IMPLEMENTATION OF INDIAN ACCOUNTING STANDARDS (IndAS)

Financial year 2017-18 is the first year of implementation of Indian Accounting Standard for the year compared. The Financial Statements for the year ended 31.3.2018 have been prepared in accordance with the Indian Accounting Standard (Ind AS) notified under Section 133 of the Companies Act, 2013 read with Companies (Accounts) Rules, 2014 and other relevant provisions of the Act. The Financial Statements for the year ended 31.3.2017 have been restated in accordance with Ind AS for compliance purposes. Detailed information on the impact of the transition from previous GAAP to Ind As is provided in the annexed Financial Statements.

REVIEW OF OPERATIONS

The performance of the Spinning unit was affected by the steep decline in prices of yarn in the second and third quarters of the financial year 2017-18 consequent to unwinding of inventory post introduction of Goods & Service Tax (GST) effective from 1st July 2017. The performance of Windmill units continued to be satisfactory during the year as TANGEDCO was able to evacuate the wind energy generated with minimum back out which helped the Company to reduce its dependence on outside power and also contributed to the Profits of the Company.

During the year under review, the spinning unit produced 7202.19 tonnes (7233.11 tonnes) of yarn, of which 461.80 tonnes (2270.67 tonnes) was used to produce knitted fabrics. The unit sold 6548.66 tonnes (5165.12 tonnes) of yarn and 580.30 tonnes (2327.79 tonnes) of knitted fabrics out of which exports accounted for 662.66 tonnes (1223.97 tonnes). Further, during the year under review, the Company sold 2073.44 tonnes (2275.08 tonnes) of waste cotton, of which exports accounted for 693.12 tonnes (245.16 tonnes).

The Wind Mills with aggregate installed capacity of 10.65 MW generated 192.30 lakh units (192.52 lakh units) of Wind Electricity during the year. The entire power generated by the wind mills were utilized for captive consumption at the textile mill.

The overall sales turnover of the Company aggregated to Rs. 17094.35 Lakhs (Rs.16899.84 Lakhs) of which exports including Merchant exports amounted to Rs.1477.41 Lakhs (Rs. 2592.75 Lakhs), the exports contributing 8.64% of the overall sales of the Company.

The performance of the Spinning Unit in terms of profitability was affected by steep decline in prices of yarn due to supply/demand mismatch in the second half of the year. However the significant improvement in Wind Electricity generated for captive use, helped the Company to achieve improved Profits during the year under review.

PROSPECTS FOR THE CURRENT YEAR

The demand for Cotton yarn in both domestic and export markets has started improving and is expected to remain stable in the current year. Though there has been an increase in prices of Cotton and other overheads, the yarn prices are also likely to stay firm due to the expected increase in demand for yarn. Hence the performance of the Spinning unit is set to improve in the current year as compared to the previous year 2017-18. The contribution from Windmills is dependent on availability of Wind of adequate velocity and its evacuation by TANGEDCO.

EVENT SUBSEQUENT TO THE DATE OF FINANCIAL STATEMENTS

There were no material changes and commitments affecting the financial position of the Company subsequent to the end of the financial year.

PUBLIC DEPOSITS

The Company has not accepted any public deposits within the meaning of Section 73 to 76 of the Companies Act, 2013 read with the Companies (Acceptance of Deposits) Rules, 2014 during the year under review.

SCHEME OF ARRANGEMENT (DEMERGER) - ALLOTMENT OF SHARES

In consideration of Demerger including the transfer and vesting of Demerged Undertaking in the Resulting Company, members of Demerged Company viz., Shiva Texyarn Limited whose name is recorded in the Register of Members on the record date i.e., 6.11.2017, were allotted 86,41,808 equity shares of Rs.10/- each on 23.11.2017 in the ratio of 2 (two) fully paid-up equity share of Rs.10/- each in the Resulting Company viz., Shiva Mills Limited for every 5 (five) equity share of Rs.10/- each fully paid-up, held by such member in the Demerged Company.

Further equity share capital for an amount of Rs.5,00,000/- represented by 50,000 equity shares of Rs.10/- each held by Shiva Texyarn Limited, were cancelled and transferred to General Reserve, as per the Scheme of

SHIVA MILLS LIMITED

(Formerly STYL TEXTILE VENTURES LIMITED)

Arrangement (Demerger). Consequently Shiva Texyarn Limited ceased to be the Holding Company of Shiva Mills Limited.

LISTING OF EQUITY SHARES

Stock Exchanges both BSE Limited and National Stock Exchange of India Limited were approved the listing of 86,41,808 Equity shares with effect from 21.2.2018 and the trading commenced w.e.f. 26.2.2018 in both the stock exchanges.

MANAGEMENT DISCUSSION AND ANALYSIS

COMPANY'S BUSINESS

The Company's principal line of business is manufacturing and marketing of Cotton Yarn. The Company has a spinning unit near Dindigul, Tamilnadu with an installed capacity of 39072 spindles and 22 Windmills with an installed capacity of 10.65 MW.

INDUSTRY STRUCTURE AND DEVELOPMENTS

Textile Industry is one of India's oldest industry with a formidable presence in the national economy. The Indian textiles industry, currently estimated at around US\$ 120 billion, is expected to reach US\$ 230 billion by 2020. The Indian Textile Industry contributes approximately 4 per cent to India's Gross Domestic Product (GDP), 10 per cent of manufacturing production and 14 per cent to overall Index of Industrial Production (IIP). Thus the growth and all round development of this Industry has a direct bearing on the improvement of the economy of the Country.

OPPORTUNITIES

India has the second largest installed spindle capacity in the world. Indian spinning sector is highly advanced and competent globally in terms of price, quality and standards. Rising per capita income, higher disposable incomes, favorable demographics and shift in preference for branded products offer excellent opportunity for the Industry to drive growth.

OUTLOOK

The outlook for Indian textile industry remains optimistic, as demand is expected to pick up on account of improving economic sentiments in both domestic and export markets. The slowdown in domestic demand for textiles due to demonetisation and the Goods and Services Tax (GST) implementation has bottomed out and hence the outlook remains positive for the Industry.

RISKS AND CONCERNS

Availability of Cotton, the main raw material for manufacture of Cotton Yarn, is subject to the vagaries of nature and the prices also fluctuate wildly based on supply/demand in the World market and Government policy on export of Cotton. Availability of labour, competition from Countries having preferential trade agreement with developed economies, fluctuations in foreign exchange markets are some of the risks faced by the textile industry.

INTERNAL CONTROL SYSTEM AND THEIR ADEQUACY

The Company has adequate internal control procedures and systems commensurate with its size and nature of its business for purchase of raw materials, plant and machinery, components and other items and sale of goods. The checks and controls are reviewed by the Audit Committee for improvement in each of these areas on a periodical basis. The internal control systems are improved and modified continuously to meet with changes in business conditions, statutory and accounting requirements.

FINANCIAL PERFORMANCE WITH RESPECT TO OPERATIONAL PERFORMANCE

The financial performance of the Company has been discussed at length in Director's Report to the Members.

CERTIFICATE ON CORPORATE GOVERNANCE

To

The Members of

Shiva Mills Limited

(CIN: L17111TZ2015PLC022007)

I have examined the compliance of conditions of Corporate Governance by Shiva Mills Limited ('the company'), for the year ended on 31st March, 2018 as referred in Regulation 15(2) of the Securities Exchange Board of India (SEBI) Listing Obligations and Disclosure Requirements (LODR) Regulations, 2015.

The compliance of conditions of Corporate Governance is the responsibility of the Management. My examination was limited to a review of the procedures and implementation thereof adopted by the Company for ensuring the compliance with the conditions of the Corporate Governance as stipulated in the said Listing Regulations. It is neither an audit nor an expression of opinion on the financial statements of the Company.

In my opinion and to the best of my information and according to the explanations given to me and based on the representations made by the Directors and the Management, I certify that the Company has complied with the conditions of Corporate Governance as stipulated in the Securities Exchange Board of India (SEBI) Listing Obligations and Disclosure Requirements (LODR) Regulations, 2015.

I further state that such compliance is neither an assurance as to future viability of the Company nor the efficiency or effectiveness with which the management has conducted the affairs of the Company.

INDEPENDENT AUDITORS' REPORT

To the Members of Shiva Mills Limited

1. Report on the Financial Statements

We have audited the accompanying Ind AS financial statements of Shiva Mills Limited (“the Company”), which comprise the Balance Sheet as at 31st March, 2018, the Statement of Profit and Loss (including Other Comprehensive Income), the Cash Flow Statement and the Statement of Changes in Equity for year then ended and a summary of significant accounting policies and other explanatory information.

2. Management's Responsibility for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 (“the Act”) with respect to the preparation of these Ind AS financial statements that give a true and fair view of the financial position and financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) prescribed under Section 133 of the Act.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

3. Auditor's Responsibility

Our responsibility is to express an opinion on these Ind AS financial statements based on our audit. We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made there under.

We conducted our audit in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the

Company's preparation of the financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Company's Directors, as well as evaluating the overall presentation of the Ind AS financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Ind AS financial statements.

4. **Opinion**

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Ind AS financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2018, and its Profit, total comprehensive income, its cash flows and the changes in equity for the year ended on that date.

5. **Report on Other Legal and Regulatory Requirements**

1. As required by the Companies (Auditor's Report) Order, 2016 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of Section 143 of the Act, we give in the Annexure - A, a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
2. **As required by Section 143(3) of the Act, we report that:**
 - (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
 - (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
 - (c) The Balance Sheet, the Statement of Profit and Loss, and the Cash Flow Statement dealt with by this Report are in agreement with the books of account.
 - (d) In our opinion, the aforesaid financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.
 - (e) On the basis of the written representations received from the directors as on 31st March, 2018 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2018 from being appointed as a director in terms of Section 164 (2) of the Act.
 - (f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate report in Annexure - B.

- (g) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
- i. The Company does not have any pending litigations which would impact its financial position.

ANNEXURE - B TO INDEPENDENT AUDITORS' REPORT

Report on the Internal Financial Controls under Clause

(i) of sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Shiva Mills Limited ("the Company") as of 31st March, 2018 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March, 2018, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India.

Notes to the financial statements for the year ended March 31, 2018

1. Corporate Information

Shiva Mills Limited (“the Company”) is engaged in the manufacturing of cotton yarn products. The Company has its registered office at Coimbatore and factory in Dindigul.

2. Significant Accounting Policies

This note provides a list of the significant accounting policies adopted in the preparation of these financial statements. These policies have been consistently applied to all the years presented, unless otherwise stated.

2.1 Basis of accounting and preparation of financial statements

(i) Compliance with Ind AS

The financial statements comply in all material aspects with Indian Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013 (the Act) [Companies (Indian Accounting Standards) Rules, 2015] and other relevant provisions of the Act. The financial statements up to year ended March 31 2017 were prepared in accordance with the accounting standards notified under Companies (Accounting Standards) Rules, 2006 (as amended) and other relevant provisions of the Act. These financial statements are the first financial statements of the company under Ind AS. Refer note 33 for an explanation of how the transition from previous GAAP to Ind AS has affected the company’s financial position, financial performance and cash flows.

(ii) Historical cost convention

The financial statements have been prepared on a historical cost basis, except for the following:

- (a) certain financial assets and liabilities that are measured at fair value and
- (b) defined benefit plans – plan assets measured at fair value

2.2 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The board of directors of the Company assesses the financial performance and position of the Company, and makes strategic decisions. The board of directors has been identified as being the chief operating decision maker.

2.2 Use of estimates

In the application of the Company’s accounting policies, the directors of the Company are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

a. Useful lives of property, plant and equipment

The Company reviews the useful life of property, plant and equipment at the end of each reporting period. This assessment may result in change in the depreciation expense in future periods.

b. Employee Benefits

The cost of defined benefit plans are determined using actuarial valuations. The actuarial valuation involves making assumptions about discount rates, expected rates of return on assets, future salary increases, mortality rates and future pension increases. Due to the long-term nature of these plans, such estimates are subject to significant uncertainty.

Notes to the financial statements for the year ended March 31, 2018

2.3 Inventories

Inventories are valued at lower of cost and net realisable value. Cost of raw materials, Packing materials, Stores and Spares and consumables are valued at Cost on weighted average cost basis. Value of finished goods and work-in-progress are determined on weighted average cost basis and include appropriate share of overheads.

2.4 Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and demand deposits with banks other than deposits pledged with government authorities and margin money deposits.

Cash and cash equivalent in the Balance Sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to insignificant risk of changes in value. Bank borrowings are generally considered to be financing activities. However, where bank overdrafts which are repayable on demand form an integral part of an entity's cash management, bank overdrafts are included as a component of cash and cash equivalents. A characteristic of such banking arrangements is that the bank balance often fluctuates from being positive to overdrawn.

2.5 Cash flow statement

Cash flows are reported using the indirect method, whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

2.6 Taxes on income

a) Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's current tax is calculated using tax rates that have been enacted and are applicable as at the end of the reporting period. In the absence of adequate taxable profits, the Company is required to pay Minimum Alternate Tax (MAT) on the book profits, as adjusted for certain provisions.

b) Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

MAT paid in accordance with the tax laws, if any, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal tax. Accordingly, MAT is recognised as a deferred tax asset in the Balance sheet when it is highly probable that future economic benefit associated with it will flow to the Company.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Notes to the financial statements for the year ended March 31, 2018

c) Current and deferred tax for the year

Current and deferred tax are recognised in the Statement of profit and loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

2.7 Property, plant and equipment

The cost of property, plant and equipment comprises its purchase price net of any trade discounts and rebates, any import duties and other taxes (other than those subsequently recoverable from the tax authorities), any directly attributable expenditure on making the asset ready for its intended use, including relevant borrowing costs for qualifying assets and any expected costs of decommissioning. Expenditure incurred after the property, plant and equipment have been put into operation, such as repairs and maintenance, are charged to the Statement of Profit and Loss in the period in which the costs are incurred. Major shut-down and overhaul expenditure is capitalised as the activities undertaken improves the economic benefits expected to arise from the asset.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in Statement of Profit and Loss.

Property, plant and equipment except freehold land held for use in the production, supply or administrative purposes, are stated in the balance sheet at cost less accumulated depreciation and accumulated impairment losses, if any.

Freehold land and leasehold land where the lease is convertible to freehold land under lease agreements at future dates at no additional cost, are not depreciated.

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets. However, when there is no reasonable certainty that ownership will be obtained by the end of the lease term, assets are depreciated over the shorter of the lease term and their useful lives.

Capital work-in-progress:

Projects under which assets are not ready for their intended use and other capital work-in-progress are carried at cost, comprising direct cost and related incidental expenses.

Depreciation commences when the assets are ready for their intended use. Depreciable amount for assets is the cost of an asset, or other amount substituted for cost, less its estimated residual value. Depreciation is recognized so as to write off the cost of assets (other than freehold land and properties under construction) less their residual values over their useful lives, using straight-line method as per the useful life prescribed in Schedule II to the Companies Act, 2013

The Company reviews the residual value, useful lives and depreciation method annually and, if expectations differ from previous estimates, the change is accounted for as a change in accounting estimate on a prospective basis.

2.8 Leases

a Where the company is Lessee:

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

Lease arrangements where the risks and rewards incidental to ownership of an asset substantially vest with the lessor are recognised as operating leases. Lease rentals for non-cancellable leases are recognised in the Statement of Profit and Loss on a straight-line basis over the period of lease where the lease payments are structured to increase in line with expected general inflation.

Notes to the financial statements for the year ended March 31, 2018

b Where the company is Lessor:

Lease income from operating leases where the Company is a lessor is recognised in income on a straight-line basis over the lease term unless the receipts are structured to increase in line with expected general inflation to compensate for the expected inflationary cost increases. The respective leased assets are included in the balance sheet based on their nature.

2.9 Revenue recognition

a Sale of goods

Revenue from the sale of goods is recognised when the goods are dispatched/delivered and titles have passed, at which time all the following conditions are satisfied:

- the Company has transferred to the buyer the significant risks and rewards of ownership of the goods;
- the Company retains neither continuing managerial involvement to the degree associated with ownership nor effective control over goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the Company; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably

b Sale of services

The Company recognises revenue when the significant terms of the arrangement are enforceable, services have been delivered and the collectability is reasonably assured.

c Other operating revenue

- Income incidental to exports such as income from import entitlement and premium on sale of such entitlement are recognised when there is a reasonability of collection
- Income from windmills denotes income earned by sale or transfer of electricity to Tamil Nadu Electricity Board and the income accrued for which billing is pending.

2.10 Other income

Interest

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable.

Dividend

Dividend Income from investments is recognised when the shareholder's right to receive payment has been established (provided that it is probable that economic benefits will flow to the Company and the amount of income can be measured reliably).

2.11 Employee benefits

Employee benefits include provident fund, employee state insurance, gratuity fund and compensated absences.

a. Retirement benefit costs and termination benefits

Payments to defined contribution Retirement Benefit Plans are recognised as an expense when employees have rendered service entitling them to the contributions.

Notes to the financial statements for the year ended March 31, 2018

For defined benefit Retirement Benefit Plans, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. Remeasurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding net interest), is reflected in the balance sheet with a charge or credit recognised in other comprehensive income in the period in which they occur. Remeasurement recognised in other comprehensive income is reflected immediately in retained earnings and is not reclassified to profit or loss. Past service cost is recognised in profit or loss in the period of a plan amendment. Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset.

b. Defined benefit costs are categorised as follows:

- service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements);
- net interest expense or income; and
- remeasurement

For defined benefit plan, in the form of gratuity fund, the cost of providing benefits is determined using the Projected Unit Credit method, with actuarial valuations being carried out at each Balance Sheet date. Actuarial gains and losses are recognised in the Statement of Profit and Loss in the period in which they occur. The retirement benefit obligation recognised in the Balance Sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost, as reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited to past service cost, plus the present value of available refunds and reductions in future contributions to the scheme. The gratuity fund is maintained with Life Insurance Corporation of India.

The Company presents the first two components of defined benefit costs in profit or loss in the line item 'Employee benefits expenses'. Curtailment gains and losses are accounted for as past service costs.

The retirement benefit obligation recognised in the balance sheet represents the actual deficit or surplus in the Company's defined benefit plan. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

A liability for a termination benefit is recognised at the earlier of when the entity can no longer withdraw the offer of the termination benefit and when the entity recognises any related restructuring costs.

Short-term and other long term employee benefits

A liability is recognised for benefits accruing to employees in respect of wages and salaries, annual leave and sick leave in the period the related service is rendered at the undiscounted amount of the benefits expected to be paid in exchange for that service.

Liabilities recognised in respect of short term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service.

Liabilities recognised in respect of other long term employee benefits are measured at the present value of the estimated future cash outflows expected to be made by the Company in respect of services provided by employees up to the reporting date.

2.12 Foreign currency transactions and translations

(i) Functional and presentation currency

Items included in the financial statements of the Company are measured using the currency of the primary economic environment in which the Company operates ('the functional currency'). The financial statements are presented in Indian rupee (INR), which is the Company's functional and presentation currency.

Notes to the financial statements for the year ended March 31, 2018

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognised in profit or loss.

Foreign exchange differences regarded as an adjustment to borrowing costs are presented in the statement of profit and loss, within finance costs. All other foreign exchange gains and losses are presented in the statement of profit and loss on a net basis within other gains/(losses).

2.13 Borrowings and Borrowing cost

Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption value is recognised in the income statement over the period of the borrowings using the effective interest rate method. Borrowings are classified as current liabilities unless the Company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation. All other borrowing costs are recognised in statement of profit and loss in the period in which they are incurred.

2.14 Earnings per share

Basic earnings per share is computed by dividing the profit / (loss) after tax by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the profit / (loss) after tax as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares.

2.15 Provisions and contingencies

A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates. Contingent liabilities are disclosed in the Notes.

2.16 Financial Instruments

All financial instruments are recognised initially at fair value. Transaction costs that are attributable to the acquisition of the financial asset (other than financial assets recorded at fair value through profit or loss) are included in the fair value of the financial assets. Purchase or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trade) are recognised on trade date. While, financial liabilities like loans and borrowings and payables are recognised net of directly attributable transaction costs.

For the purpose of subsequent measurement, financial instruments of the Company are classified in the following categories: non-derivative financial assets comprising amortised cost, debt instruments at fair value through other comprehensive income (FVTOCI), equity instruments at FVTOCI or fair value through profit and loss account (FVTPL) and financial liabilities at amortised cost or FVTPL.

Notes to the financial statements for the year ended March 31, 2018

The classification of financial instruments depends on the objective of the business model for which it is held. Management determines the classification of its financial instruments at initial recognition.

1) Non-derivative financial assets

(i) Financial assets at amortised cost

A financial asset shall be measured at amortised cost if both of the following conditions are met:

- (a) the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and
- (b) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

They are presented as current assets, except for those maturing later than 12 months after the reporting date which are presented as non-current assets. Financial assets are measured initially at fair value plus transaction costs and subsequently carried at amortized cost using the effective interest method, less any impairment loss.

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or where appropriate, a shorter period, to the gross carrying amount on initial recognition.

Financial assets at amortised cost are represented by trade receivables, security deposits, cash and cash equivalents, employee and other advances and eligible current and non-current assets.

Income is recognised on an effective interest basis for debt instruments other than those financial assets classified as at FVTPL. Interest income is recognised in profit or loss and is included in the "Other Income" line item.

2) Equity instruments at FVTOCI

All equity instruments are measured at fair value. Equity instruments held for trading is classified as FVTPL. For all other equity instruments, the Company may make an irrevocable election to present subsequent changes in the fair value in OCI. The Company makes such election on an instrument-by-instrument basis.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividend are recognised in OCI which is not subsequently recycled to statement of profit and loss.

3) Financial assets at FVTPL

FVTPL is a residual category for financial assets. Any financial asset which does not meet the criteria for categorization as at amortised cost or as FVTOCI, is classified as FVTPL

In addition the Company may elect to designate the financial asset, which otherwise meets amortised cost or FVOCI criteria, as FVTPL if doing so eliminates or significantly reduces a measurement or recognition inconsistency.

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any dividend or interest earned on the financial asset and is included in the 'Other income' line item. Dividend on financial assets at FVTPL is recognised when the Company's right to receive the dividends is established, it is probable that the economic benefits associated with the dividend will flow to the entity, the dividend does not represent a recovery of part of cost of the investment and the amount of dividend can be measured reliably.

Notes to the financial statements for the year ended March 31, 2018

4) Derecognition of financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in profit or loss if such gain or loss would have otherwise been recognised in profit or loss on disposal of that financial asset.

On derecognition of a financial asset other than in its entirety (e.g. when the Company retains an option to repurchase part of a transferred asset), the Company allocates the previous carrying amount of the financial asset between the part it continues to recognise under continuing involvement, and the part it no longer recognises on the basis of the relative fair values of those parts on the date of the transfer. The difference between the carrying amount allocated to the part that is no longer recognised and the sum of the consideration received for the part no longer recognised and any cumulative gain or loss allocated to it that had been recognised in other comprehensive income is recognised in profit or loss if such gain or loss would have otherwise been recognised in profit or loss on disposal of that financial asset. A cumulative gain or loss that had been recognised in other comprehensive income is allocated between the part that continues to be recognised and the part that is no longer recognised on the basis of the relative fair values of those parts.

5) Non-derivative financial liabilities

(i) Financial liabilities at amortised cost

Financial liabilities at amortised cost represented by borrowings, trade and other payables are initially recognized at fair value, and subsequently carried at amortized cost using the effective interest rate method.

(ii) Financial liabilities at FVTPL

Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any interest paid on the financial liability and is included in the 'Finance costs' line item. The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or they expire. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in Statement of Profit and Loss.

For financial liabilities that are denominated in a foreign currency and are measured at amortised cost at the end of each reporting period, the foreign exchange gains and losses are determined based on the amortised cost of the instruments and are recognised in the statement of profit and loss. The fair value of financial liabilities denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of the reporting period. For financial liabilities that are measured as at FVTPL, the foreign exchange component forms part of the fair value gains or losses and is recognised in profit or loss.

(iii) Derecognition of non-derivative financial liabilities

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. An exchange between with a lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability (whether or not attributable to the financial difficulty of the debtor) is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

Notes to the financial statements for the year ended March 31, 2018

2.17 Impairment

(a) Financial Assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss. The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivable. The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If in subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECLs are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12-months after the reporting date.

ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e. all shortfalls), discounted at the original EIR. When estimating the cash flows, an entity is required to consider:

- i) All contractual terms of the financial instrument (including prepayment, extension etc.) over the expected life of the financial instrument. However, in rare cases when the expected life of the financial instrument cannot be estimated reliably, then the entity is required to use the remaining contractual term of the financial instrument.
- (ii) Cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

As practical expedient, the Company uses a provision matrix to determine impairment loss on portfolio of its trade receivable. The provision matrix is based on its historically observed default rates over the expected life of the trade receivable and is adjusted for forward-looking estimates. At every reporting date, the historically observed default rates are updated and changes in forward-looking estimates are analysed.

ECL impairment loss allowance (or reversal) recognised during the year is recognised as income/expense in the statement of profit and loss. The balance sheet presentation for various financial instruments is described below:

Financial assets measured at amortised cost, contractual revenue receivable: ECL is presented as an allowance, i.e. as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the net carrying amount. Until the asset meets write off criteria, the Company does not reduce impairment allowance from the gross carrying amount.

(b) Non-financial assets

The Company assesses at each reporting date whether there is any objective evidence that a non financial asset or a group of non financial assets is impaired. If any such indication exists, the Company estimates the amount of impairment loss.

An impairment loss is calculated as the difference between an asset's carrying amount and recoverable amount. Losses are recognised in profit or loss and reflected in an allowance account. When the Company considers that there are no realistic prospects of recovery of the asset, the relevant amounts are written off. If the amount of impairment loss subsequently decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, then the previously recognised impairment loss is reversed through profit or loss.

The recoverable amount of an asset or cash-generating unit (as defined below) is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For the

Notes to the financial statements for the year ended March 31, 2018

purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the “cash-generating unit”).

2.18 Government grants

Grants from the government are recognised when there is reasonable assurance that:(i) the Company will comply with the conditions attached to them; and(ii) the grant will be received.

Government grants related to revenue are recognised on a systematic basis in the statement of profit and loss over the periods necessary to match them with the related costs which they are intended to compensate. Such grants are deducted in reporting the related expense. When the grant relates to an asset, it is recognized as income over the expected useful life of the asset.

Where the Company receives non-monetary grants, the asset is accounted for on the basis of its acquisition cost. In case a non-monetary asset is given free of cost it is recognised at a fair value. When loan or similar assistance are provided by government or related institutions, with an interest rate below the current applicable market rate, the effect of this favourable interest is recognized as government rate. The loan or assistance is initially recognized and measured at fair value and the government grant is measured as the difference between the initial carrying value of the loan and the proceeds received.

2.19 Operating cycle

Based on the nature of products / activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

The Company uses a provision matrix to determine impairment loss on portfolio of its trade receivable. The provision matrix is based on its historically observed default rates over the expected life of the trade receivable and is adjusted for forward- looking estimates. At every reporting date, the historical observed default rates are updated and changes in forward-looking estimates are analysed. Based on such estimates the above provision has been made.

Description of Risk Exposures Valuations are performed on certain basic set of pre-determined assumptions and other regulatory framework which may vary over time. Thus, the Company is exposed to various risks in providing the above gratuity benefit which are as follows:

- A **Interest Rate Risk:** The plan exposes the Company to the risk of fall in interest rates. A fall in interest rates will result in an increase in the ultimate cost of providing the above benefit and will thus result in an increase in the value of the liability (as shown in financial statements).
- B **Investment Risk:** The probability or likelihood of occurrence of losses relative to the expected return on any particular investment.
- C **Salary Escalation Risk:** The present value of the defined benefit plan is calculated with the assumption of salary increase rate of plan participants in future. Deviation in the rate of increase of salary in future for plan participants from the rate of increase in salary used to determine the present value of obligation will have a bearing on the plan's liability.
- D **Demographic Risk:** The Company has used certain mortality and attrition assumptions in valuation of the liability. The Company is exposed to the risk of actual experience turning out to be worse compared to the assumption.
- E **Liquidity Risk:** This is the risk that the Company is not able to meet the short-term gratuity payouts. This may arise due to non-availability of enough cash/cashequivalent to meet the liabilities or holding of illiquid assets not being sold in time.
- F In respect of the plan in India, the most recent actuarial valuation of the plan assets and the present value of the defined benefit obligation were carried out as at March 31, 2018 by Mr. N Srinivasan, Fellow of the Institute of Actuaries of India. The present value of the defined benefit obligation, and the related current service cost and past service cost, were measured using the projected unit credit method.

Sensitivity Analysis

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation by the amounts shown below:

Gratuity Plan	March 31,2018
Estimate value of obligation if discount rate is taken 1% higher	157.27
Estimated value of obligation if discount rate is taken 1% lower	186.12
Estimate value of obligation if salary growth rate is taken 1% higher	184.54
Estimate value of obligation if salary growth rate is taken 1% lower	158.45
Estimate value of obligation if attrition rate is taken 1% higher	171.64
Estimate value of obligation if attrition rate is taken 1% lower	169.32

These sensitivities have been calculated to show the movement in defined benefit obligation in isolation and assuming there are no other changes in market conditions at the accounting date. There have been no changes from the previous periods in the methods and assumptions used in preparing the sensitivity analysis.

Asset Liability Matching Strategies

The Company has purchased insurance policy, which is basically a year-on-year cash accumulation plan in which the interest rate is declared on yearly basis and is guaranteed for a period of one year. The insurance Company, as part of the policy rules, makes payment of all gratuity liability occurring during the year (subject to sufficiency of funds under the policy). The policy, thus, mitigates the liquidity risk. However, being a cash accumulation plan, the duration of assets is shorter compared to the duration of liabilities. Thus, the Company is exposed to movement in interest rate (in particular, the significant fall in interest rates, which should result in a increase in liability without corresponding increase in the asset).

The management assessed that fair value of cash and short-term deposits, trade receivables, trade payables, and other current financial assets and liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments.

The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The following methods and assumptions were used to estimate the fair values:

- i) Long-term fixed-rate receivables/borrowings are evaluated by the Company based on parameters such as interest rates, specific country risk factors, individual creditworthiness of the customer and the risk characteristics of the financed project. Based on this evaluation, allowances are taken into account for the expected losses of these receivables.
- ii) Fair values of the Company's interest-bearing borrowings and loans are determined by using DCF method using discount rate that reflects the issuer's borrowing rate as at the end of the reporting period. The own non-performance risk as at March 31, 2018 was assessed to be insignificant.
- iii) The fair values of the unquoted equity shares have been estimated using a discounted cash flow model. The valuation requires management to make certain assumptions about the model inputs, including forecast cash flows, discount rate, credit risk and volatility, the probabilities of the various estimates within the range can be reasonably assessed and are used in management's estimate of fair value for these unquoted equity investments.

31 Fair value hierarchy

- Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 - Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).

The following table presents the fair value measurement hierarchy of financial assets and liabilities measured at fair value on recurring basis as at March 31, 2018, March 31, 2017 and April 1, 2016.

Financial assets measured at fair value:

32 Financial risk management

The Company's principal financial liabilities, comprise loans and borrowings, trade and other payables. The main purpose of these financial liabilities is to finance the company's operations and to provide guarantees to support its operations. The Company's principal financial assets include loans, trade and other receivables, and cash and short-term deposits that derive directly from its operations.

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk, foreign currency risk and interest rate risk. The Company's primary focus is to foresee the unpredictability of financial markets and seek to minimize potential adverse effects on its financial performance. The primary market risk to the company is foreign exchange risk. The Company uses foreign currency borrowings to mitigate foreign exchange related risk exposures.

The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised below:

Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers and investment securities. Credit risk arises from cash held with banks and financial institutions, as well as credit exposure to clients, including outstanding accounts receivable. The maximum exposure to credit risk is equal to the carrying value of the financial assets. The objective of managing counterparty credit risk is to prevent losses in financial assets. The Company assesses the credit quality of the counterparties, taking into account their financial position, past experience and other factors.

Trade and other receivables

The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer. The demographics of the customer, including the default risk of the industry and country in which the customer operates, also has an influence on credit risk assessment.

The following table gives details in respect of percentage of revenues generated from top customer and top 5 customers: ₹ in Lakhs

Particulars	For the year ended March 31 2018	For the year ended March 31 2017
Revenue from top customer	2,000.68	1,055.82
Revenue from top 5 customers	3,419.31	2,351.95

One customer accounted for more than 10% of the revenue for the year ended March 31, 2018, however two of the customers accounted for more than 10% of the receivables for the year ended March 31, 2018. Three customers accounted for more than 10% of the revenue for the year March 31, 2017, however one of the customers accounted for more than 10% of the receivables for the year ended March 31, 2017.

Investments

The Company limits its exposure to credit risk by generally investing in liquid securities and only with counterparties that have a good credit rating. The company does not expect any losses from non-performance by these counter-parties, and does not have any significant concentration of exposures to specific industry sectors.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company manages its liquidity risk through credit limits with banks.

The Company's corporate treasury department is responsible for liquidity, funding as well as settlement management. In addition, processes and policies related to such risks are overseen by senior management.

Foreign Currency risk

The Company's exchange risk arises from its foreign operations, foreign currency revenues and expenses, (primarily in U.S. dollars, British pound sterling and euros) and foreign currency borrowings (primarily in U.S. dollars, British pound sterling and euros). A significant portion of the Company's revenues are in these foreign currencies, while a significant portion of its costs are in Indian rupees. As a result, if the value of the Indian rupee appreciates relative to these foreign currencies, the Company's revenues measured in rupees may decrease. The exchange rate between the Indian rupee and these foreign currencies has changed substantially in recent periods and may continue to fluctuate substantially in the future. The Company's management meets on a periodic basis to formulate the strategy for foreign currency risk management.

Consequently, the Company management believes that the borrowings in foreign currency and its assets in foreign currency shall mitigate the foreign currency risk mutually to some extent

Foreign currency sensitivity analysis

The Company is mainly exposed to the currency USD on account of outstanding trade receivables and trade payables in USD.

The following table details the Company's sensitivity to a 5% increase and decrease in INR against the USD. 5% is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the period end for a 5% change in foreign currency rates. A positive number below indicates an increase in profit or equity where the INR strengthens 5% against the relevant currency. For a 5% weakening of the INR against the relevant currency, there would be a comparable impact on the profit or equity, and the balances below would be negative.

₹ in Lakhs

Particulars	For the year ended March 31 2018	For the year ended March 31 2017
Impact on profit or (loss) for the year	22.39	19.13

For a 5% weakening of the INR against the relevant currency, there would be equivalent amount of impact on the profit as mentioned in the above table.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's debt obligations with floating interest rates and investments.

Interest rate sensitivity analysis

If interest rates had been 1% higher and all other variables were held constant, the company's profit for the year ended would have impacted in the following manner:

If interest rates were 1% lower, the company's profit would have increased by the equivalent amount as shown in the above table.

6 Capital Management

The Company's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. The Company monitors the return on capital. The Company's objective when managing capital is to maintain an optimal structure so as to maximize shareholder value.

The capital structure is as follows:

₹ in Lakhs

Particulars	As at 31.03.2018	As at 31.03.2017	As at 01.04.2016
Total equity attributable to the equity share holders of the company	7,755.27	7,513.35	7,063.18
As percentage of total capital	57.58%	52.68%	54.42%
Current borrowings	4,969.44	5,513.99	4,266.16
Non-current borrowings	743.82	1,233.62	1,649.29
Total borrowings	5,713.26	6,747.61	5,915.45
As a percentage of total capital	42.42%	47.32%	45.58%
Total capital (borrowings and equity)	13,468.53	14,260.96	12,978.63

The Company's capital structure is a combination of both debt and equity.

33 Transition to Ind AS

The Company's financial statements for the year ended March 31, 2018 are prepared in accordance with Ind AS notified under the Companies (Indian Accounting Standards) Rules, 2015. The adoption of Ind AS was carried out in accordance with Ind AS 101, using April 1, 2016 as the transition date. Ind AS 101 requires that all Ind AS standards and interpretations that are effective for the interim Ind AS financial statements for the year ended March 31, 2017 be applied consistently and retrospectively for all fiscal years presented. All applicable Ind AS have been applied consistently and retrospectively wherever required. The resulting difference between the carrying amounts of the assets and liabilities in the financial statements under both Ind AS and Indian GAAP as at the transition date have been recognized directly in equity at the transition date.

In preparing these financial statements, the Company has availed itself of certain exemptions and exceptions in accordance with Ind AS 101 as explained below:

(a) Exceptions from full retrospective application:

Estimates exception: Upon an assessment of the estimates made under Indian GAAP, the Company has concluded that there was no necessity to revise such estimates under Ind AS, except where estimates were required by Ind AS and not required by Indian GAAP.

(b) Exemptions from retrospective application:

The Company has not elected to restate the carrying value of the property, plant and equipment and capital work in progress in accordance with Ind AS as of April 01, 2016 (transition date) as its deemed cost as of the transition date.

Notes to the financial statements for the year ended March 31, 2018

(c) Reconciliations:

The following reconciliations provide a quantification of the effect of significant differences arising from the transition from Indian GAAP to Ind AS in accordance with Ind AS 101:

- equity as at April 1, 2016;
- equity as at March 31, 2017;
- total comprehensive income for the year ended March 31, 2017;
- explanation of material adjustments to cash flow statements.

(i) Equity reconciliation:-

Demerger adjustment done as at April 1, 2016	(ii)	-	634.09
Equity as per Ind AS		1,144.57	694.40

(ii) Total comprehensive income reconciliation

₹ in Lakhs

Particulars	Explanation Note	As at 31.03.2017
Net income/(loss) under previous GAAP		453.31
Change in of defined benefit obligations	(i)	(5.80)
Others		
Profit for the year under Ind AS		447.51
Remeasurement of defined benefit obligations (Net of taxes)	(i)	2.66
Total comprehensive income under Ind AS		450.17

- (iii) There were no significant reconciliation items between cash flows prepared under Indian GAAP and those prepared under Ind AS.

Explanation notes for Ind AS transition:

Under the previous GAAP, actuarial gains or losses were recognised in the statement of profit and loss. Under Ind AS, the actuarial gains or losses from part of remeasurement of the net defined benefit liability / asset is recognised in other comprehensive income. Change in the defined benefit obligation on account of Ind AS is recognised in the statement of profit and loss.

Under Ind AS the adjustment for business combination (Demerger) is recognised with effect from the appointed date as per the scheme of demerger governed by the court of law i.e April 1, 2015. Under previous GAAP demerger effect was given during the year ended March 31, 2017. Therefore adjustment of the net profit earned by the resulting Company during the year ended March 31, 2017 in the financials as per the previous GAAP is not required.

SHIVA MILLS LIMITED

(Formerly STYL TEXTILE VENTURES LIMITED)

Notes to the financial statements for the year ended March 31, 2018

34 Scheme of demerger

The National Company Law Tribunal (NCLT) vide their proceedings dated 23rd August 2017 in Company Petition No.3598360 of 2016, renumbered as TCP/22&23/CAA/2017, approved the scheme for demerger of the business of Spinning Unit - 1 along with connected wind mills ("approved scheme", in favour of Shiva Mills Limited (formerly known as STYL Textile Ventures Limited) ("SML"). The demerger comes in to effect from April 1, 2015, the appointed day fixed under the Scheme.

The net assets to be transferred to SML as on the appointed day, as per the approved scheme is recognised and disclosed as "Demerger Adjustment Account" to be adjusted against the equity of the Company when shares are allotted by SML to the share holders of Demerged Company.

During the year shares of SML were allotted on accordance with the scheme. Accordingly the demerger adjustment account is adjusted with the equity.

35. Previous year's figures have been regrouped / reclassified wherever necessary to correspond with the current year's classification / disclosure.
