The Company does not propose to transfer any amount to the Reserve for the year under review.

### 2. Dividend

Your Directors have not recommended any dividend for the financial year ended 31<sup>st</sup> March 2018.

### 3. Operations

The uncertainty caused by the implementation of the Goods and Services Tax (GST) adversely impacted the growth in the first half of the fiscal. The new Index for Industrial Production ("IIP") which was released in April 2017, where the base year is 2011-12 and the basket of goods has been changed to make it more representative, witnessed low growth between April and October 2017 (average of 2.5%). Since then, however, growth has been strong. The significant increase in growth from November 2017 onwards is partly on account of a low base, partly on account of re-stocking of the channel inventories post-GST and partly on account of a partial revival, led by the auto sector. Within the auto sector, both the commercial vehicles segment and the 3-wheeler segment (which are the two segments served by your Company) witnessed strong growth. The 3-wheeler segment, in particular, bounced back after declining in the previous fiscal and grew by around 30%. Reflecting this growth, your Company's sales increased by 20% and, consequently, the operating profit doubled.

While the long term outlook for the auto sector is positive, with the GST implementation behind us and some early signs of an economic revival, the short term outlook is also moderately positive.

### 4. Material changes and commitments after the end of financial year

There have been no material changes and commitments, if any, affecting the financial position of the Company, which have occurred between the end of the financial year and date of the report.

### 5. Particulars of loans, guarantees or investment

## MANAGEMENT DISCUSSION AND ANALYSIS

---

### General Review:

Saint-Gobain Sekurit India Limited (“SGSIL”) is a subsidiary of Compagnie de Saint-Gobain (“Saint-Gobain”), a transnational group with its headquarters in Paris and with sales of Euros 40.8 billion in 2017.

Saint-Gobain’s businesses fall into four broad sectors: Construction Products, Flat Glass, High Performance Materials and Building Distribution. SGSIL’s business is part of the Flat Glass sector. SGSIL is in the business of processing of glasses to manufacture windshields, door glasses and backlites for the Automobile sector.

### BUSINESS ENVIRONMENT:

The overall growth of the Indian economy in 2017-18 was slightly lower than the previous year. The new Index for Industrial Production witnessed low growth during first half of the financial year 2017-18. However, there has been a strong pick-up in growth from November 2017. A number of factors have contributed to this: completion of the GST transition, re-stocking of depleted channel inventories, relatively low inflation, a stable exchange rate and an increase in exports. Overall, the auto sector had a good year, with some segments witnessing double-digit growth.

### Automotive Segment:

The automotive glasses are broadly classified as laminated and tempered.

### Products and Plants

Automotive Glasses are glasses fitted on the body of automobiles. Generally, these glasses are either laminated or tempered. Normally all windshields are laminated and the other glasses (backlites and sidelites) are tempered. The Company’s factory at Chakan, Pune, which manufactures laminated glasses, is certified under ISO 14001:2004 and OHSAS 18001:2007.

### Industry

Broadly, there are two major market segments – Automobile Manufacturers (OEMs) and the Replacement Market. Within OEMs, there are three sub-segments: passenger vehicles, commercial vehicles and 3-wheelers. There is only one major player, other than SGSIL, supplying to the OEMs. There are however, a number of smaller players in the Replacement Market.

### Broad Characteristics of the Business

- High Entry Barrier in the form of high capital investment.
- Complete dependency on the auto sector.
- Key success factors are quality, cost, capability to supply full car sets to the OEMs and also proximity to customers.
- Stringent contractual obligations with the OEMs for supply of glass.

### Development, Outlook, Risks and Concerns

The auto sector recorded good overall growth during the current year. More important, both the commercial vehicles segment and the 3-wheeler segment witnessed strong growth with production increasing by 10% and 30%, respectively (albeit, on a low base). The higher volumes in the 3-wheeler segment are likely to be sustained in the next few quarters. Sustained investment in infrastructure (in particular, roads) by the government and stronger growth of the economy (supported by good monsoon forecast) will help the commercial vehicles segment to record growth.

The Company’s prospects are completely dependent on the growth and performance of the commercial vehicles and 3-wheeler segments of the auto sector. Low growth of these segments remains a high risk factor. Besides conventional business risks, in the rapidly changing world environment, risks associated with use of hazardous materials, pollution and electronic data have also become important and these can potentially expose the Company to legal and social liabilities. The Company is alert in tracking all such risks and taking suitable mitigating actions wherever warranted or necessary.

### Risks and Concerns – Others

#### 1. Financial

SGSIL’s financial management has always been governed by prudent policies, based on conservative principles. SGSIL’s foreign currency exposure on account of imports and exports are appropriately hedged. SGSIL has a well-defined and structured treasury operation, with the emphasis being on security.

## 2. Legal & Statutory

- (i) Contingent Liabilities: Details of Contingent Liabilities are in the Notes forming part of the Financial Statements.
- (ii) Statutory Compliance: SGSIL ensures statutory compliance of all applicable laws and is committed to timely payment of all statutory dues.

### Human Resources:

The Company provides a congenial and productive work environment with an aim to retain those who are capable of translating challenges into opportunities and weaknesses into strengths. The Management continually empowers employees with opportunities to give their suggestions on various business and operational matters. The twin objectives of improving the quality of human capital available within the Company and harnessing its potential for the benefit of the Company continues to form the cornerstone of the HR policy of your Company.

SGSIL will continue to invest in training people in Environment, Health and Safety and World Class Manufacturing and to provide an environment in which employees can give their best and realize their full potential.

### Overall Performance:

SGSIL's sales increased by 20% (on a like to like basis) and operating profit increased by 100%. The increase in volumes was primarily on account of the high growth of the 3-wheeler segment in 2017-18. The significant increase in operating profit was mainly on account of increase in volumes.

### Internal Control Systems:

SGSIL has an effective internal control environment which ensures business and operations are managed efficiently and effectively, assets are safeguarded, regulatory requirements are complied with and all transactions are recorded after appropriate authorisations. The Company's strong and independent internal audit function performs regular audits. All internal controls are constantly upgraded based on internal audit recommendations.

Every quarter the reports of the internal audits, significant audit findings, and corrective steps recommended and their implementation status are presented to the Audit Committee.

### Segmental Financials:

Your Company recognises Automotive Glass as a single segment.

## **ANNEXURE B TO THE INDEPENDENT AUDITOR'S REPORT**

Referred to in Paragraph 8(b)(vi) 'Report on Other Legal and Regulatory Requirements' in our Independent Auditor's Report to the members of the Company on the Ind AS Financial Statements for the year ended 31<sup>st</sup> March 2018.

### **Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of section 143 of the Companies Act, 2013.**

1. We have audited the internal financial controls over financial reporting of SAINT-GOBAIN SEKURIT INDIA LIMITED ("the Company") as of 31<sup>st</sup> March 2018, in conjunction with our audit of the Ind AS Financial Statements of the Company for the year ended on that date.

#### **Management's Responsibility for Internal Financial Controls**

2. The Company's Management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records and the timely preparation of reliable financial information, as required under the Companies Act, 2013 (the "Act" or the "Companies Act").

### **Auditors' Responsibility**

3. Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.
4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Ind AS Financial Statements, whether due to fraud or error.
5. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

### **Meaning of Internal Financial Controls over Financial Reporting**

- 6 A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Ind AS Financial Statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that:
  - a) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
  - b) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Ind AS Financial Statements in accordance with generally accepted accounting principles and that receipts and expenditures of the company are being made only in accordance with authorisations of Management and Directors of the Company; and
  - c) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the Ind AS Financial Statements.

### **Inherent Limitations of Internal Financial Controls over Financial Reporting**

7. Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

### **Opinion**

- 8 In our opinion, to the best of our knowledge and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31<sup>st</sup> March 2018, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India.

## NOTES FORMING PART OF FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31<sup>st</sup> MARCH 2018

### NOTE 1: CORPORATE INFORMATION

Saint-Gobain Sekurit India Limited ("the Company") having CIN No. L26101MH1973PLC018367 is engaged primarily in business of manufacture and sale of automotive glass. The Company has its manufacturing facility in Pune and sells primarily in India. The Company is a public limited company and listed on the Bombay Stock Exchange Limited (BSE).

### NOTE 1A: BASIS FOR PREPARATION AND MEASUREMENT

#### A) Basis of Preparation

The financial statements comply with all material aspects with the Indian Accounting Standards ("Ind AS") as notified by Ministry of Corporate Affairs in pursuant to Section 133 of the Companies Act, 2013 (the Act). It also comply with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 as amended by the Companies (Indian Accounting Standards) Rules, 2016, the Companies (Indian Accounting Standards) Rules, 2017 and other relevant provisions of the Act.

The financial statements have been prepared in accordance with generally accepted accounting principles in India under the historical cost convention on accrual basis at the end of each reporting period, except for the following:

- certain financial assets and liabilities (including derivative instruments) that are measured at fair value;
- assets held for sale – measured at lower of cost or fair value less cost to sell; and
- defined benefit plan assets measured at fair value.

#### B) Measurement of Fair Value

The Company's accounting policies and disclosures require the measurement of fair values for financial instruments. The Company has an established control framework with respect to the measurement of fair values. The Management regularly reviews significant inputs and valuation adjustments. If third party information, such as Government approved valuer, broker quotes or pricing services, is used to measure fair values, then the Management assesses the evidence obtained from the third parties to support the conclusion that such valuations meet the requirements of Ind AS, including the level in the fair value hierarchy, in which such valuations should be classified.

While measuring the fair value of a financial asset or a financial liability, the Company uses observable market data as far as possible. Fair values are categorised into different levels, in a fair value hierarchy, based on the inputs used in the valuation techniques as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 inputs other than quoted prices included within Level 1, that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 inputs for the assets or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Company recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

#### C) Rounding of Amounts

All amounts disclosed in the financial statements and notes have been rounded off to the nearest lakhs as per the requirement of Schedule III, unless otherwise stated.

#### D) Recent Accounting Pronouncements

All the Indian Accounting Standards ("Ind AS") issued and notified by the Ministry of Corporate Affairs are effective and considered for the significant accounting policies to the extent relevant and applicable for the Company except for:

**Ind AS 115 – Revenue from Contracts with Customers:** In February 2015, the Ministry of Corporate Affairs had notified Ind AS 115, Revenue from Contracts with Customers. The Ind AS is applicable with effect from 1<sup>st</sup> April 2018. The Company is in the process of making an assessment of the impact of Ind AS 115 upon initial application.

**Ind AS 116 – Leases:** This Standard is effective for annual period beginning on or after 1<sup>st</sup> April, 2019 with early adoption allowed only if Ind AS 115 - Revenue from Contracts with Customers is also adopted.

**NOTES FORMING PART OF FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31<sup>st</sup> MARCH 2018**
**E) Critical Estimates and Judgements**

The preparation of financial statements requires Management to make judgments, estimates and assumptions in the application of accounting policies that affect the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Continuous evaluation is done on the estimation and judgments based on historical experience and other factors, including expectations of future events that are believed to be reasonable.

Information about critical judgments in applying accounting policies, as well as estimates and assumptions that have the most significant effect to the carrying amounts of assets and liabilities within the next financial year, are as follows:

**a) Taxation**

The Company's tax charge on ordinary activities is the sum of the total current and deferred tax charges. The calculation of the Company's total tax charge necessarily involves a degree of estimation and judgement in respect of certain items whose tax treatment cannot be finally determined until resolution has been reached with the relevant tax authority or, as appropriate, through a formal legal process. The final resolution of some of these items may give rise to material profits / losses and / or cash flows.

**b) Recognition of Deferred Tax Assets**

The recognition of deferred tax assets is based upon whether it is more likely than not that sufficient and suitable taxable profits will be available in the future against which the reversal of temporary differences can be deducted. To determine the future taxable profits, reference is made to the latest available profit forecasts. Where the temporary differences are related to losses, relevant tax law is considered to determine the availability of the losses to offset against the future taxable profits.

Historical differences between forecast and actual taxable profits have not resulted in material adjustments to the recognition of deferred tax assets.

**c) Useful Lives of Property, Plant and Equipment and Intangible Assets**

The charge in respect of periodic depreciation is derived after determining an estimate of an asset's expected useful life and the expected residual value at the end of its life. Increasing an asset's expected life or its residual value would result in a reduced depreciation charge in the statement of profit and loss.

The useful lives and residual values of assets are determined by management at the time the asset is acquired and reviewed annually for appropriateness. The lives are based on historical experience with similar assets as well as anticipation of future events which may impact their life such as changes in technology.

**d) Provision and Contingent Liabilities**

The Company exercises judgement in measuring and recognising provisions and the exposures to contingent liabilities related to pending litigation or other outstanding claims subject to negotiated settlement, mediation, arbitration or government regulation, as well as other contingent liabilities (refer Note 16 and 37). Judgement is necessary in assessing the likelihood that a pending claim will succeed, or a liability will arise, and to quantify the possible range of the financial settlement. Because of the inherent uncertainty in this evaluation process, actual losses may be different from the originally estimated provision.

Management estimates and judgements are continually evaluated. They are based on historical experience and other factors, including expectations of future events that may have a financial impact on the Company and that are believed to be reasonable under the circumstances.

**e) Estimation of Defined Benefit Obligation**

In determining the valuation of defined benefit schemes' assets and liabilities, a number of key assumptions have been made. The key assumptions, which are given below, are largely dependent on factors outside the control of the Company:

- inflation rate;
- life expectancy;
- discount rate; and
- salary and pension growth rates.

The Company is exposed to risks through its defined benefit schemes if actual experience differs to the assumptions used and through volatility in the plan assets. Details of the assumptions used, and associated sensitivities, are included in Note 17.

**NOTES FORMING PART OF FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31<sup>st</sup> MARCH 2018****f) Impairment of Trade Receivables**

The impairment provisions for financial assets are based on assumptions about risk of default and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on the Company past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

**g) Discontinued Operations**

The disposal of assets at Bhosari plant does not qualify as a discontinued operation as defined under Ind AS 105 "Non-current assets held for sale and discontinued operations" as these do not represent a separate major line of business or geographical area of operations. The operating results for the Bhosari plant are not reviewed separately by the management of the Company and the revenue generated from goods produced from these assets is not considered to be a significant portion of total revenue.

**NOTE 2: SIGNIFICANT ACCOUNTING POLICIES**

This note provides a list of significant accounting policies adopted in the preparation of the financial statements. These policies have been consistently applied to all the years presented, unless otherwise stated.

**a) Property Plant and Equipment**

Freehold land is carried at historical cost. Property, Plant and Equipment (PPE) are stated at cost of acquisition, including any attributable cost for bringing the asset to its working condition for its intended use less accumulated depreciation and less accumulated impairment, if any. Cost includes expenses related to acquisition and installation of the concerned assets, borrowing cost during the construction period and excludes any duties / taxes recoverable.

Advances paid towards the acquisition of PPE outstanding at each reporting date is classified as Capital Advances under Other Non-Current Assets and assets which are not ready for intended use as on the date of Balance Sheet are disclosed as "Capital Work in Progress".

Properties in the course of construction for production, supply or administrative purposes are carried at cost, less any recognised impairment loss. Cost includes all costs incurred to bring the assets to their present location and condition. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

An item of PPE is de-recognised upon disposal or when no future economic benefits are expected from its use or disposal. Gains or losses arising from de-recognition of fixed assets are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the Statement of Profit and Loss when the asset is derecognised.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred. When significant identifiable parts of PPE are required to be replaced, the Company de-recognises the replaced parts and recognises the new part with its own associated useful life and it is depreciated accordingly. In other cases, expenses are charged off to Statement of Profit and Loss.

**NOTES FORMING PART OF FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31<sup>st</sup> MARCH 2018**
*Depreciation methods, estimated useful lives and residual value*

Based on technical evaluation and Management judgement, depreciation is provided on pro-rata basis on the straight-line method over the following estimated useful lives of the assets in order to reflect the actual usage of the assets:

<b>Assets</b>	<b>Useful Life (in years) followed by the Company</b>	<b>Useful Life (in years) prescribed under Schedule II of the Companies Act, 2013</b>
General Plant and Machinery *	15	15
Pallets, Racks and Trolleys	4	15
Moulds and Toolings	4	8
Machinery Spares	2-13	15
Furniture and Fixtures	10	10
IT Hardware (Network / Server)	4	6
Computers (end user devices such as desktops, laptops etc.)	3	3
Motor Vehicles	5	8
Office Equipments	5	5
Buildings (Other than Factory Building)	60	60
Factory Building	30	30

\* Useful life for General plant and machinery followed by the Company is normally 15 years. Certain items of General plant and machinery have a useful life that ranges from 2-15 years based on Management estimates of useful life of the asset.

The assets' residual values and useful lives are reviewed, at the end of each reporting period with the effect of any changes in estimate being accounted on a prospective basis.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with carrying amount on the date of disposal. These are included in the Statement of Profit and Loss.

**b) Intangible Assets**
*Computer Software*

Computer software having finite life is amortised using the straight-line method over a period of four to five years.

**c) Impairment of Non-Financial Assets**

At the end of each reporting period, the Company reviews the carrying amounts of its non-financial assets to determine whether there is any indication of an impairment loss. If any such indication exists, the recoverable amounts are estimated in order to determine the extent of the impairment loss (if any). An impairment loss is recognised whenever the carrying amount of an asset or a cash-generating unit exceeds its recoverable amount. The impairment loss, if any, is recognised in the Statement of Profit and Loss in the period in which impairment takes place.

Recoverable amount is higher of an assets net selling price and its value in use. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of an assets and from its disposal at the end of its useful life. Where an impairment loss subsequently reverses, the carrying amount of the assets is increased to the revised estimate of its recoverable amount, however subject to the increased carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior accounting periods.

**d) Investments and Other Financial Assets**
**i) Classification**

The Company classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
- those measured at amortised cost.

## NOTES FORMING PART OF FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31<sup>st</sup> MARCH 2018

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For investments in debt instruments, this will depend on the business model in which the investment is held. For investments in mutual fund, the Company has opted to account for the fair value through profit or loss.

The Company reclassifies debt investments when and only when its business model for managing those assets changes.

### ii) Measurement

At initial recognition, the Company measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

Subsequent measurement depends on the Company's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Company classifies its instruments:

- Amortised cost:

Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. A gain or loss on a debt investment that is subsequently measured at amortised cost and is not part of a hedging relationship is recognised in profit or loss when the asset is derecognised or impaired. Interest income from these financial assets is included in finance income using the effective interest rate method.

- Fair value through other comprehensive income (FVOCI):

Assets that are held for collection of contractual cash flows and for selling the financial assets, where the asset's cash flows represent solely payments of principal and interest, are measured at fair value through other comprehensive income (FVOCI). Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognised in profit and loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other gains/(losses). Interest income from these financial assets is included in other income using the effective interest rate method.

- Fair value through profit or loss:

Assets that do not meet the criteria for amortised cost or FVOCI are measured at fair value through profit or loss. A gain or loss on a debt investment that is subsequently measured at fair value through profit or loss and is not part of a hedging relationship is recognised in profit or loss and presented net in the statement of profit and loss within other gains/(losses) in the period in which it arises. Interest income from these financial assets is included in other income.

### iii) Impairment of financial assets

The Company assesses on a forward looking basis the expected credit losses associated with its assets carried at amortised cost. The impairment methodology applied depends on whether there has been a significant increase in credit risk. Notes 33 details how the Company determines whether there has been a significant increase in credit risk.

### iv) Derecognition of financial assets

A financial asset is derecognised only when

- The Company has transferred the rights to receive cash flows from the financial asset or
- retains the contractual rights to receive the cash flows of the financial asset, but assumes a contractual obligation to pay the cash flows to one or more recipients.

Where the entity has transferred an asset, the Company evaluates whether it has transferred substantially all risks and rewards of ownership of the financial asset. In such cases, the financial asset is derecognised. Where the entity has not transferred substantially all risks and rewards of ownership of the financial asset, the financial asset is not derecognised.

**NOTES FORMING PART OF FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31<sup>st</sup> MARCH 2018**

Where the entity has neither transferred a financial asset nor retains substantially all risks and rewards of ownership of the financial asset, the financial asset is derecognised if the Company has not retained control of the financial asset. Where the Company retains control of the financial asset, the asset is continued to be recognised to the extent of continuing involvement in the financial asset.

**v) Income recognition**
*Interest income*

Interest income from debt instruments is recognised using the effective interest rate method. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the gross carrying amount of a financial asset. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses.

*Dividend income*

Dividend is recognised in profit or loss only when the right to receive payment is established, it is probable that the economic benefits associated with the dividend will flow to the Company, and the amount of the dividend can be measured reliably.

**e) Derivatives and Hedging Activities**

Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently re-measured to their fair value at the end of each reporting period. The Company does not designate any of its derivatives as hedging instruments. Accordingly, such contracts are accounted for at fair value through profit or loss. The gain / (losses) are included in other income and other expenses respectively.

**f) Offsetting Financial Instruments**

Financial assets and liabilities are offset and the net amount is reported in the balance sheet where there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Company or the counterparty.

**g) Cash and Cash Equivalents**

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, bank balances, other short-term deposits, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities in the balance sheet.

**h) Trade Receivables**

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment.

**i) Inventories**

Raw materials and stores, work in progress, traded and finished goods are stated at the lower of cost and net realisable value. Cost of raw materials, traded goods and spares comprises cost of purchases. Cost of work-in-progress and finished goods comprises direct materials, direct labour and an appropriate proportion of variable and fixed overhead expenditure, the latter being allocated on the basis of normal operating capacity. Cost of inventories also includes all other costs incurred in bringing the inventories to their present location and condition. Cost of raw materials and spares is determined using the standard cost adjusted for variance from actual costs on moving average basis. Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale. Provision is made for cost of obsolescence and other anticipated losses, whenever considered necessary by Management based on their best judgement.

**NOTES FORMING PART OF FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31<sup>st</sup> MARCH 2018****j) Non-Current Assets Held for Sale**

Non-current assets are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use and a sale is considered highly probable. They are measured at the lower of their carrying amount and fair value less costs to sell, except for assets such as deferred tax assets, assets arising from employee benefits, financial assets and contractual rights under insurance contracts, which are specifically exempt from this requirement.

An impairment loss is recognised for any initial or subsequent write-down of the asset to fair value less costs to sell. A gain is recognised for any subsequent increases in fair value less costs to sell of an asset, but not in excess of any cumulative impairment loss previously recognised. A gain or loss not previously recognised by the date of the sale of the non-current asset is recognised at the date of de-recognition.

Non-current assets are not depreciated or amortised while they are classified as held for sale.

Non-current assets classified as held for sale and the assets of a disposal group classified as held for sale are presented separately from the other assets in the balance sheet.

**k) Trade and Other Payables**

These amounts represent liabilities for goods and services provided to the Company prior to the end of financial year which are unpaid. The amounts are unsecured and are usually paid within 30 to 60 days of recognition. Trade and other payables are presented as current liabilities unless payment is not due within 12 months after the reporting period. They are recognised initially at their fair value and subsequently measured at amortised cost using the effective interest method.

**l) Borrowings**

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in profit or loss over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a prepayment for liquidity services and amortised over the period of the facility to which it relates.

Borrowings are removed from the balance sheet when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss as other income and other gains/(losses).

Borrowings are classified as current liabilities unless the Company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period. Where there is a breach of a material provision of a long-term loan arrangement on or before the end of the reporting period with the effect that the liability becomes payable on demand on the reporting date, the entity does not classify the liability as current, if the lender agreed, after the reporting period and before the approval of the financial statements for issue, not to demand payment as a consequence of the breach.

**m) Segment Reporting**

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The Company is engaged in the business of "Automotive Glass" and constitutes a single reportable business segment. The Company's sales are predominantly in India and accordingly there is no other geographical reportable segment. Refer Note 35 for segment information presented.

**n) Foreign Currency Transaction***Functional and presentation currency*

The financial statements are presented in Indian Rupee (₹), which is the Company's functional and presentation currency.

*Transactions and balances*

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are recognised in the Statement of profit and loss.

**NOTES FORMING PART OF FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31<sup>st</sup> MARCH 2018**
**o) Government Grants**

Grants from the government are recognised at their fair value where there is a reasonable assurance that the grant will be received and The Company will comply with all of the attached conditions.

Government grants relating to the purchase of property, plant and equipment are included in non-current liabilities as deferred income and are credited to profit or loss on a straight-line basis over the expected lives of the related assets and presented within other income.

Government grants relating to income are deferred and recognised in the profit or loss over the period necessary to match them with the costs that they are intended to compensate and presented within other income.

**p) Revenue recognition**

Revenue is measured at the fair value of the consideration received or receivable. Amounts disclosed as revenue are inclusive of Excise Duty / Goods and Service tax and net of returns, trade allowances, rebates, value added taxes and amounts collected on behalf of third parties.

The Company recognises revenue from sale of goods when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the entity and the products have been delivered to the customer. The Company bases its estimates of discount and rebates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement.

Timing of revenue recognition –

The Company manufactures and sells a range of glasses to the original equipment manufacturers (OEM's) and free market. Sales are recognised when the products are delivered to OEM's and free market.

**q) Income tax**

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in India. Management periodically establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting profit nor taxable profit (tax loss). Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised for all deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Current and deferred tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

**r) Leases**

As a lessee

Leases of property, plant and equipment where the Company, as lessee, has substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalised at the lease's inception at the fair value of the

## NOTES FORMING PART OF FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31<sup>st</sup> MARCH 2018

leased property or, if lower, the present value of the minimum lease payments. The corresponding rental obligations, net of finance charges, are included in borrowings or other financial liabilities as appropriate. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to the profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Leases in which a significant portion of the risks and rewards of ownership are not transferred to the Company as lessee are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to profit or loss on a straight-line basis over the period of the lease unless the payments are structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases.

As a lessor

Lease income from operating leases where the Company is a lessor is recognised in income on a straight-line basis over the lease term unless the receipts are structured to increase in line with expected general inflation to compensate for the expected inflationary cost increases. The respective leased assets are included in the balance sheet based on their nature.

### s) **Borrowing Costs**

General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale.

Other borrowing costs are expensed in the period in which they are incurred.

### t) **Provisions**

Provisions are recognised when the Company has a present obligation as a result of a past event; it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and when a reliable estimate of the amount of the obligation can be made. Provisions are measured at the best estimate of the expenditure required to settle the present obligation at the Balance Sheet date. The expenses relating to a provision is presented in the Statement of Profit and Loss net of any reimbursement.

If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows specific to the liability. The unwinding of the discount is recognised as finance cost.

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made.

A Contingent asset is not recognised but disclosed in the financial statements where an inflow of economic benefit is probable.

Provisions, contingent assets, contingent liabilities and commitments are reviewed at each balance sheet date.

### u) **Employee Benefits**

#### i) *Short-term obligations*

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognised in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the balance sheet.

#### ii) *Post-employment obligations*

The Company operates the following post-employment schemes:

- defined benefit plans such as gratuity; and
- defined contribution plans such as provident fund, superannuation fund.

#### *Defined benefit plans - Gratuity obligations*

The liability or asset recognised in the balance sheet in respect of defined benefit pension and gratuity plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by actuaries using the projected unit credit method.

**NOTES FORMING PART OF FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31<sup>st</sup> MARCH 2018**

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in the statement of profit and loss.

Re-measurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income. They are included in retained earnings in the statement of changes in equity and in the balance sheet.

Changes in the present value of the defined benefit obligation resulting from plan amendments or curtailments are recognised immediately in profit or loss as past service cost.

*Defined Contribution plans – Provident fund*

The Company pays provident fund contributions to publicly administered provident funds as per local regulations. The Company has no further payment obligations once the contributions have been paid. The contributions are accounted for as defined contribution plans and the contributions are recognised as employee benefit expense when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

*iii) Other long-term employee benefit obligations*

The liabilities for earned leave and sick leave are not expected to be settled wholly within 12 months after the end of the period in which the employees render the related service. They are therefore measured as the present value of expected future payments to be made in respect of services provided by employees up to the end of the reporting period using the projected unit credit method. The benefits are discounted using the market yields at the end of the reporting period that have terms approximating to the terms of the related obligation. Re-measurements as a result of experience adjustments and changes in actuarial assumptions are recognised in profit or loss.

The obligations are presented as current liabilities in the balance sheet based on when the actual settlement is expected to occur.

*iv) Termination benefits*

Termination benefits are payable when employment is terminated by the Company before the normal retirement date, or when an employee accepts voluntary redundancy in exchange for these benefits. The Company recognises termination benefits as and when incurred. In the case of an offer made to encourage voluntary redundancy, the termination benefits are measured based on the number of employees expected to accept the offer. Benefits falling due more than 12 months after the end of the reporting period are discounted to present value.

**v) Contributed equity**

Equity shares are classified as equity.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

**w) Earning per share**

*i) Basic earnings per share*

Basic earnings per share is calculated by dividing:

- the profit attributable to owners of the Company
- by the weighted average number of equity shares outstanding during the financial year, adjusted for bonus elements in equity shares issued during the year.

*ii) Diluted earnings per share*

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account:

- the after income tax effect of interest and other financing costs associated with dilutive potential equity shares, and
- the weighted average number of additional equity shares that would have been outstanding assuming the conversion of all dilutive potential equity shares.

**Fair value hierarchy**

This section explains the judgments and estimates made in determining the fair values of the financial instruments that are (a) recognised and measured at fair value and (b) measured at amortised cost and for which fair values are disclosed in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the Company has classified its financial instruments into the three levels prescribed under the accounting standard. An explanation of each level follows underneath the table.

**Financial assets and liabilities measured at Amortised cost:**

The fair values of all financial instruments carried at amortised cost are not materially different from their carrying amounts since they are either short-term in nature or the interest rates applicable are equal to the current market rate of interest.

**Level 1:** Level 1 hierarchy includes financial instruments measured using quoted prices. The Company does not have any financial asset in this measurement category.

**Level 2:** The fair value of financial instruments that are not traded in an active market (for example, mutual funds, over-the-counter derivatives) is determined using this valuation techniques which maximize the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

**Level 3:** If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. The Company does not have any financial asset in this measurement category.

**Valuation techniques used to determine fair value**

Specific valuation techniques used to value financial instruments include:

- the use of net asset value for mutual funds.
- the fair value of forward foreign exchange contracts is determined using forward exchange rates at the balance sheet date.

**Note 33 - Financial Risk Management**

The Company's activities expose it to market risk, liquidity risk and credit risk. In order to minimise any adverse effects on the financial performance of the Company, derivative financial instruments, such as foreign exchange forward contracts are entered to hedge certain foreign currency risk exposures. Derivatives are used exclusively for hedging purposes and not as trading or speculative instruments.

This note explains the sources of risk which the entity is exposed to and how the entity manages the risk and the impact of hedge accounting in the financial statements.

**A. Credit Risk**

Credit risk is the risk of incurring a loss that may arise from a borrower or debtor failing to make required payments. Credit risk arises mainly from outstanding receivables from free market dealers, cash and cash equivalents, employee advances and security deposits. The Company manages and analyses the credit risk for each of its new clients before standard payment and delivery terms and conditions are offered.

**NOTES FORMING PART OF FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31<sup>st</sup> MARCH 2018**

*(All amounts in ₹ Lakhs, unless otherwise stated)*

The Company considers the probability of default upon recognition of asset and whether there has been a significant increase in credit risk on an ongoing basis throughout each reporting period. To assess whether there is a significant increase in credit risk the company compares the risk of a default occurring on the asset as at the reporting date with the risk of default as at the date of initial recognition. It considers available reasonable and supportive forwarding-looking information. Especially the following indicators are incorporated:

- > Internal credit rating for free market dealers.
- > External credit rating (as far as available for OEMs)
- > Actual or expected significant adverse changes in business, financial or economic conditions that are expected to cause a significant change to the customer's ability to meet its obligations
- > Actual or expected significant changes in the operating results of the customer
- > Significant changes in the expected performance and behaviour of the customer, including changes in the payment status of customers

Macroeconomic information (such as regulatory changes, market interest rate or growth rates) is incorporated as part of the internal rating model.

In general, it is presumed that credit risk has significantly increased since the initial recognition if the payments are more than 120 days past due.

Company has a history of limited write off for doubtful debts. Company on a monthly basis review aging of receivables and rigorous follow-up is performed by credit controller along with the help of key accounts manager. Quality/ breakage claims received from the customer are reviewed and approved by quality manager, accordingly credit memos are issued as per policy of the company. At the end of every month credit memos raised during that month is also reviewed by Chief Financial Officer. Appropriate provision is made for each receivable based on review of supporting documents with credit controller. Any exception is justified and documented.

Credit risk on cash and cash equivalents is limited as company generally invests in deposits with banks and financial institutions with high credit ratings assigned by international and domestic credit rating agencies. Investments primarily include investment in liquid mutual fund units.
