KPIT and Coventry University collaboration wins “Outstanding Course Team Award” at the Coventry University Excellence Awards 2018

Pune, India; July 2, 2018: KPIT Technologies (BSE: 532400; NSE: KPIT), a global technology company specializing in product engineering and IT consulting announced that its Master’s degree programs in Automotive Electronics and Strategic Engineering Management for employees, in collaboration with Coventry University, was honored with the prestigious award under the category of “**Outstanding Course Team**” at the Annual Coventry University Excellence Awards. It won the recognition for its unique and trend-setting approach.

The industry-academia collaboration is strategic for both the entities as there is significant overlap in the areas of research and development. As Automotive industry is going through major changes such as autonomous driving, electrification, cybersecurity, connected vehicles, advanced vehicle diagnostics etc., technology firms need to skill and upgrade their workforce with new-generation engineering capabilities that serve the changing customer landscape.

To navigate the transition and promote employee competence development, KPIT and Coventry University collaborated to introduce two specialized programs—M. Tech in Automotive Electronics and MBA in Strategic Engineering Management— exclusively for KPIT employees in Bangalore and Pune. The two-year programs comprise eight modules and a project, all co-created, co-designed, and co-delivered by the faculty members of Coventry University and subject matter experts from KPIT. The courses are practical and application-oriented, flexible, and contemporary while also meeting the highest levels of QAA (Quality Assurance Agency) standards.

While the courses are available at the KPIT campus, there is no deviation in the process, rules, etc., that Coventry University follows for the programs conducted at its institutes.

Prof. KNS Acharya, Vice President - Global Head of Education & Competency Development, Talent Acquisition Group at KPIT, said, *“This award is a testimony to KPIT’s commitment to cultivating an environment that enhances learning and development of its employees. The collaboration with Coventry University is enabling our employees in gaining more knowledge about their areas of interest, industry trends, and technology disruptions while also getting an understanding of the business operations in the fast-evolving automotive space. We are honored to receive this award and extend our gratitude to the university and the leadership council, employees, and the learning and development teams of KPIT. It has created a unified platform for academicians and industry leaders for spreading knowledge.”*

The Coventry University Excellence Awards recognizes teams who demonstrate exceptional practice and commitment to the University Group. The university received applicants from all its specialization centers including the schools of medicine, law, business, healthcare, engineering, architecture, etc. This year’s awards also marked the 175th year of Coventry University’s anniversary celebrations.
