2) Dividend

In view of the adverse financial results, your Directors have not recommended payment of dividend for the year 2017-18.

3) The Indian Accounting Standards (Ind As)

The Indian Accounting Standards prescribed under Companies (Indian Accounting Standards) Rules, 2015 as amended by the Companies (Indian Accounting Standards)(Amendment) Rules, 2016 are applicable to your company with effect from 1.4.2017 with a transition date of 1.4.2016. Your company has accordingly prepared the financial statements for the financial year ended 31.3.2018 by following the Ind-AS. The financial results for the financial year 2016-2017 are adjusted/ reconciled in accordance with Ind-AS.

4) Financial Performance

Your Company earned an income of ₹ 56,402.02 lakhs in the year 2017-18 as against ₹ 69,840.41 lakhs during the previous year. The Company has incurred a net loss of ₹ 1,225.32 lakhs as against the net profit of ₹ 2,988.53 lakhs earned during the previous year.

5) Optional Performance

a) Sugar Division

The key operational data of our sugar division for the year 2017-18 are as follows:

Particulars	2017-18	2016-17
Sugarcane crushed (Tons)	7,56,525	17,91,793
Recovery %	8.84	9.16
Sugar Produced (Tons)	66,859	1,64,118
Sugar Sold (Tons) - Domestic	1,16,362	1,40,409

The sugarcane crushing has dropped by 58% due to severe drought in the state of Tamilnadu during the last four years.

b) Cogeneration Division

During the year under review, the total power generated by all our Units was 1,052 lakh units as against 2,182 lakh units in the previous year. The company exported 638 lakh units during the year as against 1,417 lakh units in the previous year. Lower availability of cane has a cascading effect on the generation and export of power.

The Company has not received any carbon credits during the year.

c) Distillery Division

The distillery plant at Unit III has produced 192.03 lakh litres of Alcohol in 2017-18 as against 220.27 lakh litres of Alcohol in the previous year and sold 188.60 lakh litres of alcohol as against 216.98 lakh litres of alcohol in the previous year.

The Distillery plant at Unit I was not in operation since April 2014 due to non-availability of adequate molasses.

6) Default in the payment to the lenders

The Company is not in a position to make the payment of interest and principal (dues for March-April 2018) to the banks, due to poor financial performance.

The Company's financial position is stressed because of the lower availability of sugarcane in our mills caused due to severe drought in the state of Tamilnadu over the last 4 years. It may be noted that the sugar mills in Tamilnadu are working at around 25% of their installed capacity and the State is estimated to produce less than 6 lakh tons of sugar against its normal average of around 20 lakh tons per season.

The lower availability of sugarcane had a cascading effect on the cogeneration and industrial alcohol business of the Company, which has also resulted in the reduction of cash inflows.

The cash flows of the Company will become stable once the cane availability improves, which could happen during the new sugar season starting from November 2018 on the back of an expected normal monsoon.

The Company is also in discussion with the lenders for a resolution plan for restructuring its debt to align it with the projected cashflows.

7) Future Outlook

Sugarcane crushing for the year 2018-19 is likely to be marginally higher than for the year 2017-18 on account of better monsoon prospects.

8) Allotment

The Company has issued and allotted 980 equity shares of ₹ 10/- as per exercise of Employee Stock Options by the employees in accordance with Employee Stock Option Plan (ESOP)- 2012 of the Company.

9) Fixed Deposits

Your Company has not accepted any deposits within the meaning of Section 73 of the Companies Act, 2013 and the Companies (Acceptance of Deposits) Rules, 2014 during the year under review.

10) Auditors

Statutory Auditors : The shareholders, at the 30th Annual General Meeting held on 29th September 2016, have appointed M/s.S.Krishnamoorthy & Co., Chartered Accountants as Statutory Auditors for a term of five financial years from 2016-17 to 2020-21, who will hold office up to the conclusion of the 35th AGM to be held in the year 2021, subject to ratification of appointment by the shareholders at every AGM. However, as per the Companies (Amendment) Act, 2018 the requirement of ratification has been done away with, with effect from 7th May 2018. Hence, necessary resolution for modifying the resolution passed at the 30th AGM held on 29th September 2016, will be placed at the ensuing AGM for approval of the shareholders. M/s.S.Krishnamoorthy & Co., Chartered Accountants, the present auditors of the company, have furnished necessary certificate in terms of second and third proviso to Section 139(1) of the Companies Act, 2013 read with Rule (4) of Companies (Audit and Auditors) Rules, 2014.

Cost Auditors: In terms of Section 148 of the Companies Act, 2013 read with Companies (Cost Records and Audits) Rules, 2014, the products manufactured by the company viz. Sugar, Industrial Alcohol and Cogeneration of Power are covered under the ambit of mandatory cost audits. As per the recommendation of the Audit Committee, the Board of Directors had appointed M/s.S.Mahadevan & Co., Cost Accountants, as the Cost Auditor of the Company, to carry out the cost audit for the financial year 2018-19 and fixed their remuneration. The necessary resolutions will be placed before the ensuing Annual General Meeting for ratification of remuneration as per Section 148(3) of the Companies Act, 2013.

11) Conservation of energy, technology absorption, foreign exchange earnings and outgo

Annexed herewith as Annexure 1.

ANNEXURE 1
BOARD'S REPORT FOR THE YEAR ENDED 31ST MARCH 2018

A. CONSERVATION OF ENERGY

i) The steps taken or impact on conservation of energy;

At Unit-I, Varadarajnagar:

1. 137 ordinary lamps have been replaced with LED lamps, which resulted in the saving of 19,650 units of power for the financial year.
2. At raw water pumping station, two centrifugal pump operations reduced to one submersible pump, which resulted in saving of 1,70,600 units for the financial year.
3. Drinking water distribution to employee quarters has been streamlined and the pump operation hours reduced, which resulted in saving of 42,300 units of power for the financial year.

At Unit-II, Mundiampakkam

1. Raw water bore well pump directed to reservoir which leads to elimination of Booster pump, resulted in energy saving of 168 units per day and for the financial year 61,320 units.
2. Off-season power consumption is reduced by eliminating, unwanted lights, changing of LED lights (1,410 watts) in place of sodium vapour & mercury lamps (4,590 watts) and equipment trail taken in planned and controlled manner, resulted in reduction of 1,000 units per day.
3. Implementation of cooling water circulation by gravity which leads to elimination of V-XLR cooling tower circulation water pump, resulted in energy saving of 720 units & for the financial year 72,000 units.
4. Installation of 5.5 kw submersible pump along with Tank level control automation in place of 15 kw pump for the supply of service water, resulted in energy saving of 109 units per day & for the financial year 40,030 units.
5. Implementation of sugar melter automation resulted in elimination of 9 ATA, which resulted in energy saving of 73,984 units for the financial year.
6. Eliminated 9 ATA steam usage for molasses conditioner by 1st vapour, resulted in elimination of 9 ATA and energy saving of 45,560 units for the financial year.

At Unit-III, Semmedu

1. TNEB supply provision for CO2 plant operation to minimize 3MW load thereby reducing steam venting from 3 MW exhaust, which resulted in saving of 3.0 tons of 3 ATA Steam per hour.
2. TG Exhaust steam auto control vent valve maintained zero % and steam diverted to Sugar plant operation. This resulted in savings of 12T of 3 ATA Steam /day.
3. VFD introduced for Ash Granulator for reducing the speed, minimizing the wastage, meeting out the production requirement and power saving envisaged with this installation accounted to the tune of 3 Units / Hour.
4. Additional 3.7KW Tube settler Feed pump motor connected in Biogas engine from 8.9.2017, which resulted in power saving of 3 Units / Hour and 12,000 Units for the Financial year.

ii) The steps taken by the company for utilising alternate sources of energy; Nil

iii) The capital investment on energy conservation equipment (₹ in lakhs)

- 1) At Unit-I - 2.20
- 2) At Unit-II - 6.23
- 3) At Unit-III - 9.36

B. TECHNOLOGY ABSORPTION

- i) The efforts made towards technology absorption;
 - 1) New variety Co 11015 was identified for large scale evaluation from Sweet Bloom varietal evaluation project, a collaborative study between SISMA and ICAR Sugarcane Breeding Institute, Coimbatore. This variety recorded highest juice quality from 8th month onwards and recorded higher cane yield than existing ruling variety Co 86032. Rapid multiplication of this variety through tissue culture and chip bud seedling is under progress for large scale suitability study.
 - 2) New variety VSI 08121 was identified from All India Co-ordinated Research Project based on better performance in terms of yield and quality and advanced to multi location trial testing.
 - 3) The promising new varieties viz., Co 0212 and Co 06030 breeder seed material were obtained from Sugarcane Breeding Institute, Coimbatore and planted for large scale evaluation under different soils and climatic conditions and its performance under Big Mill Test.
 - 4) Seed material for two new promising varieties viz., VSI 08005 and MS 10001 were obtained from Vasantdada Sugar Institute, Pune and multiplied for taking up of large scale suitability studies for its yield and juice quality.
 - 5) 25 new All India Co-ordinated Research Project sugarcane clones were obtained from ICAR Sugarcane Breeding Institute, Coimbatore and taken the new set of varietal evaluation trials at Varadaraj Nagar and Mundiampakkam cane farms.
 - 6) Research evaluation of more than 200 clones obtained from Sugarcane Breeding Institute, Coimbatore and Sadhana Agri Tech, Bangalore in the past years resulted in the identification of 10 promising clones faring better than the predominant variety, Co 86032 in terms of both yield and quality. Final evaluation with the selected varieties are under progress.
 - 7) Produced and supplied 1.61 lakhs Tissue culture sugarcane seedlings during 2017-18 financial year which is the highest ever production since inception of Tissue culture lab. Also produced 7208 new variety tissue culture seedlings which is also the highest in a financial year. This quality seed nursery production initiative by the company was widely lauded by other sugar mills and Sugarcane Breeding Institute, Coimbatore during their surveys / field visits.
 - 8) The promising clones identified from R&D trials are being multiplied through Tissue Culture for rapid introduction of new varieties to bestow prime mover advantage to the company in terms of enabling realization of better profits by farmers and higher sugar recoveries by our company.
 - 9) Varietal purity for higher sugar recovery is being ensured through an exclusive R&D breeder seed nursery farm operational at Varadaraj Nagar and Mundiampakkam and catering to the nursery seed requirement of farmers of all our Units.
 - 10) Cotesia parasitoid pilot scale production study initiated for sugarcane inter node borer management. Initial results are encouraging and planning to mass produce and supply in the ensuing year.
 - 11) New model of Extension Wing was introduced in four divisions (2 each at Mundiampakkam and Gingee) to improve the cane yield through "Village Adoption Concept" by implementing the technologies in the adopted villages. Cane Development Assistants were placed and introduced individual plot wise monitoring through field card system to ensure the yield improvement.
 - 12) Trained the cane team and also conducted series of field demonstrations for promotion of deep ploughing through chisel plough and reversible mould board plough / disc plough and organized for the purchase of the implements to the entrepreneurs so as to improve the average cane yield and net income of the farmers.
 - 13) 2600 soil samples in Unit III were analyzed for fertility mapping. Need based fertilizer prescription to farmers through soil analysis is under progress so as to reduce the cost of fertilizers and better productivity. Leaflet on "Importance of soil test based fertilizer application" was printed and circulated to all units.

- 14) Application of bioAPK increased the soil microbial load compared to the initial level. Also application of Bio APK, VAM and Humic with 100% recommended NPK recorded an yield increase of 3.30 t/ac over control plot with 0.20 % higher in CCS %.
 - 15) Novel concept of customized fertilizers application based on specific and balanced nutrient application study revealed the yield advantage of 5 tonnes / acre. Initial juice quality analysis also revealed 0.40% CCS improvement over control plot. Measures are being taken to adopt the technology on large scale.
 - 16) Application of Samartha liquid, an organic growth promoter manufactured by M/s Rajshree Biosolutions LLP, @ 6 lit/ac recorded higher CCS of 10.90 % and comparable yield increase of 8.40 t/ac over control. Large scale suitability and conformation study is under progress.
 - 17) Soil analysis of trash mulching / shredding field results revealed that improvement in soil organic carbon, available N, P, K and MN status. 0.20 % OC increased over trash burning plot due to trash incorporation over a period of time
 - 18) New product field evaluation studies with Potash (organic potash), Vardhan (microbial bio mixture) and chelated zinc for sugarcane yield and quality improvement initiated. Also the Bio D (decomposition culture) for quick trash decomposition in ratoon crop is under progress.
 - 19) Pilot scale evaluation of new “Sticky Pheromone Trap” developed by M/s Rajshree Biosolutions LLP, for management of sugarcane early shoot borer and internode borer successfully completed and supplied to farmers for large scale adoption. It was well received and appreciated by the farmers and cane team for its simplicity and effectiveness in controlling the borer moths.
 - 20) Presented six research articles in National and International symposium. Received Gold Medal Award for Best Paper presentation on “Integrated Biocontrol Technologies for Successful Management of Internode borer (*Chilo sacchariphagus indicus*) pest incidence in Rajshree Sugars, Theni Sugarcane area” in the SISSTA 47th annual convention held at Tirupati and Best Paper Poster Award for “Management of sugarcane borer pests through sticky triangular pheromone trap” in SUCROSYM international symposium held at Coimbatore.
 - 21) “World Soil Day” was celebrated on December 5th, 2017 along with cane growers in all three units to create awareness on importance of soil analysis, soil fertility improvement and deep land preparation.
- ii) The benefits derived like product improvement, cost reduction, product development or import substitution;
 - 1) Developed a “Drip Video” with its importance, laying and maintenance activities. The same was launched on 23rd October 2017 and being showed to farmers through AV Van programme for promotion of drip irrigation
 - 2) The company's efforts in introduction of rain guns to water scarce areas and drought prone crops has created lot of awareness and resulted in adoption of raingun based irrigation by many farmers. This has helped them to save the crop to some extent in drought prone and water scarcity areas.
 - 3) Large scale and targeted adoption of a specific drought management practice of potash and micronutrient foliar spray through entrepreneurs resulted in mitigating crop moisture stress and preventing crop perishals.
 - 4) Continual technology up-gradation of in-house R&D biological control agent production facilities, and, in farmer- entrepreneur units resulted in coverage of 35 to 40 % of cane area across all units with eco-friendly biological control agents and significant reduction in pest incidence and better cost benefit to farmers.
 - iii) In case of imported technology (imported during the last three years reckoned from the beginning of the financial year); Not Applicable.
 - iv) The expenditure incurred on Research and Development: ₹ 144.22 lakhs (₹150.39 lakhs)

C. FOREIGN EXCHANGE EARNINGS AND OUTGO:

The Foreign Exchange earned in terms of actual inflows during the year and the Foreign Exchange outgo during the year in terms of actual outflows (₹ in lakhs)

	2017-18	<i>2016-17</i>
Foreign exchange earned	: Nil	Nil
Foreign exchange outgo	: 1790.90	46.74

(Form No.MR-3)

FOR THE FINANCIAL YEAR ENDED ON 31st March, 2018

[Pursuant to section 204(1) of the Companies Act, 2013 and Rule No. 9 of the Companies (Appointment and Remuneration of Managerial Personnel) Rules, 2014]

To

The Members,
M/s. RAJSHREE SUGARS & CHEMICALS LIMITED
Coimbatore.

I have conducted the SECRETARIAL AUDIT of the compliance of applicable statutory provisions and the adherence to good corporate practices by M/s. RAJSHREE SUGARS & CHEMICALS LIMITED (CIN – L01542TZ1985PLC001706) (hereinafter called the Company). Secretarial Audit was conducted in a manner that provided me a reasonable basis for evaluating the corporate conducts/statutory compliances and expressing my opinion thereon.

Based on my verification of the Company's books, papers, minute books, forms and returns filed and other records maintained by the Company and also the information provided by the Company, its officers, agents and authorized representatives during the conduct of Secretarial Audit, I hereby report that in my opinion, the company has, during the audit period covering the financial year ended on 31st March, 2018 complied with the statutory provisions listed hereunder and also that the Company has proper Board-processes and compliance mechanism in place to the extent, in the manner and subject to the reporting made hereinafter:

I have examined the books, papers, minute books, forms and returns filed and other records maintained by the company for the financial year ended on 31st March, 2018 according to the provisions of:

- i) The Companies Act, 2013 (the Act) and the rules made thereunder;
- ii) The Securities Contracts (Regulation) Act, 1956 ('SCRA') and the Rules made thereunder;
- iii) The Depositories Act, 1996 and the Regulations and Bye-laws framed thereunder;

BOARD'S REPORT FOR THE YEAR ENDED 31ST MARCH 2018

MANAGEMENT DISCUSSION AND ANALYSIS

Industry Scenario and Development

Global Sugar Outlook

Global sugar production is estimated at 180 million tons for year 2017-18 as against the consumption of 184 million tons. The initial estimates of production and consumption for year 2018-19 is 174 and 175 million tons respectively.

Sugar Sector in India

As estimated for the sugar season 2017-18, the sugar production is likely to be over 31 million tons an increase of around 53% from 20.3 million tons of production in the previous year. This has been driven principally by a recovery in production in Maharashtra, North Karnataka and Uttar Pradesh (UP). Maharashtra recorded a production of 10.7 million tons which is 2.5 times of the 4.2 million tons of production in the previous year. Uttar Pradesh also recorded an elevated production of 11.5 million tons which is 32% more than its last year production. With the consumption estimate of 25 million tons the closing stock is expected to be in the range of 10 million tons. It remains to be seen how much exports would get materialized considering the lack of parity between the global and domestic prices. Due to bumper harvest in major sugar producing states UP and Maharashtra the sugar prices plummeted by over 25-30% in last 5 months and currently lower than the cost of production.

Government Announcements

The Government had announced slew of measures to revive the sugar industry.

In February' 18 the Government of India (GOI) has increased the import duty on sugar from 50% to 100%, and in the wake of falling sugar prices the Government announced stock holding limits on sugar mills restricting the quantity of sugar that the mills can release in the market in February and March' 18.

Later in the month of March' 18 GOI scraped 20% export duty on sugar to trim the surplus. Also the Ministry of Food and Consumer Affairs has allowed for sugar exports of 2 million MT under the Minimum Indicative Export Quota (MIEQ) scheme during sugar year 2018. Under this scheme the export quota has been fixed, taking into account the average production of mills achieved in the last two years and upto February of this marketing year. The Government has also allowed the export of white sugar till September 2018 under the Duty Free Import Authorization (DFIA) scheme, whereby exporters are allowed to import sugar at zero duty within three years. But this has not supported the domestic market as the international prices are very low at a discount of 30% to domestic price, making the scheme unviable.

All the above measures failed to arrest the steep fall in the sugar price which continued to drop and hovering at ₹ 26-27/- per kg in May 2018 and led to mounting of the sugarcane dues which stood at ₹ 21,000 crore on all India basis.

The Government in May'18 has announced a subsidy of ₹ 5.50 per quintal of cane crushed which will be paid directly to the sugar cane farmers to clear the FRP dues for the season 2017-18. However, the subsidy fails to fully bridge the huge deficit between the cane price and sugar realization.

Opportunities & Threats

Sugar business is cyclical and is highly dependent upon the monsoon. Price of the sugar cane is beyond the control of the sugar mill and is announced by Central Government. The sugar price realizations are also subject to market sentiments inconsistent with the fundamentals of actual demand and supply.

Delays in the collection of cogeneration dues also pose a challenge to the management of cash flows.

Sugarcane Price

Tamil Nadu (TN) also announced in its recent budget in March'18 that the state would forthwith adopt the Rangarajan Committee formula for cane price even from this current season 2017-18.

Therefore, going forward TN will not announce a SAP for cane which would be a positive factor as there would not be an arbitrary additional cane price beyond the FRP. As a matter of closing the past issue of SAP over 4 years, your company is in negotiation with the farmers to seek a closure. Upon agreement with the farmers on the amount to be paid the same would be provided for in the books of account.

Ethanol

The National Policy on Bio-fuels has set a target of 20 per cent blending of biofuels, both for bio-diesel and bio-ethanol. India can save precious foreign exchange to the tune of \$6.12 billion from its oil import bill by 2021-22 if it achieves the targeted 20 percent ethanol mix in transportation fuel as per the scheduled timeline.

There has been a consistent shortfall in supply of ethanol in the past, mainly on account of the cyclical nature of the sugarcane harvests in the country.

Also achieving the EBP (Ethanol Blending Programme) target may not be easy for mills in the State of Tamil Nadu, given that limits placed by the Government of Tamil Nadu on the production of ethanol are far too low to meet the target of the EBP.

Outlook

Due to the production at the record levels and huge closing stocks, the sugar prices are expected to be suppressed during the full of next year. However, monsoon and Government policy on sugar would continue to have a significant bearing on the prospects of the industry in the coming years. Under the current situation, the industry has proposed measure like diversion of sugar into ethanol, creation of buffer stock and cane farmers' welfare reserve to fund the gap between the FRP and what the industry can pay.

Risks and concerns

Your company continues to review and manage the risks emanating from such a dynamic environment at periodic intervals.

The major risks faced by the industry include sugarcane availability, price realization and regulatory control by Government and financial liquidity amongst others.

Sugarcane availability

Sugarcane is the main raw material in sugar mills. Sugarcane cultivation is monsoon dependent. Hence it becomes unpredictable in adverse climatic conditions. Similarly other factors like scarcity of harvest labour, sugarcane price, and availability of attractive competitive / alternate crops will have a direct impact on cane availability and affect our business.

Risk mitigation: The Company has mitigated this risk by following:

- Continuous yield improvement activities to obtain a better quality cane leading to a better recovery.
- Close monitoring of cane development activities, which includes supply of good quality seeds, fertilizers and manure, among others.
- Promoting drip irrigation.
- Testing new improved varieties of cane.
- Careful monitoring of cane planting and harvesting schedule.
- Introduction of mechanical harvesters.
- Maintaining good relationship with them.

Sugar price realization risk

Sugar being a commodity, the sugar price remains volatile and realizations get adversely affected during a downturn. Coupled with this, higher cane price too affects profitability.

Risk mitigation: To address the challenge of cyclical in the sugar business, the Company has adopted an integrated business model manufacturing sugar and also producing alcohol and cogenerating power from the sugarcane residue viz., molasses and bagasse. The Power and Alcohol business enhances the profitability of the company and de-risks the business from the adverse movements of sugar price.

The Company is also focusing on improving direct sales to institutional buyers to lock down on prices, thereby balancing the volatility of the market.

Regulatory risk

The sugar industry continues to be regulated by State Governments by other controls viz., reservation of cane area and fixing sugarcane price.

Risk mitigation: Indian Sugar Mills Association (ISMA) and South Indian Sugar Mills Association (SISMA) of which the Company is a member are in the process of presenting recommendation for appropriate policy changes to reduce governmental influence in the sugar sector and work toward complete decontrol of the sugar industry.

Financial liquidity risk

Sugar industry is highly working capital intensive. Raising adequate and rightly-priced working capital or arranging funds for payment of the interest and principal with respect to loans availed might pose challenge. The other associated risk is soaring interest rates.

Risk mitigation

The Company was under Corporate Debt Restructuring (CDR) package since April 2014 and was ongoing.

In February 2018, the Reserve Bank of India (RBI) has, vide its circular, withdrawn all existing restructuring mechanisms including CDR and no further guidelines for mid-sized loans has been announced by RBI. The Company will take cognizance of fresh guidelines as they are announced and act appropriately.

The Company has hived off 100% stake in its subsidiary Trident Sugars Limited and net sale proceeds is utilized in reducing the long term loans thus managing the interest cost at better level.

However, the sugarcane availability and sugar price risk continue to have significant impact on the financial liquidity of the Company

Internal control systems and their adequacy

The Company has a well-established internal control systems in the form of well-documented policies, authorization guidelines commensurate with the level of responsibility and standard operating procedures, to ensure proper functioning of operations. Moreover there exists an effective internal audit system, commensurate with the requirements of the company.

The Board, Audit Committee and the Management review the findings and recommendations of the Internal Auditors and take corrective action, wherever necessary. Moreover the Audit Committee periodically interacts with Statutory Auditors and makes continuous assessments of the adequacy and effectiveness of the internal control systems.

Human Performance

The Management Staff Strength as on 31st March 2018 is 226. The Non-Management Staff strength as on 31st March 2018 is 682. Industrial Relations are cordial and no significant development.

ANNEXURE - B TO THE AUDITORS' REPORT

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Rajshree Sugars & Chemicals Limited ("the Company") as of 31 March 2018 in conjunction with our audit of the standalone Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that

- (1) Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and

- (3) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion to the best of our information and according to the explanation given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2018, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

NOTES TO THE FINANCIAL STATEMENTS (₹ in Lakhs)

Company overview

RAJSHREE SUGARS AND CHEMICALS LIMITED ('the Company') is a public limited company incorporated in India. The company's equity shares are listed on BSE and NSE. The registered office is located at 338/8, Avinashi Road, Peelamedu Coimbatore - 641 004, Tamilnadu, India.

1. Significant accounting policies

1.1 Statement of compliance

The financial statements have been prepared as a going concern in accordance with Indian Accounting Standards (Ind AS) notified under the Section 133 of the Companies Act, 2013 ("the Act") read with the Companies (Indian Accounting Standards) Rules, 2015 and other relevant provisions of the Act.

Upto the year ended 31st March, 2017, the Company prepared financial statements in accordance with the requirements of previous GAAP, which includes standards notified under the Companies (Accounting Standards) Rules, 2006 (as amended) and other relevant provisions of the Act.

These are Company's first Ind AS based financial statements. The date of transition to Ind AS is 1st April, 2016. Company has opted certain exemptions while first-time adoption of Ind AS based Financial statements (refer transition note in Financial Statements)

1.2 Basis of preparation and presentation

The financial statements have been prepared on the historical cost convention on accrual basis except for certain financial instruments which are measured at fair value at the end of each reporting period, as explained in the accounting policies mentioned below. Historical cost is generally based on the fair value of the consideration given in exchange of goods or services.

The principal accounting policies are set out below:

All assets and liabilities have been classified as current or non-current according to the Company's operating cycle and other criteria set out in the Act. Based on the nature of products and the time between acquisition of assets for processing and their realisation in cash and cash equivalents, the Company has ascertained its operating cycle as twelve months for the purpose of current and non-current classification of assets and liabilities.

1.3 Going concern

The Board of Directors have considered the financial position of the Company at 31 March 2018 and projected cash flows and financial performance of the Company for at least twelve months from the date of approval of these financial statements as well as planned cost and cash improvement actions, and believe that the plan for sustained profitability remains on course.

The Board of Directors have taken actions to ensure that appropriate long-term cash resources are in place at the date of signing the accounts to fund the Company's operations.

1.4 Use of estimates and judgments

The preparation of financial statements in conformity with Ind AS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amount of assets, liabilities, income, expenses and disclosures of contingent assets and liabilities at the date of these financial statements and the reported amount of revenues and expenses for the years presented. Actual results may differ from the estimates.

Estimates and underlying assumptions are reviewed at each balance sheet date. Revisions to accounting estimates are recognised in the period in which the estimates are revised and future periods affected.

NOTES TO THE FINANCIAL STATEMENTS (₹ in Lakhs)

1.5 Revenue recognition

The Company recognizes revenue when the amount of revenue and its related cost can be reliably measured and it is probable that future economic benefits will flow to the entity and specific criteria in relation to significant risk.

1.5.1 Sale of goods

Revenue from sale of products is recognised when the products are delivered to the dealer / customer or when delivered to the carrier, when risks and rewards of ownership pass to the dealer / customer, as per terms of contract.

Revenue is measured at the fair value of the consideration received or receivable and net of returns, trade allowances and rebates. It includes excise duty but excludes Value Added Tax and Sales Tax.

1.5.2 Income from service

Income from services is accounted over the period of rendering of services.

1.6 Foreign currencies

1.6.1. Functional and presentation currency

Items included in the financial statements are measured using the currency of the primary economic environment in which the company operates ('the functional currency'). The financial statements are presented in Indian rupee, which is the company's functional and presentation currency.

1.6.2. Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognized in profit or loss.

1.7 Employee Benefits

1.7.1. Short term obligations

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognized in respect of employees' services upto the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the balance sheet.

1.7.2. Other long term employee benefit

The liabilities for earned leave are not expected to be settled wholly within 12 months after the end of the period in which the employees render the related service. They are therefore measured as the present value of the expected future payments to be made in respect of services provided by employee upto the end of reporting period using the projected unit credit method. The benefits are discounted using the market yields at the end of the reporting period that have terms approximating to the terms of the related obligation. Measurements as a result of experience adjustments and changes in actuarial assumptions are recognized in profit or loss.

The obligations are presented as current liabilities in the balance sheet if the entity does not have an unconditional right to defer settlement for at least twelve months after the reporting period, regardless of when the actual settlement is expected to occur.

NOTES TO THE FINANCIAL STATEMENTS (₹ in Lakhs)

Accumulated leave, which is expected to be utilized within the next 12 months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Company treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the period-end. Actuarial gains/losses are immediately taken to the statement of profit and loss and are not deferred. The Company presents the leave as a current liability in the balance sheet; to the extent it does not have an unconditional right to defer its settlement for 12 months after the reporting date. Where Company has the unconditional legal and contractual right to defer the settlement for a period beyond 12 months, the same is presented as non-current liability.

1.7.3. Post-employment obligation

The Company operates the following post-employment schemes:

- a) Defined benefit plans such as gratuity for its eligible employees, and
- b) Defined contribution plans such as provident fund.

Defined contribution plan:

Retirement benefit in the form of provident fund is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The Company recognizes contribution payable to the provident fund scheme and pension scheme as expenditure, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognized as an asset to the extent that the pre-payment will lead to, for example, a reduction in future payment or a cash refund.

Defined benefit plan:

The Company has a gratuity defined benefit plans for its employees. The costs of providing benefits under these plans are determined on the basis of actuarial valuation at each year-end. Separate actuarial valuation is carried out for each plan using the projected unit credit method. Re-measurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income. They are included in retained earnings in the statement of changes in equity and the balance sheet. The Company has funded this with Life Insurance Corporation of India ('LIC') and HDFC Standard Life Insurance Company. The contributions made to the LIC are treated as plan assets. The defined benefit obligation recognised in the balance sheet represents the present value of the defined benefit obligation as reduced by the fair value of plan assets.

1.7.4. Bonus plans

The Company recognizes a liability and an expense for bonus. The Company recognizes a provision where contractually obliged or where there is a past practice that has created a constructive obligation

1.8. Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

NOTES TO THE FINANCIAL STATEMENTS (₹ in Lakhs)

1.8.1. Current tax

The income tax expenses or credit is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's current tax is calculated using tax rates that have been enacted.

1.8.2. Deferred tax

Deferred tax is provided in full, using the balance sheet approach, on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profits. Deferred tax liabilities are recognised for all taxable temporary differences. Deferred tax assets are recognised for all deductible temporary differences and incurred tax losses to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

1.8.3. Current and deferred tax for the year

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the income taxes are also recognised in other comprehensive income or directly in equity respectively.

1.9. Property, plant and equipment

Property, plant and equipment are stated at cost of acquisition or construction less accumulated depreciation less accumulated impairment, if any.

Such assets are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. The other repairs and maintenance of revenue nature are charged to profit or loss during the reporting period in which they are incurred.

NOTES TO THE FINANCIAL STATEMENTS (₹ in Lakhs)

Transition to Ind AS

On transition to Ind AS, the Company has elected adopt fair value as its deemed cost for the land and apply Ind-AS 16 retrospectively for other class of assets as at 1st April 2016.

Depreciation methods, estimated useful lives and residual value.

Depreciation is calculated using the straight-line method on a prorata basis from the month in which each asset is put to use to allocate their cost, net of their residual values, over their estimated useful lives.

Company has ascertained and adopted the useful life of the asset as mentioned in the Schedule II of Companies Act, 2013

The assets' residual values, estimated useful lives and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Gains and losses on disposal are determined by comparing proceeds with carrying amount and are credited / debited to profit or loss.

1.9.1. Investment Property

Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied by the group, is classified as investment property. Investment property is measured initially at its cost, including related transaction costs and where applicable borrowing costs. Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the group and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed when incurred. When part of an investment property is replaced, the carrying amount of the replaced part is derecognised.

1.9.1.1. Deemed cost on transition to Ind AS

For transition to Ind AS, the Company has elected to continue with the carrying value of all of its investment property recognised as of 1st April, 2016 (transition date) measured as per the previous GAAP and use that carrying value as its deemed cost as of the transition date.

1.10. Intangible assets

Intangible assets are stated at cost of acquisition or construction less accumulated depreciation less accumulated impairment, if any.

1.10.1. Deemed cost on transition to Ind AS

For transition to Ind AS, the Company has elected to continue with the carrying value of all of its intangible assets recognised as of 1st April, 2016 (transition date) measured as per the previous GAAP and use that carrying value as its deemed cost as of the transition date.

1.11. Impairment of tangible and intangible assets

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any).

NOTES TO THE FINANCIAL STATEMENTS (₹ in Lakhs)

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

1.12. Inventories

Inventories are valued at the lower of cost and net realizable value.

The cost of finished goods and work in progress comprises raw materials, direct labor, other direct costs and appropriate proportion of variable and fixed overhead expenditure. Overhead expenditures are being allocated on the basis of normal operating capacity. Raw materials are valued at first in first out. Cost of inventories also include all other costs incurred in bringing the inventories to their present location and condition. Costs of purchased inventory are determined after deducting rebates and discounts. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

Non- production inventory (other than those supplied along with main plant and machinery, which are capitalised and depreciated accordingly) are charged to profit or loss on consumption.

1.13 Provisions and contingencies

Provisions: Provisions are recognised when there is a present obligation or constructive obligation as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there is a reliable estimate of the amount of the obligation. Provisions are determined by discounting the expected future cash flows at a pre tax rate that reflects current market assessment of the time value of money and the risks specific to the liability

Contingent Liabilities: Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

1.14 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial instruments (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in profit or loss. Subsequently, financial instruments are measured according to the category in which they are classified.

1.15 Financial assets

All purchases or sales of financial assets are recognized and de-recognized on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognized financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

NOTES TO THE FINANCIAL STATEMENTS (₹ in Lakhs)

1.15.1. Classification of financial assets

Classification of financial assets depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

The Company classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
- those measured at amortised cost

The classification depends on the Company's business model for managing the financial assets and the contractual terms of the cash flows.

A financial asset that meets the following two conditions is measured at amortised cost unless the asset is designated at fair value through profit or loss under the fair value option:

- Business model test : the objective of the Company's business model is to hold the financial asset to collect the contractual cash flows.
- Cash flow characteristic test : the contractual term of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A financial asset that meets the following two conditions is measured at fair value through other comprehensive income unless the asset is designated at fair value through profit or loss under the fair value option:

- business model test : the financial asset is held within a business model whose objective is achieved by both collecting cash flows and selling financial assets.
- cash flow characteristic test : the contractual term of the financial asset gives rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All other financial assets are measured at fair value through profit or loss.

1.15.2. Financial assets at fair value through profit or loss (FVTPL)

Investment in equity instrument are classified at fair value through profit or loss, unless the Company irrevocably elects on initial recognition to present subsequent changes in fair value in other comprehensive income for investments in equity instruments which are not held for trading.

Financial assets that do not meet the amortised cost criteria or fair value through other comprehensive income criteria are measured at fair value through profit or loss. A financial asset that meets the amortised cost criteria or fair value through other comprehensive income criteria may be designated as at fair value through profit or loss upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency that would arise from measuring assets and liabilities or recognising the gains or losses on them on different bases.

Investments in debt based mutual funds are measured at fair value through profit and loss.

Financial assets which are fair valued through profit or loss are measured at fair value at the end of each reporting period, with any gains or losses arising on re measurement recognized in profit or loss.

1.15.3. Trade receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost less provision for impairment.

NOTES TO THE FINANCIAL STATEMENTS (₹ in Lakhs)

1.15.4. Cash and cash equivalents

In the cash flow statement, cash and cash equivalents includes cash in hand, cheques and drafts in hand, balances with bank and deposits held at call with financial institutions, short-term highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Bank overdrafts are shown within borrowings in current liabilities in the balance sheet and forms part of financing activities in the cash flow statement. Book overdraft are shown within other financial liabilities in the balance sheet and forms part of operating activities in the cash flow statement.

1.15.5. Impairment of financial assets

The Company assesses impairment based on expected credit losses (ECL) model to the following :

- financial assets measured at amortised cost
- financial assets measured at fair value through other comprehensive income

Expected credit loss are measured through a loss allowance at an amount equal to :

- the twelve month expected credit losses (expected credit losses that result from those default events on the financial instruments that are possible within twelve months after the reporting date); or
- full life time expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 18, the Company always measures the loss allowance at an amount equal to lifetime expected credit losses.

1.15.6. Income recognition

Interest Income: Interest income from debt instruments is recognised using the effective interest rate method.

1.16 Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest rate method or at fair value through profit or loss.

1.16.1. Trade and other payables

Trade and other payables represent liabilities for goods or services provided to the Company prior to the end of financial year which are unpaid.

1.16.2. Borrowings

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in profit or loss over the period of the borrowings using the effective interest rate method.

Borrowings are removed from the balance sheet when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss.

1.16.3. Foreign exchange gains or losses

For financial liabilities that are denominated in a foreign currency and are measured at amortised cost at the end of each reporting period, the foreign exchange gains and losses are determined based on the amortised cost of the instruments and are recognised in profit or loss.

The fair value of financial liabilities denominated in a foreign currency is determined in that foreign currency and translated at the exchange rate at the end of the reporting period. For financial liabilities that are measured as at fair value through profit or loss, the foreign exchange component forms part of the fair value gains or losses and is recognised in profit or loss.

NOTES TO THE FINANCIAL STATEMENTS (₹ in Lakhs)

1.17. Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker.

1.18. Leases

Leases of property, plant and equipment where the Company, as a lessee has substantially all the risks and rewards of ownership, are classified as finance leases. Finance leases are capitalised at the lease's inception at the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding rental obligations, net of finance charges, are included in borrowings or other financial liabilities as appropriate. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to the profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Leases in which a significant portion of the risks and rewards of ownership are not transferred to the Company as lessee are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to profit or loss on a straight-line basis over the period of the lease unless the payments are structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases.

1.19. Borrowing costs

General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

Other borrowing costs are expensed in the period in which they are incurred.

1.20. Government grants

Grants from the government are recognised at their fair value where there is a reasonable assurance that the grant will be received and the Company will comply with all attached conditions.

Government grants relating to income are deferred and recognised in the profit or loss over the period necessary to match them with the costs that they are intended to compensate and presented within other income.

Government grants relating to the purchase of property, plant and equipment are included in non-current liabilities as deferred income and are credited to profit or loss on a straight-line basis over the expected lives of the related assets and presented within other income.

1.21. Earning Per Share

Basic earnings per share have been computed by dividing the net income by the weighted average number of shares outstanding during the year. Diluted earnings per share has been computed using the weighted average number of shares and diluted potential shares, except where the result would be anti-dilutive

1.22. Dividends

Final dividends on shares are recorded on the date of approval by the shareholders of the Company.

(v) Sensitivity analysis			
The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:			
Impact on defined benefit obligation			
	Change in assumption	Increase in assumption	Decrease in assumption
Discount rate	1.00%	-6%	7%
Salary growth rate	1.00%	7%	-7%
The sensitivity of the defined benefit obligation to other assumption are insignificant			
(vi) Risk exposure			
Through its defined benefit plans, The company is exposed to a number of risks, the most significant of which are detailed below:			
Asset volatility			
The plan liabilities are calculated using a discount rate set with reference to bond yields; if plan assets underperform this yield, this will create a deficit.			
Changes in bond yields			
A decrease in bond yields will increase plan liabilities, although this will be partially offset by an increase in the value of the plans' bond holdings.			
Major category of plan assets as a % of total plan assets:			
Funds managed by LIC & HDFC Life	100.00%	100.00%	100.00%

(i) Fair value hierarchy

This section explains the judgements and estimates made in determining the fair values of the financial instruments that are (a) recognised and measured at fair value and (b) measured at amortised cost and for which fair values are disclosed in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the group has classified its financial instruments into the three levels prescribed under the accounting standard. An explanation of each level follows underneath the table.

Level 1: Level 1 hierarchy includes financial instruments measured using quoted prices. This includes listed equity instruments, traded bonds and mutual funds that have quoted price. The fair value of all equity instruments (including bonds) which are traded in the stock exchanges is valued using the closing price as at the reporting period. The mutual funds are valued using the closing NAV.

Level 2: The fair value of financial instruments that are not traded in an active market (for example, traded bonds, over-the-counter derivatives) is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities, contingent consideration and indemnification asset included in level 3.

There are no transfers between levels 1 and 2 during the year.

The company's policy is to recognise transfers into and transfers out of fair value hierarchy levels as at the end of the reporting period.

Fair value of assets carried at amortised cost

The carrying amounts of trade receivables, trade payables, loans, deposits, advances, borrowings, cash and cash equivalents and other current financial liabilities are considered to be the same as their fair values, due to their short-term nature.

FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

39 Financial Risk Management

The company's activities expose it to market risk, liquidity risk and credit risk.

This note explains the sources of risk which the entity is exposed to and how the entity manages the risk

(A) Credit risk

Credit risk on deposit is mitigated by the depositing the funds in reputed private sector bank.

For trade receivables, the primary source of credit risk is that these are unsecured. The Company sells the products to customers only when the collection of trade receivables is certain and whether there has been a significant increase in the credit risk on an on-going basis is monitored throughout each reporting period. As at the balance sheet date, based on the credit assessment the historical trend of low default is expected to continue. An impairment analysis is performed at each reporting date on an individual basis for major clients. Any recoverability of receivables is provided for based on the impairment assessment. Historical trends showed as at the transition date, 31st March 2017 and 31st March 2018 company had no significant credit risk.

(B) Liquidity risk

Objective of liquidity risk management is to maintain sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due. Management monitors rolling forecasts of The company's liquidity position (comprising the undrawn borrowing facilities below) and cash and cash equivalents on the basis of expected cash flows. The company's liquidity management policy involves projecting cash flows in major currencies and considering the level of liquid assets necessary to meet these, monitoring balance sheet liquidity ratios against internal requirements

(i) Maturities of financial liabilities

The tables below analyse The company's financial liabilities into relevant maturity groupings based on their contractual maturities for:

- all non-derivative financial liabilities, and
- net and gross settled derivative financial instruments for which the contractual maturities are essential for an understanding of the timing of the cash flows.

The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

40 Capital management
(a) Risk management

The company's objectives when managing capital are to

- safeguard their ability to continue as a going concern, so that they can continue to provide returns for shareholders and benefits for other stakeholders, and
- maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, The company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

Consistent with others in the industry, The company monitors capital on the basis of the following gearing ratio:

Net debt (total borrowings net of cash and cash equivalents) divided by

Total 'equity' (as shown in the balance sheet).

The company's strategy is to maintain a optimal gearing ratio. The gearing ratios were as follows:

	March 31, 2018	March 31, 2017	March 31, 2016
Net debt	45,828.56	61,556.22	69,826.58
Total equity	13,163.64	14,388.42	11,395.61
Net debt to equity ratio	3.48	4.28	6.13

(b) Dividends

The company has not declared any dividends during the current year and the previous year.

The accounting policies set out in note 1 have been applied in preparing the financial statements for the year ended 31 March 2018, the comparative information presented in these financial statements for the year ended 31 March 2017 and in the preparation of an opening Ind AS balance sheet at 1 April 2016 (The company's date of transition). In preparing its opening Ind AS balance sheet, The company has adjusted the amounts reported previously in financial statements prepared in accordance with the accounting standards notified under Companies (Accounting Standards) Rules, 2006 (as amended) and other relevant provisions of the Act (previous GAAP or Indian GAAP).

An explanation of how the transition from previous GAAP to Ind AS has affected The company's financial position, financial performance and cash flows is set out in the following tables and notes.

A. Exemptions and exceptions availed

Set out below are the applicable Ind AS 101 optional exemptions and mandatory exceptions applied in the transition from previous GAAP to Ind AS.

A.1 Ind AS optional exemptions

A.1.1 Business combinations

Ind AS 101 provides the option to apply Ind AS 103 prospectively from the transition date or from a specific date prior to the transition date. This provides relief from full retrospective application that would require restatement of all business combinations prior to the transition date.

The group elected to apply Ind AS 103 prospectively to business combinations occurring after its transition date. Business combinations occurring prior to the transition date have not been restated. The group has applied same exemption for investment in associates and joint ventures.

A.1.2 Deemed cost

The Company has elected to restate retrospectively all its property, plant and equipment as per the Ind AS 16, except for freehold land, which have been accounted at fair value as deemed cost on transition date (as at 1st April, 2016).

NOTES TO THE FINANCIAL STATEMENTS (₹ in Lakhs)

A.1.3 Leases

Appendix C to Ind AS 17 requires an entity to assess whether a contract or arrangement contains a lease. In accordance with Ind AS 17, this assessment should be carried out at the inception of the contract or arrangement. Ind AS 101 provides an option to make this assessment on the basis of facts and circumstances existing at the date of transition to Ind AS, except where the effect is expected to be not material. The company has elected to apply this exemption for such contracts/arrangements.

A.2 Ind AS mandatory exceptions

A.2.1 Estimates

An entity's estimates in accordance with Ind ASs at the date of transition to Ind AS shall be consistent with estimates made for the same date in accordance with previous GAAP (after adjustments to reflect any difference in accounting policies), unless there is objective evidence that those estimates were in error. Ind AS estimates as at 1 April 2016 are consistent with the estimates as at the same date made in conformity with previous GAAP. The company made estimates for following items in accordance with Ind AS at the date of transition as these were not required under previous GAAP: Impairment of financial assets based on expected credit loss model.

A.2.2 De-recognition of financial assets and liabilities

Ind AS 101 requires a first-time adopter to apply the de-recognition provisions of Ind AS 109 prospectively for transactions occurring on or after the date of transition to Ind AS. However, Ind AS 101 allows a first-time adopter to apply the de-recognition requirements in Ind AS 109 retrospectively from a date of the entity's choosing, provided that the information needed to apply Ind AS 109 to financial assets and financial liabilities derecognised as a result of past transactions was obtained at the time of initially accounting for those transactions.

The group has elected to apply the de-recognition provisions of Ind AS 109 prospectively from the date of transition to Ind AS.

A.2.3 Classification and measurement of financial assets

Ind AS 101 requires an entity to assess classification and measurement of financial assets (investment in debt instruments) on the basis of the facts and circumstances that exist at the date of transition to Ind AS.

A.2.4 Soft Loans

Below market interest rate benefits for loans existing at the date of transition has not recognised the as government grant in line with para B10 mandatory exemption

C: Notes to first-time adoption:

Note 1: Investment in Subsidiaries

Investment in subsidiary has been treated as asset held for sale as the conditions outlined under Ind-AS 105 are met.

Note 2: Fair valuation of Land and Retrospective application of Ind AS 16

Company has adopted fair value of as it deemed cost for the land and retrospectively applied Ind AS 16 for other class of assets, Due to the above the equity increased by ₹ 7,447.15 lakhs as at 31st March 2017 (April 1, 2016 ₹ 7,470.49 lakhs) and profit for FY 16-17 decreased by ₹ 23.34 lakhs.

NOTES TO THE FINANCIAL STATEMENTS (₹ in Lakhs)

Note 3: Instruments entirely in the nature of equity

Under previous GAAP, loans given by promoter were classified as loans, Under Ind-AS based on the substance of the agreement same has been classified as equity, due to this the equity as at April 1, 2016 increased by ₹ 894.60 Lakhs.

Note 4: Loans at amortised cost

Under previous GAAP, loans are recognised at nominal value, interest rate of the loans has been recomputed at Effective interest rate (EIR) basis as per Ind-AS 109, due to this the equity as at March 31, 2017 decreased by ₹ 843.61 Lakhs (April 1, 2016 ₹ 915.59 Lakhs). Profit for FY 16-17 increased ₹ 71.98 Lakhs.

Note 5: Finance lease classification

Certain arrangement as been classified as finance lease under Ind AS 109 as at transition date, due to this the equity as at March 31, 2017 and Profit for FY 16-17 decreased by ₹ 56.00 Lakhs.

Note 6: Employee stock option expense

Under the previous GAAP, the cost of equity-settled employee share-based plan were recognised using the intrinsic value method. Under Ind AS, the cost of equity settled share-based plan is recognised based on the fair value of the options as at the grant date. Consequently, the amount recognised in share option outstanding account increased by ₹ 32.07 lakhs as at 31 March 2017 (1 April 2016 - ₹ 28.04 lakhs). The profit for the year ended 31 March 2016 decreased by ₹ 4.27 lakhs. There is no impact on total equity.

Note 7: Remeasurements of post-employment benefit obligations

Under Ind AS, remeasurements i.e. actuarial gains and losses and the return on plan assets, excluding amounts included in the net interest expense on the net defined benefit liability are recognised in other comprehensive income instead of profit or loss. Under the previous GAAP, these remeasurements were forming part of the profit or loss for the year. As a result of this change, the profit for the year ended March 31, 2017 increased by ₹ 23.35 lakhs. There is no impact on the total equity as at 31 March 2017.

Note 8: Investment property

Under Ind AS, investment properties are required to be separately presented on the face of the balance sheet. There is no impact on the total equity or profit as a result of this adjustment.

Note 9: Excise duty

Under the previous GAAP, revenue from sale of products was presented exclusive of excise duty. Under Ind AS, revenue from sale of goods is presented inclusive of excise duty. The excise duty paid is presented on the face of the statement of profit and loss as part of expenses. This change has resulted in an increase in total revenue and total expenses for the year ended 31 March 2017 by ₹ 2846.27 lakhs. There is no impact on the total equity and profit.

Note 10: Others

Under previous GAAP security deposit were carried at its nominal value and under Ind-AS the same were fair valued under transition date and subsequent amortisation prepaid rent. All these adjustments had marginal impact on equity and profit.

Note 11: Deferred tax

Deferred tax have been recognised on the adjustments made on transition to Ind AS.

ANNEXURE - A TO THE AUDITORS' REPORT

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Rajshree Sugars & Chemicals Limited ("the Holding Company") as of 31 March 2018 and its subsidiary company as of 3 April 2017 in conjunction with our audit of the consolidated financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Respective Board of Directors of the Holding Company and its subsidiary companies, which are companies incorporated in India, are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") issued by ICAI and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that

- (1) Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- (3) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Holding Company and its subsidiary company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2018, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (₹ in Lakhs)

Group overview

RAJSHREE SUGARS AND CHEMICALS LIMITED is a public limited Company incorporated in India. The Company's equity shares are listed on BSE and NSE. The registered office is located at 338/8, Avinashi Road, Peelamedu Coimbatore - 641 004, Tamilnadu, India.

TRIDENT SUGARS LIMITED is an unlisted public limited Company incorporated in India. Both Rajshree Sugars & Chemicals Limited and Trident Sugars Limited hereinafter called as the ('the Group').

1. Significant accounting policies

1.1 Statement of compliance

The financial statements have been prepared as a going concern in accordance with Indian Accounting Standards (Ind AS) notified under the Section 133 of the Companies Act, 2013 ("the Act") read with the Companies (Indian Accounting Standards) Rules, 2015 and other relevant provisions of the Act.

Upto the year ended 31st March, 2017, the Group prepared financial statements in accordance with the requirements of previous GAAP, which includes standards notified under the Companies (Accounting Standards) Rules, 2006 (as amended) and other relevant provisions of the Act.

These are Group's first Ind AS based financial statements. The date of transition to Ind AS is 1st April, 2016. Group has opted certain exemptions while first-time adoption of Ind As based Financial statement (refer transition note in Financial Statement).

1.2 Basis of preparation and presentation

The financial statements have been prepared on the historical cost convention on accrual basis except for certain financial instruments which are measured at fair value at the end of each reporting period, as explained in the accounting policies mentioned below. Historical cost is generally based on the fair value of the consideration given in exchange of goods or services.

The principal accounting policies are set out below:

All assets and liabilities have been classified as current or noncurrent according to the Group's operating cycle and other criteria set out in the Act. Based on the nature of products and the time between acquisition of assets for processing and their realisation in cash and cash equivalents, the Group has ascertained its operating cycle as twelve months for the purpose of current and non-current classification of assets and liabilities.

Basis of Consolidation:

Subsidiaries are all entities (including structured entities) over which the group has control. The group controls an entity when the group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the relevant activities of the entity. Entities controlled by the Company are consolidated from the date of control commences until the date of control ceases.

When the group ceases to consolidate or equity account for an investment because of a loss of control, joint control or significant influence, any retained interest in the entity is remeasured to its fair value with the change in carrying amount recognised in profit or loss. This fair value becomes the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss.

The group has the intention to dispose off its interest in Trident Sugars as on April 1, 2016 accordingly classified the Assets and liabilities of the subsidiary as assets held for sale and liabilities towards to assets held for sale respectively as on April 1, 2016 and March 31, 2017.

The subsidiary Company was hived-off as on 3rd April 2017. The figures in the consolidated statement as on 31st March 2018 therefore is exclusive of the erstwhile subsidiary Company and is given as a matter of statutory requirement.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (₹ in Lakhs)

1.3 Going concern

The board of directors have considered the financial position of the Group at 31 March 2018 and projected cash flows and financial performance of the Group for at least twelve months from the date of approval of these financial statements as well as planned cost and cash improvement actions, and believe that the plan for sustained profitability remains on course.

The board of directors have taken actions to ensure that appropriate long-term cash resources are in place at the date of signing the accounts to fund the Group's operations.

1.4 Use of estimates and judgments

The preparation of financial statements in conformity with Ind AS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amount of assets, liabilities, income, expenses and disclosures of contingent assets and liabilities at the date of these financial statements and the reported amount of revenues and expenses for the years presented. Actual results may differ from the estimates.

Estimates and underlying assumptions are reviewed at each balance sheet date. Revisions to accounting estimates are recognised in the period in which the estimates are revised and future periods affected.

1.5 Revenue recognition

The Group recognizes revenue when the amount of revenue and its related cost can be reliably measured and it is probable that future economic benefits will flow to the entity and specific criteria in relation to significant risk.

1.5.1 Sale of goods

Revenue from sale of products is recognised when the products are delivered to the dealer / customer or when delivered to the carrier, when risks and rewards of ownership pass to the dealer / customer, as per terms of contract.

Revenue is measured at the fair value of the consideration received or receivable and net of returns, trade allowances and rebates. It includes excise duty but excludes Value Added Tax and Sales Tax.

1.5.2 Income from service

Income from services is accounted over the period of rendering of services.

1.6 Foreign currencies

1.6.1. Functional and presentation currency

Items included in the financial statements are measured using the currency of the primary economic environment in which the Group operates ('the functional currency'). The financial statements are presented in Indian rupee, which is the Group's functional and presentation currency.

1.6.2. Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognized in profit or loss.

1.7 Employee Benefits

1.7.1. Short term obligations

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognized in respect of employees' services upto the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the balance sheet.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (₹ in Lakhs)

1.7.2. Other long term employee benefit

The liabilities for earned leave are not expected to be settled wholly within 12 months after the end of the period in which the employees render the related service. They are therefore measured as the present value of the expected future payments to be made in respect of services provided by employee upto the end of reporting period using the projected unit credit method. The benefits are discounted using the market yields at the end of the reporting period that have terms approximating to the terms of the related obligation. Measurements as a result of experience adjustments and changes in actuarial assumptions are recognized in profit or loss.

The obligations are presented as current liabilities in the balance sheet if the entity does not have an unconditional right to defer settlement for at least twelve months after the reporting period, regardless of when the actual settlement is expected to occur.

Accumulated leave, which is expected to be utilized within the next 12 months, is treated as short-term employee benefit. The Group measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Group treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the period-end. Actuarial gains/losses are immediately taken to the statement of profit and loss and are not deferred. The Group presents the leave as a current liability in the balance sheet; to the extent it does not have an unconditional right to defer its settlement for 12 months after the reporting date. Where Group has the unconditional legal and contractual right to defer the settlement for a period beyond 12 months, the same is presented as non-current liability.

1.7.3. Post-employment obligation

The Group operates the following post-employment schemes:

- a) Defined benefit plans such as gratuity for its eligible employees, and
- b) Defined contribution plans such as provident fund.

Defined contribution plan:

Retirement benefit in the form of provident fund is a defined contribution scheme. The Group has no obligation, other than the contribution payable to the provident fund. The Group recognizes contribution payable to the provident fund scheme and pension scheme as expenditure, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognized as an asset to the extent that the pre-payment will lead to, for example, a reduction in future payment or a cash refund.

Defined benefit plan :

The Group has a gratuity defined benefit plans for its employees. The costs of providing benefits under these plans are determined on the basis of actuarial valuation at each year-end. Separate actuarial valuation is carried out for each plan using the projected unit credit method. Re-measurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income. They are included in retained earnings in the statement of changes in equity and the balance sheet. The Group has funded this with Life Insurance Corporation of India ('LIC'). The contributions made to the LIC are treated as plan assets. The defined benefit obligation recognised in the balance sheet represents the present value of the defined benefit obligation as reduced by the fair value of plan assets.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (₹ in Lakhs)

1.7.4. Bonus plans

The Group recognizes a liability and an expense for bonus. The Group recognizes a provision where contractually obliged or where there is a past practice that has created a constructive obligation

1.8. Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

1.8.1. Current tax

The income tax expenses or credit is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Group's current tax is calculated using tax rates that have been enacted.

1.8.2. Deferred tax

Deferred tax is provided in full, using the balance sheet approach, on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profits. Deferred tax liabilities are recognised for all taxable temporary differences. Deferred tax assets are recognised for all deductible temporary differences and incurred tax losses to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

1.8.3. Current and deferred tax for the year

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the income taxes are also recognised in other comprehensive income or directly in equity respectively.

1.9. Property, plant and equipment

Property, plant and equipment are stated at cost of acquisition or construction less accumulated depreciation less accumulated impairment, if any.

Such assets are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. The other repairs and maintenance of revenue nature are charged to profit or loss during the reporting period in which they are incurred.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (₹ in Lakhs)

Transition to Ind AS

On transition to Ind AS, the Group has elected to adopt fair value as its deemed cost for the land and apply Ind-AS 16 retrospectively for other class of assets as at 1st April 2016,

Depreciation methods, estimated useful lives and residual value

Depreciation is calculated using the straight-line method on a prorata basis from the month in which each asset is put to use to allocate their cost, net of their residual values, over their estimated useful lives.

Group has ascertained and adopted the useful life of the asset as mentioned in the schedule II of Companies Act, 2013

The assets' residual values, estimated useful lives and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Gains and losses on disposal are determined by comparing proceeds with carrying amount and are credited / debited to profit or loss.

1.9.1. Investment Property

Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied by the group, is classified as investment property. Investment property is measured initially at its cost, including related transaction costs and where applicable borrowing costs. Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the group and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed when incurred. When part of an investment property is replaced, the carrying amount of the replaced part is derecognised.

1.9.1.1. Deemed cost on transition to Ind AS

For transition to Ind AS, the Group has elected to continue with the carrying value of all of its investment property recognised as of 1st April, 2016 (transition date) measured as per the previous GAAP and use that carrying value as its deemed cost as of the transition date.

1.10. Intangible assets

Intangible assets are stated at cost of acquisition or construction less accumulated depreciation less accumulated impairment, if any.

1.10.1. Deemed cost on transition to Ind AS

For transition to Ind AS, the Group has elected to continue with the carrying value of all of its intangible assets recognised as of 1st April, 2016 (transition date) measured as per the previous GAAP and use that carrying value as its deemed cost as of the transition date.

1.11. Impairment of tangible and intangible assets

At the end of each reporting period, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any).

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

1.12. Inventories

Inventories are valued at the lower of cost and net realizable value.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (₹ in Lakhs)

The cost of finished goods and work in progress comprises raw materials, direct labor, other direct costs and appropriate proportion of variable and fixed overhead expenditure. Overhead expenditures are being allocated on the basis of normal operating capacity. Raw materials are valued at first in first out. Cost of inventories also include all other costs incurred in bringing the inventories to their present location and condition. Costs of purchased inventory are determined after deducting rebates and discounts. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

Non- production inventory (other than those supplied along with main plant and machinery, which are capitalised and depreciated accordingly) are charged to profit or loss on consumption.

1.13 Provisions and contingencies

Provisions: Provisions are recognised when there is a present obligation or constructive obligation as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there is a reliable estimate of the amount of the obligation. Provisions are determined by discounting the expected future cash flows at a pre tax rate that reflects current market assessment of the time value of money and the risks specific to the liability

Contingent Liabilities: Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the Group or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

1.14 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Financial assets and financial liabilities are recognised when the Group becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial instruments (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in profit or loss. Subsequently, financial instruments are measured according to the category in which they are classified.

1.15 Financial assets

All purchases or sales of financial assets are recognized and de-recognized on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognized financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

1.15.1. Classification of financial assets

Classification of financial assets depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

The Group classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
- those measured at amortised cost

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (₹ in Lakhs)

The classification depends on the Group's business model for managing the financial assets and the contractual terms of the cash flows.

A financial asset that meets the following two conditions is measured at amortised cost unless the asset is designated at fair value through profit or loss under the fair value option:

- Business model test : the objective of the Group's business model is to hold the financial asset to collect the contractual cash flows.
- Cash flow characteristic test : the contractual term of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A financial asset that meets the following two conditions is measured at fair value through other comprehensive income unless the asset is designated at fair value through profit or loss under the fair value option:

- business model test : the financial asset is held within a business model whose objective is achieved by both collecting cash flows and selling financial assets.
- cash flow characteristic test : the contractual term of the financial asset gives rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All other financial assets are measured at fair value through profit or loss.

1.15.2. Financial assets at fair value through profit or loss (FVTPL)

Investment in equity instrument are classified at fair value through profit or loss, unless the Group irrevocably elects on initial recognition to present subsequent changes in fair value in other comprehensive income for investments in equity instruments which are not held for trading.

Financial assets that do not meet the amortised cost criteria or fair value through other comprehensive income criteria are measured at fair value through profit or loss. A financial asset that meets the amortised cost criteria or fair value through other comprehensive income criteria may be designated as at fair value through profit or loss upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency that would arise from measuring assets and liabilities or recognising the gains or losses on them on different bases.

Investments in debt based mutual funds are measured at fair value through profit and loss.

Financial assets which are fair valued through profit or loss are measured at fair value at the end of each reporting period, with any gains or losses arising on re measurement recognized in profit or loss.

1.15.3. Trade receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost less provision for impairment.

1.15.4. Cash and cash equivalents

In the cash flow statement, cash and cash equivalents includes cash in hand, cheques and drafts in hand, balances with bank and deposits held at call with financial institutions, short-term highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Bank overdrafts are shown within borrowings in current liabilities in the balance sheet and forms part of financing activities in the cash flow statement. Book overdraft are shown within other financial liabilities in the balance sheet and forms part of operating activities in the cash flow statement.

1.15.5. Impairment of financial assets

The Group assesses impairment based on expected credit losses (ECL) model to the following :

- financial assets measured at amortised cost
- financial assets measured at fair value through other comprehensive income

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (₹ in Lakhs)

Expected credit loss are measured through a loss allowance at an amount equal to :

- the twelve month expected credit losses (expected credit losses that result from those default events on the financial instruments that are possible within twelve months after the reporting date); or
- full life time expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 18, the Group always measures the loss allowance at an amount equal to lifetime expected credit losses.

1.15.6. Income recognition

Interest Income: Interest income from debt instruments is recognised using the effective interest rate method.

1.16 Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest rate method or at fair value through profit or loss.

1.16.1. Trade and other payables

Trade and other payables represent liabilities for goods or services provided to the Group prior to the end of financial year which are unpaid.

1.16.2. Borrowings

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in profit or loss over the period of the borrowings using the effective interest rate method.

Borrowings are removed from the balance sheet when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss.

1.16.3. Foreign exchange gains or losses

For financial liabilities that are denominated in a foreign currency and are measured at amortised cost at the end of each reporting period, the foreign exchange gains and losses are determined based on the amortised cost of the instruments and are recognised in profit or loss.

The fair value of financial liabilities denominated in a foreign currency is determined in that foreign currency and translated at the exchange rate at the end of the reporting period. For financial liabilities that are measured as at fair value through profit or loss, the foreign exchange component forms part of the fair value gains or losses and is recognised in profit or loss.

1.17. Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (₹ in Lakhs)

1.18. Leases

Leases of property, plant and equipment where the Group, as a lessee has substantially all the risks and rewards of ownership, are classified as finance leases. Finance leases are capitalised at the lease's inception at the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding rental obligations, net of finance charges, are included in borrowings or other financial liabilities as appropriate. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to the profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Leases in which a significant portion of the risks and rewards of ownership are not transferred to the Group as lessee are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to profit or loss on a straight-line basis over the period of the lease unless the payments are structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases.

1.19. Borrowing costs

General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

Other borrowing costs are expensed in the period in which they are incurred.

1.20. Government grants

Grants from the government are recognised at their fair value where there is a reasonable assurance that the grant will be received and the Group will comply with all attached conditions.

Government grants relating to income are deferred and recognised in the profit or loss over the period necessary to match them with the costs that they are intended to compensate and presented within other income.

Government grants relating to the purchase of property, plant and equipment are included in non-current liabilities as deferred income and are credited to profit or loss on a straight-line basis over the expected lives of the related assets and presented within other income.

1.21. Earning Per Share

Basic earnings per share have been computed by dividing the net income by the weighted average number of shares outstanding during the year. Diluted earnings per share has been computed using the weighted average number of shares and diluted potential shares, except where the result would be anti-dilutive.

1.22. Dividends

Final dividends on shares are recorded on the date of approval by the shareholders of the Group.

(vi) Risk exposure

Through its defined benefit plans, The company is exposed to a number of risks, the most significant of which are detailed below:

Asset volatility

The plan liabilities are calculated using a discount rate set with reference to bond yields; if plan assets underperform this yield, this will create a deficit.

Changes in bond yields

A decrease in bond yields will increase plan liabilities, although this will be partially offset by an increase in the value of the plans' bond holdings.

Major category of plan assets as a % of total plan assets:

Funds managed by LIC	100.00%	100.00%	100.00%

(i) Fair value hierarchy

This section explains the judgements and estimates made in determining the fair values of the financial instruments that are (a) recognised and measured at fair value and (b) measured at amortised cost and for which fair values are disclosed in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the group has classified its financial instruments into the three levels prescribed under the accounting standard. An explanation of each level follows underneath the table.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (₹ in Lakhs)

FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Level 1: Level 1 hierarchy includes financial instruments measured using quoted prices. This includes listed equity instruments, traded bonds and mutual funds that have quoted price. The fair value of all equity instruments (including bonds) which are traded in the stock exchanges is valued using the closing price as at the reporting period. The mutual funds are valued using the closing NAV.

Level 2: The fair value of financial instruments that are not traded in an active market (for example, traded bonds, over-the-counter derivatives) is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities, contingent consideration and indemnification asset included in level 3.

There are no transfers between levels 1 and 2 during the year.

The company's policy is to recognise transfers into and transfers out of fair value hierarchy levels as at the end of the reporting period.

Fair value of assets carried at amortised cost

The carrying amounts of trade receivables, trade payables, loans, deposits, advances, borrowings, cash and cash equivalents and other current financial liabilities are considered to be the same as their fair values, due to their short-term nature.

39. Financial risk management

The company's activities expose it to market risk, liquidity risk and credit risk.

This note explains the sources of risk which the entity is exposed to and how the entity manages the risk

A. Credit risk

Credit risk on deposit is mitigated by the depositing the funds in reputed private sector bank.

For trade receivables, the primary source of credit risk is that these are unsecured. The Company sells the products to customers only when the collection of trade receivables is certain and whether there has been a significant increase in the credit risk on an on-going basis is monitored throughout each reporting period. As at the balance sheet date, based on the credit assessment the historical trend of low default is expected to continue. An impairment analysis is performed at each reporting date on an individual basis for major clients. Any recoverability of receivables is provided for based on the impairment assessment. Historical trends showed as at the transition date, 31st March 2017 and 31st March 2018 company had no significant credit risk.

B. Liquidity risk

Objective of liquidity risk management is to maintain sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due. Management monitors rolling forecasts of The company's liquidity position (comprising the undrawn borrowing facilities below) and cash and cash equivalents on the basis of expected cash flows. The company's liquidity management policy involves projecting cash flows in major currencies and considering the level of liquid assets necessary to meet these, monitoring balance sheet liquidity ratios against internal requirements.

(i) *Maturities of financial liabilities*

The tables below analyse The company's financial liabilities into relevant maturity groupings based on their contractual maturities for:

- a) all non-derivative financial liabilities, and
- b) net and gross settled derivative financial instruments for which the contractual maturities are essential for an understanding of the timing of the cash flows.

The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

40 Capital management

(a) Risk management

The company's objectives when managing capital are to

- safeguard their ability to continue as a going concern, so that they can continue to provide returns for shareholders and benefits for other stakeholders, and
- maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, The company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

Consistent with others in the industry, The company monitors capital on the basis of the following gearing ratio:

Net debt (total borrowings net of cash and cash equivalents) divided by

Total 'equity' (as shown in the balance sheet).

The company's strategy is to maintain a optimal gearing ratio. The gearing ratios were as follows:

	March 31, 2018	March 31, 2017	March 31, 2016
Net debt	45,828.56	61,556.22	69,826.58

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (₹ in Lakhs)

44. Transition to Ind AS

These are the Company's first financial statements prepared in accordance with Ind AS.

The accounting policies set out in note 1 have been applied in preparing the financial statements for the year ended 31 March 2018, the comparative information presented in these financial statements for the year ended 31 March 2017 and in the preparation of an opening Ind AS balance sheet at 1 April 2016 (The company's date of transition). In preparing its opening Ind AS balance sheet, The company has adjusted the amounts reported previously in financial statements prepared in accordance with the accounting standards notified under Companies (Accounting Standards) Rules, 2006 (as amended) and other relevant provisions of the Act (previous GAAP or Indian GAAP).

An explanation of how the transition from previous GAAP to Ind AS has affected The company's financial position, financial performance and cash flows is set out in the following tables and notes.

A. Exemptions and exceptions availed

Set out below are the applicable Ind AS 101 optional exemptions and mandatory exceptions applied in the transition from previous GAAP to Ind AS.

A.1 Ind AS optional exemptions

A.1.1 Business combinations

Ind AS 101 provides the option to apply Ind AS 103 prospectively from the transition date or from a specific date prior to the transition date. This provides relief from full retrospective application that would require restatement of all business combinations prior to the transition date.

The group elected to apply Ind AS 103 prospectively to business combinations occurring after its transition date. Business combinations occurring prior to the transition date have not been restated. The group has applied same exemption for investment in associates and joint ventures.

A.1.2 Deemed cost

The Company has elected to restate retrospectively all its property, plant and equipment as per the Ind AS 16, except for freehold land, which have been accounted at fair value as deemed cost on transition date (as at 1st April, 2016).

A.1.3 Leases

Appendix C to Ind AS 17 requires an entity to assess whether a contract or arrangement contains a lease. In accordance with Ind AS 17, this assessment should be carried out at the inception of the contract or arrangement. Ind AS 101 provides an option to make this assessment on the basis of facts and circumstances existing at the date of transition to Ind AS, except where the effect is expected to be not material. The company has elected to apply this exemption for such contracts/arrangements.

A.2 Ind AS mandatory exceptions

A.2.1 Estimates

An entity's estimates in accordance with Ind ASs at the date of transition to Ind AS shall be consistent with estimates made for the same date in accordance with previous GAAP (after adjustments to reflect any difference in accounting policies), unless there is objective evidence that those estimates were in error. Ind AS estimates as at 1st April 2016 are consistent with the estimates as at the same date made in conformity with previous GAAP. The company made estimates for following items in accordance with Ind AS at the date of transition as these were not required under previous GAAP:

-Impairment of financial assets based on expected credit loss model.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (₹ in Lakhs)

A.2.2 De-recognition of financial assets and liabilities

Ind AS 101 requires a first-time adopter to apply the de-recognition provisions of Ind AS 109 prospectively for transactions occurring on or after the date of transition to Ind AS. However, Ind AS 101 allows a first-time adopter to apply the de-recognition requirements in Ind AS 109 retrospectively from a date of the entity's choosing, provided that the information needed to apply Ind AS 109 to financial assets and financial liabilities derecognised as a result of past transactions was obtained at the time of initially accounting for those transactions.

The group has elected to apply the de-recognition provisions of Ind AS 109 prospectively from the date of transition to Ind AS.

A.2.3 Classification and measurement of financial assets

Ind AS 101 requires an entity to assess classification and measurement of financial assets (investment in debt instruments) on the basis of the facts and circumstances that exist at the date of transition to Ind AS.

A.2.4 Soft Loans

Below market interest rate benefits for loans existing at the date of transition has not recognised the as government grant in line with para B10 mandatory exemption

C: Notes to first-time adoption:

Note 1: Investment in Subsidiaries

Investment in subsidiary has been treated as asset held for sale as the conditions outlined under Ind-AS 105 are met.

Note 2: Fair valuation of Land and Retrospective application of Ind AS 16

Company has adopted fair value of as it deemed cost for the land and retrospectively applied Ind AS 16 for other class of assets, Due to the above the equity increased by ₹ 7,447.15 lakhs as at 31st March 2017 (April 1, 2016 Rs.7,470.49 lakhs) and profit for FY 16-17 decreased by ₹ 23.34 lakhs.

Note 3: Instruments entirely in the nature of equity

Under previous GAAP, loans given by promoter were classified as loans, Under Ind-AS based on the substance of the agreement same has been classified as equity, due to this the equity as at April 1, 2016 increased by ₹ 894.60 lakhs.

Note 4: Loans at amortised cost

Under previous GAAP, loans are recognised at nominal value, interest rate of the loans has been recomputed at Effective interest rate (EIR) basis as per Ind-AS 109, due to this the equity as at March 31, 2017 decreased by ₹ 843.61 lakhs (April 1, 2016 ₹ 915.59 lakhs). Profit for FY 16-17 increased ₹ 71.98 lakhs.

Note 5: Finance lease classification

Certain arrangement as been classified as finance lease under Ind AS 109 as at transition date, due to this the equity as at March 31, 2017 and Profit for FY 16-17 decreased by ₹ 56.00 lakhs.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (₹ in Lakhs)

Note 6: Employee stock option expense

Under the previous GAAP, the cost of equity-settled employee share-based plan were recognised using the intrinsic value method. Under Ind AS, the cost of equity settled share-based plan is recognised based on the fair value of the options as at the grant date. Consequently, the amount recognised in share option outstanding account increased by ₹ 32.07 lakhs as at 31 March 2017 (1 April 2016- ₹ 28.04 lakhs). The profit for the year ended 31 March 2016 decreased by ₹ 4.27 lakhs. There is no impact on total equity.

Note 7: Remeasurements of post-employment benefit obligations

Under Ind AS, remeasurements i.e. actuarial gains and losses and the return on plan assets, excluding amounts included in the net interest expense on the net defined benefit liability are recognised in other comprehensive income instead of profit or loss. Under the previous GAAP, these remeasurements were forming part of the profit or loss for the year. As a result of this change, the profit for the year ended March 31, 2017 increased by ₹ 23.35 lakhs. There is no impact on the total equity as at 31 March 2017.

Note 8: Investment property

Under Ind AS, investment properties are required to be separately presented on the face of the balance sheet. There is no impact on the total equity or profit as a result of this adjustment.

Note 9: Excise duty

Under the previous GAAP, revenue from sale of products was presented exclusive of excise duty. Under Ind AS, revenue from sale of goods is presented inclusive of excise duty. The excise duty paid is presented on the face of the statement of profit and loss as part of expenses. This change has resulted in an increase in total revenue and total expenses for the year ended 31 March 2017 by ₹ 2,846.27 lakhs. There is no impact on the total equity and profit.

Note 10: Others

Under previous GAAP security deposit were carried at its nominal value and under Ind-AS the same were fair valued under transition date and subsequent amortisation prepaid rent. All these adjustments had marginal impact on equity and profit.

Note 11: Deferred tax

Deferred tax have been recognised on the adjustments made on transition to Ind AS.

1	Central Excise Demand	3,668.32	2,793.41	2,256.58
2	VAT Demand	75.85	75.85	75.85

- i) CESTAT had set aside the central excise demand of ₹ 397.78 Lakhs with interest and penalty for the period Apr'12 to Mar'13 and passed orders in favour of the Company in the matter of eligibility of exemption on molasses captively consumed and eligibility of cenvat credit availed on molasses procured from other Units in case of Unit III. The department has filed an appeal against this order in the Supreme Court of India and the decision is awaited. On the same issue for the period from Apr'13 to Mar'14, the Commissioner of Central Excise, Pondicherry has confirmed demand of ₹ 550.40 Lakhs with interest and penalty of ₹ 10.00 Lakhs against which the company has preferred an appeal before CESTAT. The department has further issued notices for demand of ₹ 1,197.71 Lakhs (Apr'14 to Mar'16), ₹ 80.38 Lakhs (Apr'12 to Jun'12) and ₹ 896.83 Lakhs (Apr'16 to Jun'17) which are yet to be adjudicated by the department. The department has also issued a notice for demand of ₹ 456.45 Lakhs towards Cenvat credit availed on Distillery capital goods on the same grounds as the other notices. This notice is also pending for adjudication before the Commissioner of Central Excise, Pondicherry.
- ii) In case of Unit I, a demand of ₹ 27.80 Lakhs on the same issue of eligibility of exemption on molasses captively consumed for the period April'10 to Feb'11 was set aside by the CESTAT, Chennai and the department of Excise has preferred an appeal against this decision in the Supreme Court of India. For the subsequent periods (Jan'12 to Dec'14), demand of ₹ 476.55 Lakhs with interest and penalty is also being contested by the Company. In view of the CESTAT order, the Company feels that they have a strong case and hence have not provided for these contingent liabilities in the account.
- iii) VAT (Assessment year 2011-12 & 2012-13) Appeal is pending before the Assistant Commissioner Commercial Taxes, in respect of a demand raised by the department, due to wrong classification of the product code. The total demand raised is ₹ 75.85 lakhs and the amount paid is ₹ 18.96 lakhs, towards initial payment for the appeal. Appeal has closed in favour of the Company and the order is awaited from the Assessment Circle.
- iv) The South India Sugar Mills Association, of which the company is a member, has filed W.P. No. 7872/2015 before the Hon'ble Madras High Court against Union of India and Director of Sugar, Tamil Nadu challenging the very jurisdictional basis of fixing additional cane price for the Sugar years 2004-05 to 2008-09 in the absence of any statutory power to do so. The said writ petition is pending before the said Court along with other connected writ petitions. In the said writ on 19/3/15 there is a direction to respondents that they shall not initiate any coercive proceedings to recover any amount pursuant to impugned order.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (₹ in Lakhs)

The Union of India and Director of Sugar have filed their counter affidavit. Connected writs filed by various parties are also pending. On 19.04.2018 the High Court directed to post all the connected writs for hearing during second week of June 2018.

No provision is made to the alleged cane dues pursuant to the above direction of the Court. The amount is indeterminate at this juncture.

- v) Recompense amount payable as per Corporate Debt Restructuring (CDR) scheme as at the close of the year is ₹ 4,767 lakhs (₹ 3,777 Lakhs).
- b) The Government of Tamilnadu notified the State Advised Price (SAP) of ₹ 2,650/ per MT of sugarcane for the sugar seasons 2013-14 and 2014-15 and ₹ 2,850/- for sugar season 2015-16 & 2016-17. The company has accounted the cane purchase at the rate of ₹ 2,350/- per MT (for the cane procured during Apr 2014 to Sep 2014) and at the rate of ₹ 2,400/- per MT (for the cane procured during the period October 2014 - Sep 2016) For the sugar season 2016-17, the company has paid ₹ 2,425/- per MT. All the private mills in Tamilnadu are disputing the SAP, and the case is pending before the High Court of Madras. The total disputed price involved is ₹ 17,790 Lakhs (₹ 17,131 lakhs).
- 11) Income Tax assessments have been completed up to Assessment year 2015-16. Disallowances made in the order of assessment in some of the years, purely technical in nature, have been disputed in appeal before the appellate authorities. No provision has been made therefor since there are no tax demands for the present.
- 12) In terms of Ind AS-36, the company has carried out an exercise to ascertain the impairment, if any, in the carrying values of its Fixed assets. The exercise has not revealed any impairment of assets during the year 2016-17 save and except the following:
- The Tamil Nadu Government has issued a G.O. dated 31.08.2010 as directed by the Hon'ble Madras High Court, notifying the elephant corridor in the Nilgiris District, which includes company's land of 7.83 acres in Masinagudi Village Nilgiris District. The GO has now been disputed before the Hon'ble Supreme Court by the Company in SLP (C) 16898/2011 and interim stay has been granted and the petition is still pending. The carrying value of the said land in the books is ₹ 35.57 lakhs (31.03.2017 ₹ 35.57 lakhs, 01.04.2016 Carrying value ₹ 35.57 lakhs).
