The Chairman initiated the business of the meeting and declared that the required quorum of 30 Members in person being present, the Meeting could proceed with the stipulated business.

It was announced by the Chairman that 14 valid Proxies representing 52,09,667 Equity Shares had been received in the prescribed Form.

The Register of Directors and Key Managerial Personnel and their Shareholding maintained under Section 170, Register of Contracts in which Directors are interested and maintained under Section 189 of the Companies Act, 2013, Auditors' Report and Secretarial Audit Report were placed before the Meeting and kept open and accessible for inspection by the members during the continuance of the meeting.

The Chairman announced that remote e-voting had already been conducted as per the Notice of 52nd Annual General Meeting dated 3rd May, 2018 during the period 11th July, 2018 (9.00 A.M.) to 13th July, 2018 (5.00 P.M.).

The Chairman further announced that arrangements had been made for e-voting at the venue of the Annual General Meeting, so that those shareholders who did not cast their vote through remote e-voting can cast their vote, after all the resolutions are moved.

Thereafter, the Chairman requested Mr. O.R. Chitlange, the Managing Director to give his observations on the operations of the Company.

The observations of Mr. O.R. Chitlange, in brief were as under:

The Company, to strengthen its presence in Nylon Filament Yarn (NFY), converted some more polyester spinning machines into nylon spinning machines at Bharuch Site and were commissioned as per planned schedule. This is, as a result, a quantitative jump and increased

in NFY sales volume by 17%, and would help the Company to maintain its lead over competition and consolidate its position in market.

The Company expects Nylon Tyre Cord Fabric (NTCF) usage to continue with marginal growth driven by farm and mining vehicles as well as upswing in 2-wheelers and 3-wheelers.

During the year an exceptional income of Rs.25 Crs. arised out of sale of office premises at Mumbai which had been lying vacant for some time.

In the last annual report as well as at the last AGM, it was mentioned about inventory gains which had contributed to better performance of the Company for the year 2016-17 and also it was stated that this will see reversal of the trend in 2017-18 as prices of Caprolactam and Nylon Chips both, had witnessed substantial fall in the first half of the current year. In line with these observations, the performance of 2017-18 has been lower.

Introduction of Goods & Services Tax (GST) from 01st July, 2017, just after few months of demonetisation had adversely impacted NFY business. This has affected deliveries of NFY for about 3 – 4 months.

The high cost inventory and low deliveries due to GST, had impacted the performance of the Company in the first half of 2017-18. However, there was good recovery in the performance of the Company in the second half of 2017-18 which was the result of various proactive initiatives introduced by the Management.

The existing anti-dumping duties on NTCF imports from certain countries continue to provide protection to some extent. However, to circumvent levy of anti-dumping duty, significant imports of NTCF are coming from Free Trade Agreement countries (FTA) with zero / concessional duty. This continues to put pressure on NTCF margin.

Both the Plants of NTCF are working at full capacity.

The trials for dipping of Polyester Tyre Cord Fabrics were carried out and the samples provided to the tyre companies have been approved. The Company is planning for commercial proposition for conversion of Polyester Tyre Yarn into Dipped Polyester Tyre Cord Fabric.

The Company is also pursuing to provide dipping services for Rayon Tyre Cord Fabric and proposes to undertake trials. Once successful, it would commercially explore this.

The Company intends to fully integrate its NTCF capacity to strengthen its competitive position. With focus on enlarging customer base and integration of NTCF capacity, the Company expects better and optimum capacity utilisation.

The profitability of NFY continues to remain under pressure owing to raw material price volatility, competition from fragmented small and medium producers and imports from FTA countries.

Despite concerns on account of the impact of volatility of raw material prices and dependence on raw material imports coupled with NTCF and NFY import from FTA countries at zero/concessional import duties, the Company is cautiously optimistic of its improved performance. The optimism is largely driven by its thrust on diversification of product profile and consolidation of value added products.

Clarifications given by the Managing Director :

- As regards excise duty demand matter, the Company has already made an application to Appellate Authority (CESTAT) for early hearing and the matter has been taken up in current cause list.
- The process to set up a new project is constantly pursued.
- The Company is in commodity business of petroleum based raw material. Return on capital and return on investment is fluctuating with the fluctuation in raw material prices and demand supply position.
- NTCF and NFY is one activity and as such no separate detail of Working Capital utilisation is maintained.

- There would be new capacity addition for conversion of Polyester Tyre Yarn into dipped Polyester Tyre Cord Fabric. For Rayon Tyre Cord Fabric, it would be a dipping services.
