Detailed Rationale & Key Rating Drivers

Detailed Rationale & Key Rating Drivers

The revision in the rating of various structured long term debt instruments and bank facilities of ITNL factors in further moderation in the credit profile of the credit enhancement provider i.e, Infrastructure Leasing & Financial Services Limited (IL&FS) wherein the ratings are revised to CARE BB /CARE A4 (credit watch with negative implications) from CARE AA+(credit watch with negative implications) /CARE A1+.

The revision in ratings assigned to various debt instruments and bank facilities of IL&FS is on account of build-up of liquidity pressure on the group due to delay in raising funds as envisaged. IL&FS is in the process of raising equity capital of Rs.4,500 crore by H1FY19 (refers to period from April 01 to September 30) by way of Rights Issue and additionally avail lines of credit to the tune of Rs.3,500 crore from its *Page 12 of 19*

promoter entities for meeting near term liquidity needs and pursuing a deleveraging strategy involving asset sales at various group companies. However, lack of clarity on the fund infusion and impending sizeable repayment obligations in the near term due to elevated debt levels have significantly deteriorated the liquidity profile of the group. Further, the rating revision of IL&FS also takes into consideration the weakening in the credit profile of its energy vertical (housed in IL&FS Energy Development Company Limited; IEDCL) and engineering vertical (housed in IL&FS Engineering and Construction Company Limited; IECCL) which has further weakened the financial risk profile of the group

Earlier in August, 2018, the ratings of IL&FS were revised on account of build-up of company's debt levels over a period of time on the back of increase in funding support to key subsidiaries and group companies, especially to its transport vertical (housed in IL&FS Transportation Networks Limited), whose standalone credit profile has witnessed significant deterioration in recent times. Although IL&FS has been maintaining its profitability through stake sale / divestments in its group entities, the actual realization through sale of core assets has been slower than expected over a period resulting into moderation in the financial flexibility and corresponding increase in the debt levels. IL&FS has embarked upon several strategic measures for de-leveraging its balance sheet including capital infusion from existing shareholders and monetization of assets. The ratings continue to factor in IL&FS's strong institutional ownership, experienced management and demonstrated track record and expertise in the infrastructure sector. IL&FS's ability to maintain adequate capitalization and leverage ratio with expected capital infusion and monetization of the assets through stake sale / exit while maintaining the profitability would be the key rating sensitivities.

The ratings continue to remain on 'credit watch with negative implications' on account of the group's pursuit of a strategic plan to de-leverage the balance sheet by way of equity infusion, reduction of debt by refinancing the exposures in group companies and monetization of certain identified (core as well as non-core) assets by end of FY19 (refers to period from April 01 to March 31). Given the heightened leverage levels and the immediate need to support the group entities, infusion of funds by means of equity capital and credit lines in a time bound manner would be critical; any delay would further exacerbate the company's financial profile. CARE Ratings would continue to monitor the progress made by the group with respect to these strategic initiatives. Timely progress with respect to these initiatives would be critical for the credit profile of the company and will be a key rating monitorable.

Detailed description of the key rating drivers Key Rating Strengths

DSRA support undertaking from IL&FS

A legally binding Debt Service Reserve Account (DSRA)support agreement (among Debenture Trustee (DT), ITNL and IL&FS), whereby DT has to notify the promoter (IL&FS) for arranging the necessary funds in the DSRA under the Facility as agreed in the transaction documents remains key strength. The issuer "ITNL (rated CARE BB Negative/A4)" has entered into legally enforceable tripartite agreement with its parent IL&FS and DT, which is a key strength for the structured payment mechanism (SPM).

Page 13 of 19

However, since the DSRA support undertaking is neither unconditional nor irrecoverable, recourse to the promoter remains limited in an event of default to only arranging the necessary funds towards scheduled debt obligation due on immediately succeeding payment date.

Sponsor undertaking in the form of tripartite parent agreement by IL&FS

A binding tripartite parent agreement for shortfall undertaking (among DT, ITNL and IL&FS), whereby DT has the right to call upon the IL&FS for payment of redemption amount in the DSRA under the Facility as agreed in the transaction documents remains key strength. The issuer ITNL has entered into legally enforceable Tripartite Agreement with its parent IL&FS and debenture trustee which is a key strength for the SPM.

About the Credit Enhancement Provider (i.e. IL&FS)

IL&FS is one of India's leading infrastructure development and finance companies promoted by Life Insurance Corporation of India (LIC), Housing Development Finance Corporation (HDFC) Central Bank of India (CBI), and State Bank of India. IL&FS was established with twin mandates of providing financial services and to develop infrastructure projects under a commercial format. The shareholding pattern of the company has undergone a considerable change over the years with wider participation of other domestic as well as foreign institutional investors. IL&FS received certificate of registration as Core Investment Company (CIC-ND-SI) from RBI dated September 11, 2012.

IL&FS's income profile constitutes interest income from loans given to subsidiaries/group companies, dividend received from subsidiaries (mainly IFIN, IEDCL, ITNL and IL&FS Investment Managers Ltd.), brand fees received from group companies, rental income from business centre and profit from divestment of its exposure in group entities.

Analytical approach: For arriving at rating, CARE Ratings has considered credit profile of Infrastructure Leasing and Financial Services (IL&FS) Limited, which has provided credit enhancement in form of shortfall undertaking and DSRA support undertaking.

The ratings have been removed from watch with negative implications and negative outlook has been assigned. The rating continues to remain in the 'Issuer Not Cooperating' category.

The modifiers reflect the comparative standing within the category. The letters "SO" in parenthesis suffixed to a rating symbol stand for Structured Obligation. An SO rating, is specific to the rated issue, its terms and its structure. SO ratings do not represent ICRA's opinion on the general credit quality of the issuers concerned.
