Solix Wins 2018 Frost & Sullivan Award for Global Enterprise Data Platforms Product Leadership

Solix Common Data Platform recognized as a leading enterprise data platform and information lifecycle management framework

August 7, 2018 — Santa Clara, Calif. — Solix Technologies, Inc. (**www.solix.com**), a leading Big Data application provider for empowering data-driven enterprises, has been awarded Frost & Sullivan's prestigious 2018 award for Global Enterprise Data Platforms Product Leadership. The award highlights the Solix Common Data Platform as a key solution for meeting GDPR requirements.

The Solix Common Data Platform (CDP) is the only true enterprise-ready Big Data management product for the next generation of data-driven enterprises. It helps companies better organize, manage, and process all of their enterprise data for advanced analytics, compliance, infrastructure optimization, and data security. The Solix CDP employs Information Lifecycle Management (ILM) to support all enterprise data throughout its life cycle, and does so by classifying data at creation and implementing a retention policy with legal hold support for all enterprise data until deletion.

"The automatic discovery and classification of sensitive personally identifiable information is one of the features of the Solix Common Data Platform we are most impressed by," says Alexander Michael, Director, Frost & Sullivan, ICT Practice. *"It is clever to mask or encrypt data at the information management level and to apply tiered storage and automatically delete data past consent expiration. The Solix approach avoids tinkering with the myriad of applications that could be capturing data. Solix eliminates a big GDPR compliance risk,"* Mr Michael adds.

Each year, Frost & Sullivan presents the Global Enterprise Data Platforms Product Leadership Award to an organization that has demonstrated a comprehensive product line, filled with high-quality, value-driven options, by evaluating two key factors: Product Family Attributes and Business Impact.

"We are honored to receive Frost & Sullivan's award for Global Enterprise Data Platforms Product Leadership," said Sai Gundavelli, Founder/CEO, Solix Technologies. *"With GDPR now well underway, we are committed to providing organizations with the solutions necessary to meet global data governance and compliance requirements."*

The Solix CDP is cloud-ready software. Key capabilities include:

- Object Workbench: Uniform data collection of structured and unstructured data, ETL and metadata repository.
- Data Governance Workbench: Sensitive data discovery, data masking and encryption, role based access control, retention management, ILM, GDPR, PHI, PCI and FISMA compliance frameworksM
- Analyst Workbench: Data preparation, data visualization, search, business intelligence and analytics
- Enterprise archiving and data lake: Real-time data hub architecture for scalable processing with low cost bulk data storage
- CDP API 1.0: Certified API support for Solix App Store solutions
- S3 storage support: API support for Amazon S3 (Simple Storage Service).
