of the employees at market price less discount, allocated to participants as of last day of the purchase cycle. The concession in the price of the shares is entirely borne by Abbott Laboratories, USA.

During the year ended March 31, 2018, **17,811 shares** (March 31, 2017 : 15,967 shares) were purchased by employees at weighted average fair value of **US\$ 38.71** (March 31, 2017 : US\$ 33.99) per share.

b) Employees Stock Options Plan (Stocks of Abbott Laboratories, USA, being Ultimate Holding Company)

Abbott Laboratories, USA has an 'Incentive Stock Option Program' whereby specified employees of its subsidiaries covered by the plan are granted an option to purchase shares of Abbott Laboratories, USA at a fixed price (grant price), which shall be at least 100% of the fair market value of the common share for a fixed period of time. All the options under this scheme have vested before April 1, 2015, and hence, as per the exemption available in Ind AS 101 'First-time adoption of Indian Accounting Standards', no options compensation expenses are incurred by the Company during the year. The shares of Abbott Laboratories, USA are listed with the New York Stock Exchange, USA. The grants issued are vested in one third installments over a three year period and have a 10 years contractual life.

(All amounts in ₹ Lakhs, unless otherwise stated)

c) Employees Restricted Stock Options Plan (Stocks of Abbott Laboratories, USA, being Ultimate Holding Company)

Abbott Laboratories, USA as part of the 'Long-Term Incentive Program' has offered Restricted Stock Units (RSUs) to specified employees of its subsidiaries, whereby the employees covered by the plan are granted units. The units when vested, become shares of Abbott Laboratories, USA at a NIL Cost. The shares of Abbott Laboratories, USA are listed with the New York Stock Exchange, USA. The grants issued are vested in one third instalments over a three year period. Pursuant to Ind AS 102 'Share-based Payment', the fair value of the RSUs have been recorded by the Company. The fair value of the RSUs is estimated at the grant date using Black Scholes option pricing model, taking into account the terms and conditions upon which such RSUs were granted.

c. Contingent liabilities**Claims against company not acknowledged as debts**

- (i) In February 1996, the Government had made a tentative claim for a sum of ₹ 11,11.66 Lakhs to be paid into the Drugs Prices Equalisation Account (DPEA) on account of unintended benefit allegedly enjoyed by the Company during the period May 1, 1981 to August 25, 1987. This was contested by the Company and subsequently during the year ended November 30, 2005, a final demand was received for ₹ 3,46.64 Lakhs (including interest of ₹ 1,90.39 Lakhs upto March 31, 2004). The Company, being aggrieved of the said demand and based on legal advice obtained in this regard, contested the above final demand of ₹ 3,46.64 Lakhs and filed a writ petition before the Bombay High Court to restrain the government from recovering the said amount. The Bombay High Court has admitted the writ petition and granted stay of the recovery of the amount subject to the Company furnishing a bank guarantee in respect of the principal amount of ₹ 1,56.25 Lakhs. The said bank guarantee has been furnished. The Company however, out of abundant caution and based on its understanding of the facts and circumstances of the case provided for a sum of ₹ **1,11.78 Lakhs** (March 31, 2017 : ₹ 1,07.89 Lakhs) including interest liability till date.

B. Set out below, is a comparison by class of the carrying amounts and fair value of the Company's financial assets/liabilities, other than those with the carrying amounts that are reasonable approximations of fair values :

	Carrying amount	Fair value	Fair value hierarchy		
	As at March 31, 2018	As at March 31, 2018	Quoted prices in active markets Level 1	Significant observable inputs Level 2	Significant unobservable inputs Level 3

Financial liabilities at fair value through Profit or Loss					
Forward contract payable	2,72.80	2,72.80	-	2,72.80	-
	2,72.80	2,72.80	-	2,72.80	-

The following methods and assumptions were used to estimate the fair values :

Fair value of cash and bank balances, short-term loans, trade and other short-term receivables, trade payables, other financial current liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments. Methods and assumptions used to estimate the fair values are consistent with those used for the year ended March 31, 2017.

During the reporting period ending March 31, 2018 and March 31, 2017, there were no transfers between Level 1 and Level 2 fair value measurements.

The Company uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique :

Level 1 : Quoted (unadjusted) prices in active markets for identical assets or liabilities

Level 2 : Other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly

Level 3 : Techniques which use inputs that have a significant effect on the recorded fair value that are not based on observable market data

(All amounts in ₹ Lakhs, unless otherwise stated)

The fair values of the foreign exchange forward contract has been determined using valuation techniques with adequate observable inputs. This model incorporate various inputs including the credit quality of counter parties and foreign exchange forward rates.

Description of significant unobservable inputs to valuation (Level 3) :

The following table shows the valuation techniques and inputs used for financial instruments that are not carried at fair value :

	As at March 31, 2018	As at March 31, 2017
(a) Deposits for premises	Discounted cashflow method using interest rate for similar financial instrument	Discounted cashflow method using interest rate for similar financial instrument
(b) Financial assets/liabilities other than (a) above	Expected cashflows for the financial instruments	Expected cashflows for the financial instruments

A one percentage point change in the unobservable inputs used in fair valuation of level 3 assets or liabilities does not have significant impact in its value.

45 FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The Company's activities expose it to variety of financial risks namely market risk, credit risk and liquidity risk. The Company has various financial assets such as deposits, trade and other receivables and cash and bank balances directly related to their business operations. The Company's principal financial liabilities comprise of trade and other payables.

The Company's senior management's focus is to foresee the unpredictability and minimise potential adverse effects on the Company's financial performance. The Company's overall risk management procedures to minimise the potential adverse effects of financial market on the Company's performance are as follows :

a) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risks namely interest rate risk, currency risk and other price risk, such as commodity risk. The Company is not exposed to other price risk whereas the exposure to currency risk and interest risk is given below :

(i) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's deposit accounts with banks.

Particulars	Carrying Amount	
	As at March 31, 2018	As at March 31, 2017
Fixed rate instruments		
Financial assets	987,35.00	1047,60.00

Fair value sensitivity analysis for fixed rate instruments :

The Company's investments are primarily in fixed rate interest bearing investments. Hence, the Company is not significantly exposed to interest rate risk.

(ii) Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates and arises where transactions are done in foreign currency. It arises mainly where receivables and payables exist due to transactions entered in foreign currencies.

The Company evaluates exchange rate exposure arising from foreign currency transactions and follows established risk management policies including use of derivatives like foreign exchange forward contracts to hedge foreign currency risk. The Company does not enter into financial instrument transactions for trading or speculative purposes. Unhedged exposure at any point of time during the year is not material.

(All amounts in ₹ Lakhs, unless otherwise stated)

The Company's exposure to foreign currency risk is as follows :

Particulars (₹ Lakhs)	As at March 31, 2018				As at March 31, 2017	
	USD	Euro	GBP	CHF	USD	Euro
Trade receivables	7,42.60	-	-	-	5,93.36	-
Other financial assets	92.08	-	0.63	13.64	2,73.57	9,42.12
Trade payables	82,56.89	6.80	-	13.37	109,08.70	6,02.97
Other financial liabilities	-	-	-	-	18.26	-

Foreign currency sensitivity

The following table demonstrate the sensitivity to a reasonably possible change in foreign exchange rates, being the most transacted currencies with all other variables held constant. The exchange rate between Rupee and other foreign currencies have changed substantially in the recent years and may fluctuate substantially in the future. Consequently the results of the Company's operations could be affected as the Rupee appreciates/depreciates against these currencies.

Currency	As at March 31, 2018		As at March 31, 2017	
	1% Increase	1% Decrease	1% Increase	1% Decrease
USD	(74.22)	74.22	(1,00.60)	1,00.60
Euro	(0.07)	0.07	3.39	(3.39)
Increase/(Decrease) in Profit or Loss	(74.29)	74.29	(97.21)	97.21

b) Credit risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. Concentration of credit risk arises when counter parties are engaged in similar business activities or have similar economic features that would cause the ability to meet contractual obligations to be similarly affected by changes in economical, political or other conditions. Concentration of credit risk indicate the relative sensitivity of the Company's performance to developments affecting a particular industry.

Credit risk of company arises principally from the trade debts, loans and advances, trade deposits, other receivables and balance with banks. The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk was ₹ **1578,21.18 Lakhs** as at March 31, 2018 (March 31, 2017 : ₹ 1334,56.50 Lakhs). Customer credit risk is managed for each business unit subject to the Company's established policy, procedures and control relating to customer credit risk management. Credit quality of a customer is assessed based on an extensive credit rating scorecard and individual credit limits are defined in accordance with this assessment. Further, significant sales of the Company are against advance payment /collection on delivery terms. Outstanding customer receivables are regularly monitored and any shipments to new overseas customers are generally covered by letters of credit or other forms of credit insurance. The management continuously monitors the credit exposure towards the customers and makes provision against those balances considered doubtful of recovery.

The ageing of trade receivables and allowance for credit losses is as follows :

Particulars	As at March 31, 2018		As at March 31, 2017	
	Gross	Allowance for credit losses	Gross	Allowance for credit losses
Not yet due	229,49.52	-	152,40.08	-
Past due 1 - 30 days	21,30.99	23.75	18,05.22	7.02
Past due 31 - 60 days	3,61.20	4.43	2,79.37	0.85
Past due 61 - 90 days	4,33.66	46.45	2,59.68	31.60
Over 90 days	16,07.46	10,63.90	12,14.94	11,37.83
	274,82.83	11,38.53	187,99.29	11,77.30

(All amounts in ₹ Lakhs, unless otherwise stated)

Movement in loss allowance of trade receivables and other financial assets :

Particulars	As at March 31, 2018	As at March 31, 2017
Balance at the beginning of the year	14,92.33	14,50.19
Allowance for doubtful debts and advances	1,52.53	2,93.08
Bad debts written off	(1,10.21)	(2,50.94)
Balance at the end of the year	15,34.65	14,92.33

The management believes that no further provision is necessary in respect of trade receivables based on historical trends of these customers. Further, the Company's exposure to customers is diversified and no single customer has significant contribution to trade receivables balances.

The credit risk on liquid funds such as balances with banks in current and deposit accounts is limited because the counter parties are banks with reasonably high credit ratings.

Financial assets other than trade receivables and bank balances are not exposed to any material credit risk.

c) Liquidity risk

Liquidity risk is the risk that company will not be able to meet its financial obligations as they fall due. Liquidity risk arises because of the possibility that the company could be required to pay its liabilities earlier than expected or encounters difficulty in raising funds to meet commitments associated with financial liabilities as they fall due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due. The Company manages liquidity risk by maintaining sufficient cash and bank balance and availability of funding through adequate amount of committed credit facilities.

The details of the contractual maturities of significant liabilities as at March 31, 2018 are as follows :

Particulars	Carrying Amount	Less than 1 year	1-3 years	3-5 years	More than 5 years	Total
Trade payables (Refer note 21)	480,62.48	480,62.48	-	-	-	480,62.48

46 CAPITAL MANAGEMENT

For the purpose of the Company's capital management, capital includes issued equity capital and all other equity reserves attributable to the equity holders of the Company. The primary objective of the Company's capital management is to safeguard the Company's ability to remain as a going concern and maximise the shareholder value.

The Company manages its capital structure and makes adjustments in light of changes in economic conditions, annual operating plans and long-term and other strategic investment plans. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders or issue new shares. The current capital structure

(All amounts in ₹ Lakhs, unless otherwise stated)

of the Company is equity based with no financing through borrowings. The Company is not subject to any externally imposed capital requirements.

No changes were made in the objectives, policies or processes for managing capital during the years ended March 31, 2018 and March 31, 2017.

47 STANDARDS ISSUED BUT NOT YET EFFECTIVE

The standards issued, but not yet effective upto the date of issuance of the Company's financial statements is disclosed below. The Company shall adopt this standard when it becomes effective.

Ind AS 115 Revenue from Contracts with Customers :

On March 28, 2018, Ministry of Corporate Affairs ("MCA") has notified Ind AS 115 Revenue from Contracts with Customers. Ind AS 115 establishes a five-step model to account for revenue arising from contracts with customers and requires revenue to be recognised when promised goods or services are transferred to the customers in amounts that reflect the consideration to which the Company expects to be entitled in exchange for those goods or services. Further the new standard requires enhanced disclosures about the nature, timing, amount and uncertainty of revenue and cash flows arising from the entity's contracts with the customers.

The new revenue standard supersedes all current revenue recognition requirements under Ind AS. Either a full retrospective application or a modified retrospective application is required for annual periods beginning on or after April 1, 2018. The Company will adopt the standard on April 1, 2018 by using the modified retrospective approach and accordingly comparatives for the year ending March 31, 2019 will not be retrospectively adjusted.

The Company has undertaken a review of main types of commercial arrangements entered into with customers under this model and has performed an analysis of the impact, including areas such as variable consideration, right of return and agent relationships and has concluded that the standard will not have a material impact on the revenue streams from the supply of goods, its associated rebates and return provisions. The present timing of the recognition of product sales and the basis of estimates of sales deductions are consistent with those adopted under Ind AS 115.

Based on the analysis, it is assessed that the standard will not have any significant impact on revenue recognition or measurement compared to current practice.

48 RECENT ACCOUNTING PRONOUNCEMENTS

Appendix B to Ind AS 21, Foreign currency transactions and advance consideration :

On March 28, 2018, Ministry of Corporate Affairs ("MCA") has notified the Companies (Indian Accounting Standards) Amendment Rules, 2018 containing Appendix B to Ind AS 21, Foreign currency transactions and advance consideration which clarifies the date of the transaction for the purpose of determining the exchange rate to use on initial recognition of the related asset, expense or income, on the derecognition of a non-monetary asset or non-monetary liability relating to advance consideration. The Appendix is effective for annual period beginning on or after April 1, 2018.

49 The Company has bank overdraft arrangement secured by hypothecation of all stocks and book debts, against which there are no borrowings.

50 Previous year's figures have been regrouped/reclassified to conform to the current year's classification.
