(i) Management's estimation on the impact of audit qualification.

- 1) The company settles the gratuity liability of the employees as and when the said employee leaves the organisation. The company in view of its being declared sick industrial Company and referred to BIFR in the earlier year's, could not ascertain and make provision in the accounts for its accrued gratuity liability. However, steps are being taken and the company is in the process of ascertaining its accrued liability on account of gratuity. Pending such ascertainment, no provision for gratuity has been made in the accounts. Further company do not have the policy of allowing the employees to encash leave at their credit while in service and hence no provision for the liability if any towards encashment of leave for those employees who are still in service.
- 2) As already reported, the company has completed the verification of continuing assets which are in use after the closure of the BOPP division. However, the company is in the process of shifting its production facilities to its own premises at Ranipet. Pending of the shifting activity, the company is yet to ascertain the impairment of assets, if any, of the value of assets.
- 3) The company is in the process of ascertaining the cost of each of the product dealt by it and pending such ascertainment the inventories are continued to be valued, as in the previous year, at the net billing price.

ii) If Management is unable to estimate the impact, reasons for the same: N/A

iii) Auditors' comments on (i) or (ii) above

- 1) In respect of gratuity accrued, the company has not ascertained the same on actuarial basis nor provided for it in the accounts. Further the company has not ascertained accrued leave cash benefit payable to its employees. Accordingly, the company accounts both gratuity and leave encashment as and when paid.
- 2) Company is in the process of ascertaining of the impairment, if any on any of the fixed assets subject to such ascertainment, there has been no financial impact on accounts of the company with regard to impairment of the fixed assets.
- 3) Closing stock of inventory pertaining to finished products comprising of different individual products is valued on the basis of net billing price of such product. Hence, it is not possible to ascertain the financial impact due to the fact that the company has not been able to arrive at the cost price of each such product.
